Sitvast,2020-10-28 In healthcare nurses often have a great deal of contact with patients on a 24 hour basis They are in a
position to hear the patient s stories not only while giving care but also during more informal communication throughout the
day This puts them in a position to use their response to patients in a more conscious manner and realize therapeutic aims by
exploiting narrative means in a methodological way This book extensively describes how this can be accomplished not only
through a theoretical expos but also using case studies In addition to this pragmatic focus it explains how narrative relates to
larger concepts such as self management shared decision making recovery and person centred care and shows that narrative
can be a vehicle to these desired outcomes The book also considers organizational aspects of narrative oriented healthcare
by introducing a model in which narrative plays an important role As such it will allow nurses in the field to make a
paradigmatic switch from a perspective dominated by delivery of care to one that is person centred recovery oriented and
