Making a Living in Europe Alan Townsend, 2005-08-18 Exploring the relationship between employment change society and economic restructuring *Making a Living in Europe* shows how the culture of work has been transformed in the industrialized nations of the EU *Making a Living in Europe* Alan Townsend, 2005-08-18 Will making a Living remain a dream for the deprived and excluded Jobs are one of Europe's most important problems Employment provides the basic means of distributing wealth in society in providing for families and ensuring pensions for the elderly Yet unemployment and increasingly non employment continues at near record levels in the European Union *Making a Living in Europe* shows how the culture of work has been transformed in the industrialised nations of the EU Exploring the relationship between employment change society and economic restructuring the shift toward flexible work for women in services away from traditional industrial jobs for men is demonstrated within three key sectors business services retailing and tourism The outcome of change is discussed in terms of shifts of people and jobs from urban to rural areas Europe must be understood in the context of the new Europe of change in the USA and of global change Drawing on examples from UK and European Regions and USA the author challenges long standing assumptions about changes in economy and society and highlights the need for stronger local and European policies to reduce inequality at large and contribute positively to local people's struggles to make a living in Europe

European Union Discourses on Un/employment Peter Muntigl, Gilbert Weiss, Ruth Wodak, 2000-10-15 Employment is clearly one of those fields of political activity that reveal the manifold problems and difficulties accompanying the process of European integration and supranational institutionalization In particular the conflict between supranationalists and intergovernmentalists and the degree to which member states show willingness to cooperate with each other become manifest The Union is struggling for new employment policies that should on the one hand be compatible with the European model of the welfare state and on the other adopt to new economic constraints These debates are accompanied by many conflicts between different interest groups and lobbies This study succeeded in looking behind closed doors within the EU organizational system Committee meetings were tape recorded and analysed drafts of policy papers were examined for recontextualizations and the impact of interest groups and different economic and ideological concepts on policy making made explicit A comparison of decision making processes in the European Parliament and in small networks of the Commission illustrates the different argumentation patterns and discursive practices that are involved in the formation of new employment policies The ethnographic research is accompanied by a systemic linguistic and sociological analysis of various institutional genres and political spaces

SAGE Secondary Data Analysis John Goodwin, 2012-07-23 One central and enduring image of the social science researcher is of an individual who commits a great deal of time to collecting original primary data from a field of enquiry This approach is often underpinned by a sincerely held belief that key research questions can only be explored by the collection of ever new and ever greater amounts of data or that

already existing data are insufficient for researchers to test their ideas Yet such an approach to social science research can be problematic not least because the collection of primary data can be an expensive time consuming and even wasteful approach to social enquiry Secondary analysis can serve many purposes as well as being a valid approach in its own right However despite its widespread application secondary analysis is often undervalued or perceived to be the preserve of only those interested in the re use of large scale survey data Highlighting both the theory and practice of secondary analysis and the use of secondary sources this collection considers the nature of secondary analysis as a research tool reflects on the definitional debates surrounding terms such as secondary analysis data re use and restudies illustrates how secondary analysis is used in social science research and finally reviews the practical methodological and ethical aspects of secondary analysis Volume One Using Secondary Sources and Secondary Analysis Volume Two Quantitative Approaches to Secondary Analysis Volume Three Qualitative Data and Research in Secondary Analysis Volume Four Ethical Methodological and Practical Issues in Secondary Analysis

Williams,2004-07-03 Uncovering how cash in hand economies are composed of not only the underground sector work akin to formal employment conducted for profit motivated purposes but also a hidden economy of favours more akin to mutual aid this book displays the need to transcend conventional market oriented readings of cash in hand work and radically rethink whether seeking its eradication through tougher regulations is always appropriate It argues for a variegated policy approach that recognizes these two distinct forms of cash in hand work and which tailors policy accordingly
