Making Economic Sense:

Making Economic Sense Murray Newton Rothbard, 2006 **Does Community Based Conservation Make Economic Sense?** Sushil Saigal, 2000 On the economic prospects of community based environmental conservation in India **Making Sense of Slavery** Scott Spillman, 2025-03-04 An essential James Oakes author of *The Crooked Path to Abolition* history of the study of slavery in America from the Revolutionary era to the 1619 Project showing how these intellectual debates have shaped American public life In recent years from school board meetings to the halls of Congress Americans have engaged in fierce debates about how slavery and its legacies ought to be taught researched and narrated But since the earliest days of the Republic political leaders abolitionists judges scholars and ordinary citizens have all struggled to explain and understand the peculiar institution In *Making Sense of Slavery* historian Scott Spillman shows that the study of slavery was a vital catalyst for the broader development of American intellectual life and politics In contexts ranging from the plantation fields to the university classroom Americans interpreted slavery and its afterlives through many lenses shaping the trajectory of disciplines from economics to sociology from psychology to history Spillman delves deeply into the archives and into the pathbreaking work of scholars such as W E B Du Bois and Annette Gordon Reed to trace how generations of Americans have wrestled with the paradox of slavery in a country founded on principles of liberty and equality As the debate over the place of slavery in our history rages on *Making Sense of Slavery* shows that what is truly central to American history is this very debate itself **The Basic Facts of Economics** Louis Freeland Post, 1927 **Making Tax Sense** M. Kevin McGee, 2019-03-15 Our tax system is a mess And the reason for that mess is our tax system is incoherent A well designed tax system is like a good jigsaw puzzle all the pieces fit together snugly so when the whole thing is fully assembled it forms a coherent picture But our current tax system is disjointed with parts that don't logically fit together That results in inconsistencies complexity loopholes and distorted incentives We need a tax system that make sense As this book shows however making a traditional income tax coherent is an impossible goal But coherence is achievable if we adjust our target and complete the switch to a consumed income tax a system that taxes all income not when it is earned but when that income is consumed The move towards a consumed income tax was begun decades ago when we first adopted IRAs and other tax deferred savings accounts We just needed to complete the evolution The book explores a variety of tax issues among them savings small businesses owner occupied houses and corporations and develops seven groups of recommended changes These changes would result in a tax system that would be pro growth by eliminating the existing disincentives to saving and investment But the tax system would also remain progressive with the wealthy taxed as much as and perhaps even more than currently That combination could make the recommended changes attractive to members of both parties and might bring to a close the political seesaw in tax policy that we've experienced over that last several decades *Making Sense of Mass Education* Gordon Tait, 2015-10-09 This second edition of *Making Sense of Mass Education* has been comprehensively

updated and expands on the previous edition's structure of derailing traditional myths about education as a point of discussion. It also features two new chapters on Big Data and Globalisation and what they mean for the Australian classroom.

Principles of Economics 3e Steven A. Greenlaw, David Shapiro, Daniel MacDonald, 2022-12-14 Principles of Economics 3e covers the scope and sequence of most introductory economics courses. The text uses conversational language and ample illustrations to explore economic theories and provides a wide array of examples using both fictional and real world scenarios.
