Making Globalisation Hc:

Education in Global Health Policy Making and Management Eduardo Missoni, Fabrizio Tediosi, 2013-11-17 T00:00:00+01:00 Global health has been increasingly recognized as a key element of sustainable development. The recent increase in the number of public and private global health actors and the complex global governance for health boosted the need for professionals who combine a thorough understanding of health related challenges with multidisciplinary training in social sciences, economics and management. In the past few years this has led not only to the mushrooming of courses dedicated to global health but also academic degrees in global health. By reviewing a recent attempt to innovate the educational offerings in global health policy and management by a consortium of academic institutions in Italy, the book analyzes the recent trends in global health education. The book concludes that while global health and development is certainly an emerging area in the higher education systems of many countries, international offerings in graduate programs are still highly dominated by those taught in medical schools, often failing to combine health sciences with economic, social and management sciences. The multidisciplinary nature of global health education programs should be improved.

Health Equity, Social Justice and Human Rights Fiona McKay, Ann Taket, 2020-04-28 Important links between health and human rights are increasingly recognised and human rights can be viewed as one of the social determinants of health. A human rights framework provides an excellent foundation for advocacy on health inequalities, a value based alternative to views of health as a commodity and an opportunity to move away from public health action being based on charity. This text demystifies systems set up for the protection and promotion of human rights globally, regionally and nationally. It explores the use and usefulness of rights based approaches as an important part of the toolbox available to health and welfare professionals and community members working in a variety of settings to improve health and reduce health inequities. Global in its scope, *Health Equity, Social Justice and Human Rights* presents examples from all over the world to illustrate the successful use of human rights approaches in fields such as HIV/AIDS, improving access to essential drugs, reproductive health, women's health and improving the health of marginalised and disadvantaged groups. Understanding human rights and their interrelationships with health and health equity is essential for public health and health promotion practitioners as well as being important for a wide range of other health and social welfare professionals. This text is valuable reading for students, practitioners and researchers concerned with combating health inequalities and promoting social justice.

Handbook on Globalisation and Labour Standards Elliott, Kimberly A., 2022-03-15 This comprehensive Handbook explores the complex and volatile debate over globalisation and labour standards. It offers key insights into the impact of globalisation on workers, the obligations of corporations and international legal bodies in protecting workers' rights and maximising the opportunities offered by international trade and investment.

Negotiating And Navigating Global Health: Case Studies In Global Health Diplomacy Ellen Roskam, Ilona Kickbusch, 2011-12-28

Diplomacy is undergoing profound changes in the 21st century and global health is one of the areas where this is most apparent. The negotiation processes that shape and manage the global policy environment for health are increasingly conducted not only between public health experts representing health ministries of nation states but include many other major players at the national level and in the global arena. These include philanthropists and public private players. As health moves beyond its purely technical realm to become an ever more critical element in foreign policy, security policy and trade agreements, new skills are needed to negotiate global regimes, international agreements and treaties and to maintain relations with a wide range of actors. The intent of this book is to provide learning tools for today's broad group of new health diplomats in the landscape of this ever shifting complex technical and political arena. The case studies are told as the negotiations were experienced by individuals who participated in the various debates, dialogues, negotiations or by experts who have studied them. This collection fills an important gap in both knowledge and practice, providing insight on how negotiations on global health issues have transpired, the successes, challenges, failures, tools and frameworks for negotiation, mechanisms of policy coherence, ways to achieve global health objectives internationally and how global health diplomacy used as a foreign policy tool can improve relations between nations.

Globalisation Great Britain: Parliament: House of Commons: Treasury Committee, 2007-10-16 Globalisation is having an enormous impact on the UK's economy, creating significant challenges for policy making with the shift in economic power from West to East, particularly the rise of China and India in the global economy. The effects will be felt on highly skilled jobs as well as some less skilled employment and public policy needs to respond to the likely implications for the labour market. The Committee's report considers domestic policy challenges relating to the promotion of innovation and improving the business environment and the skills base in the economy and issues discussed include the drivers of globalisation, trade and protectionism, global imbalances as well as the beneficial and adverse effects of globalisation for the UK economy. The Committee recommends that in order to promote understanding of the impact of globalisation on jobs and communities, the Government should publish an annual review of new developments affecting the impact of and prospects for globalisation. Given that protectionist sentiment is increasing, posing a threat to the progress of both developed and developing countries, the Committee supports the Government's promotion of a successful conclusion to the Doha trade round. Globalisation is also threatened by the risk of a disorderly unwinding of global imbalances and the success of a reformed International Monetary Fund will be judged by its performance in ensuring global imbalances are properly addressed.

International Migration and Global Justice Satvinder Juss, 2016-04-22 How should international law approach the critical issue of movement of peoples in the 21st century? This book presents a radical reappraisal of this controversial problem. Challenging present day ideas of restrictions on freedom of movement and the international structure that controls entry to states, it argues for a new blueprint for international

migration policy that eliminates waste aids both developing and developed societies and brings attendant benefits to voluntary migrants and involuntary refugees alike In a world of increasing disorder it is suggested that current policy only adds to international instability and threatens the interests of a functional global community *Arts, Culture and the Making of Global Cities* Lily Kong, Ching Chia-ho, Chou Tsu-Lung, 2015-01-30 While global cities have mostly been characterized as sites of intensive and extensive economic activity the quest for global city status also increasingly rests on the creative production and consumption of culture and the arts *Arts Culture and the Contestations in Global Civil Society* Roopinder Oberoi, Jamie P. Halsall, Michael Snowden, 2022-05-30 *Contestations in Global Civil Society* examines the ways in which the global community is dealing with heightened destabilization and takes a close look at shifts accompanying the resurrection of civil society discourses such as political mobilization polarization responsibility and participation

Communicating Health Risks to the Public Dawn Hillier, 2016-05-23 This book reviews current health risk communication strategies and examines and assesses the technical and psycho sociological tools available to support risk communication plans It brings together approaches to risk communication from a number of countries and describes the techniques including drama storytelling and scenarios that are used to identify and prioritise key communication issues and to identify policy responses The book also provides a review of the methods and tools available for risk assessment risk communication and priority setting which are relevant not only to practitioners but to health planning more generally and to many other areas of public health and policy The discussion of these techniques is supported by case studies and is concluded by a chapter reflecting on the conceptual and research issues that still need to be addressed It also proposes new directions for risk communication that key into the public imagination with the aim of gaining their trust and confidence in the risk messages *Communicating Health Risks to the Public A Global Perspective* brings together a wide variety of perspectives on risk communication from the perspectives of health anthropology psychology and media It should be of interest not only to those involved in risk assessment or communication but to anyone interested in the role of science and the media in the political process
