Making A Market The Institutional Transformation Of An African Society

James G. Carrier

Making A Market The Institutional Transformation Of An African Society:

Making a Market Jean Ensminger, 1996-09-13 In *Making a Market* Jean Ensminger analyzes the process by which the market was introduced into the economy of a group of Kenyan pastoralists Professor Ensminger employs new institutional economic analysis to assess the impact of new market institutions on production and distribution with particular emphasis on the effect of institutions on decreasing transaction costs over time This study traces the effects of increasing commercialization on the economic well being of individual households rich and poor alike over considerable time and analyzes the process by which institutions themselves are transformed as a market economy develops This case study points out the importance of understanding the roles of ideology and bargaining power in addition to pure economic forces such as changing relative prices in shaping market institutions

The New Institutionalism in Sociology Mary C. Brinton, Victor Nee, 2001 Institutions play a pivotal role in structuring economic and social transactions and understanding the foundations of social norms networks and beliefs within institutions is crucial to explaining much of what occurs in modern economies This volume integrates two increasingly visible streams of research economic sociology and new institutional economics to better understand how ties among individuals and groups facilitate economic activity alongside and against the formal rules that regulate economic processes via government and law Reviews This volume is a welcome addition to the expanding literature on institutional analysis Besides sociologists we are afforded the pleasure of contributions from anthropologists economists historians political scientists and scholars located in schools of law and education One of the pleasures of the volume is the wide range of topics times and locales addressed by the authors In all these diverse situations the application of institutional queries and approaches enhances our understanding and appreciation of the endlessly rich and diverse nature of social life Contemporary Society This admirable book makes a strong contribution to institutional theory has many excellent chapters and is a model for interdisciplinary exchange and cross fertilization It is dense with interesting ideas and points for debate and I heartily recommend it Sociological Research Online

A Research Agenda for Economic Anthropology James G. Carrier, 2019 The financial crisis and its economic and political aftermath have changed the ways that many anthropologists approach economic activities institutions and systems This insightful volume presents important elements of this change With topics ranging from the relationship of states and markets to the ways that anthropologists political preferences and assumptions harm their work the book presents cogent statements by younger and established scholars of how existing research areas can be extended and the new avenues that ought to be pursued

The Social Economics of Poverty Christopher B. Barrett, 2006-10-03 A unique analysis of the moral and social dimensions of microeconomic behaviour in developing countries this book calls into question standard notions of rationality and many of the assumptions of neo classical economics and shows how these are inappropriate in communities with widespread disparity in incomes This book will prove to be essential for students studying development economics

Veto Bargaining Charles M.

Cameron,2000-06-19 Combining game theory with unprecedented data this book analyzes how divided party Presidents use threats and vetoes to wrest policy concessions from a hostile congress *Market Institutions in Sub-Saharan Africa* Marcel Fafchamps,2003-12-05 An analysis of recent data on the economic behavior of market institutions in sub Saharan Africa with implications for future research and current policy In *Market Institutions in Sub Saharan Africa* Marcel Fafchamps synthesizes the results of recent surveys of indigenous market institutions in twelve countries including Benin Ghana Kenya Madagascar Malawi and Zimbabwe and presents findings about economics exchange in Africa that have implications both for future research and current policy Employing empirical data as well as theoretical models that clarify the data Fafchamps takes as his unifying principle the difficulties of contract enforcement Arguing that in an unpredictable world contracts are not always likely to be respected he shows that contract agreements in sub Saharan Africa are affected by the absence of large hierarchies both corporate and governmental and as a result must depend to a greater degree than in more developed economies on social networks and personal trust Fafchamps considers policy recommendations as they apply to countries in three different stages of development countries with undeveloped market institutions like Ghana countries at an intermediate stage like Kenya and countries with developed market institutions like Zimbabwe *Market Institutions in Sub Saharan Africa* caps ten years of personal research by the author Fafchamps in collaboration with such institutions as the Africa Division of the World Bank and the International Food Policy Research Institute participated in the surveys of manufacturing firms and agricultural traders that provide the empirical basis for the book The result is a work that makes a significant contribution to research on the continuing economic stagnation of many countries in sub Saharan Africa and is also largely accessible to researchers in other fields and policy professionals *Theory in Economic Anthropology* Jean Enslinger,2002 Comprising 13 contributions mostly based on papers presented at the annual conference of the Society for Economic Anthropology in 1998 at Northwestern University this volume focuses several themes the new institutionalism wealth exchange and the evolution of social institutions small producers interactions with the wider world commodity chains and the formal informal sector distinction and the role for big theory in economic anthropology Annotation copyrighted by Book News Inc Portland OR *Identity and Territorial Autonomy in Plural Societies* Ramón Máiz,Safran William,2014-01-14 Focusing on autonomy in countries whose societies are marked by ethnic diversity this work examines the effects of territorial solutions to the safeguarding of cultural identities Contributors distinguish among types of autonomy and their impact on pluralism democracy and unity of the state **Chinese Aid and African Development** D. Bräutigam,1998-06-21 Since 1957 more than 45 African countries have received aid from China yet until recently little has been known about the effectiveness or impact of this assistance Br utigam provides the first authoritative account of China s experience as an aid donor in rural Africa In a detailed and highly readable analysis the author draws on anthropology economics organization theory and political science to explain how China s domestic agenda shaped the design of its aid and how domestic politics in African

countries influenced its outcome *The Dilemma of the Commoners* Tine De Moor, 2015-04-30 This book puts the debate on commons commoners and the disappearance of both throughout early modern and modern western Europe in a new light through new approaches and innovative methodologies Tine De Moor links the historical debate about the long term evolution of commons to the present day debates on common pool resources
