Making Foreign People Pay Ali Cem Budak, 2019-05-29 First published in 1999 Making Foreign People Pay deals with the recovery of monetary claims in cross border legal relations and contains the results of a comparative empirical research of debt recovery procedures of three countries with different socio legal environments Germany England and Turkey In order to analyse judicial debt recovery of cross border claims court statistics and files have been evaluated The data show an infrequent use of the courts in all three countries It seems that legal efforts aiming at facilitating international procedures have not been successful But court procedures for the recovery of monetary claims are now to a large extent interchangeable with what may be called privatised methods of debt collection including modern financial services such as factoring forfaiting and commercial debt collection Empirical evidence shows that such privatization of debt collection is a strong trend in cross border debt collection The book is an empirical contribution to the ongoing discussion of globalization processes and describes an important field of the globalization of law

How Artists Make Money and How Money Makes Artists David Berry, 2025-10-14 How artists make a living and how money changes art It may not be the worst time in history to get paid to make art but it certainly is the strangest The institutions and markets that have been supporting the arts are undergoing massive changes some even disappearing Meanwhile the tools to make art and find audiences have never been more accessible and there are more people than ever making art How Artists Make Money and How Money Makes Artists is an attempt to reckon with the history of money in the arts from Titian to Taylor Swift and how that complicated relationship is changing David Berry analyzes past and present financial dynamics in the arts to show the practicalities of how artists make a living and how that in turn affects the reception and perception of artists and their work the impacts art has on wider society how economic realities affect aesthetic judgements of art what kind of people are able to work as artists and how political and cultural ideas about the nature of art affect what kind of resources are made available to it David Berry explores how art has become central to our

understanding of humanity by tying art to what makes the world go round money Along the way he challenges popular ideas of what constitutes a successful artistic career and considers what our treatment of artists says about us *Mystery of Making IT* Jack White,2010-03-19 *Mystery of Making IT* destroys all the myths learned in art school that have been passed down from generation to generation and will transform your career Written for the seasoned pro as well as those just starting to market their art Over a thousand artists have read this book and say it has dramatically changed their lives Learn the secrets guarded by the professionals and find the path to your own success Jack White has been a successful artist for over 40 years and freely shares his experience Mind in Art Charles M. Dorn,1999 This book is for the reader who believes that thinking about and making art is intelligent behavior and that art as a subject in the K 12 school curriculum should not be used as an alibi for other curricular objectives It examines and makes explicit those cognitive behaviors normally associated with most higher order thinking and problem solving activity and explains how they function in the act of creative forming Its goal is ultimately to find ways to use these behaviors in the construction of an intelligent art curriculum for K 12 American schools This is perhaps the only text in the field designed to assist teachers in meeting the challenges of teaching in the Goals 2000 curriculum and evaluation reform effort acquainting them with both the National Art Standards and with the assessment processes needed in order for them to become accountable *Mind in Art* grapples with current and relevant theory research and unsolved problems It is cohesive as it attempts to bring together information that is only partially known even among those who are college professors And it takes a critical look at the ideas and points of view that have created divisiveness and shabby thinking in the field In this book Charles Dorn significantly advances thinking in the field of art education Recording Conceptual Art Patsy Norvell,2001-02-15 Featuring a highly provocative series of interviews conducted in early 1969 with some of the most dynamic daring and innovative artists of the tumultuous 1960s The nine individuals eight artists and one art dealer are now known as major contributors to Conceptual art Federal Trade Commission Decisions United States.
