Making Of Rhodes:

A Study Guide for Richard Rhodes's "The Making of the Atomic Bomb" Gale, Cengage Learning, 2016 **The Making of a Racist State** Bernard Magubane, 1996 How did the Union of South Africa come to be dominated by a white minority That is the obvious but haunting question addressed in this remarkable historical survey which documents and analyses the chain of events that led up to the passing in 1909 of the South African Act by the British Parliament **Savannah River Site at Fifty** Mary Beth Reed, 2002 The heart of the book is a historical treatment of Savannah River Site's operations its peak period of production 1953 to 1979 Developments in reactor technology and chemical separations heavy water production waste management and the research goals of the Savannah River Laboratory are described in layman's terms and are amply illustrated This history profiles the individuals who brought the plant to maturity and explores the two themes that define the nuclear weapons workplace safety and security Rhode Island: Its Making and Its Meaning Irving Berdine Richman, 1902

Growth Growth Growth Julian Cobbing, 2024-04-11 Growth Growth Growth retells history as a succession of pivotal crises linked to economic growth Beginning with agriculture ten thousand years ago each crisis led to an impasse until human ingenuity devised a technical solution to fix it These solutions included the alphabet paper clocks guns the printing press the steam engine the petrol engine electricity nitrogen fertilizer and the computer Each solution however played a part in the next crisis Growth driven crises led to the world wars of the first half of the twentieth century including the atrocities of Stalin Hitler and Hiroshima The brief golden age of capitalism of the 1950s and 1960s gave way to the ultra corporate capitalism that in one variant or another is now the global economic system Julian Cobbing's lively account exposes the historical roots of our converging problems the destruction of the environment the massacre of other species the running down of oil reserves global heating and the nuclear threat to all of us This time there is no technical solution since we are devouring the Earth's finite resources Cobbing reminds us that we are just one species in a planetary life system which could dispense with us if we are not needed *List of Private Claims Brought Before the Senate, from the Commencement of the Fourteenth to the Close of the Thirtieth Congress* United States. Congress. Senate, 1849 *Downwind of the Atomic State* James C. Rice, 2025-04 2024 Outstanding Academic Title given by Choice Reviews How the scientific community overlooked ignored and denied the catastrophic fallout of decades of nuclear testing in the American West In December of 1950 President Harry Truman gave authorization for the Atomic Energy Commission to conduct weapons tests and experiments on a section of a Nevada gunnery range Over the next eleven years more than a hundred detonations were conducted at the Nevada Test Site and radioactive debris dispersed across the communities just downwind and through much of the country In this important work James C Rice tells the hidden story of nuclear weapons testing and the negligence of the US government in protecting public health Downwind of the Atomic State focuses on the key decisions and events shaping the Commission's mismanagement of radiological contamination in the region specifically on how the risks of fallout were defined and

redefined or importantly not defined at all owing to organizational mistakes and the impetus to keep atomic testing going at all costs Rice shows that although Atomic Energy Commission officials understood open air detonations injected radioactive debris into the atmosphere they did not understand or seem to care that the radioactivity would irrevocably contaminate these communities The history of the atomic Southwest should be a wake up call to everyone living in a world replete with large complex organizations managing risky technological systems The legacy of open air detonations in Nevada pushes us to ask about the kinds of risks we are unwittingly living under today What risks are we being exposed to by large organizations under the guise of security and science

Critical Mass Carter Hydrick, 2016-08-01 On May 19 1945 eleven days after the surrender of Nazi Germany in Europe a U boat was escorted into Portsmouth Naval Yard New Hampshire News reporters covering the surrender of U 234 were ordered contrary to all previous and later U boat surrender procedures to keep their distance from crew members and passengers of U 234 on threat of being shot by the attending Marine guards Why the tight security Buried in the nose of the specially built mammoth boat sealed in cylinders lined with gold was 1 120 pounds of enriched uranium labeled U235 the fissile material from which atom bombs are made Critical Mass documents how these Nazi bomb components were then used by the Manhattan Project to complete both the uranium bomb dropped on Hiroshima and the plutonium bomb dropped on Nagasaki to defeat the Japanese and win World War Two and global domination in the modern age

Bombing the Marshall Islands Keith M. Parsons, Robert A. Zaballa, 2017-07-26 A narrative history of the nuclear tests conducted by the United States in the Marshall Islands from 1946 to 1958

The Nuclear Age Serhii Plokhy, 2025-10-21 A sweeping history of the geopolitics behind the nuclear arms race from the first atomic bomb to today's rush to stockpile nuclear weapons The nuclear age came into existence with the explosion of the first atomic bomb in the New Mexico desert on July 16 1945 The inauguration of this new era was epitomized by the bomb's principal creator J Robert Oppenheimer quoting the Bhagavad Gita Now I am become death the destroyer of worlds Since then the era of the atom has become the age of the bomb or two bombs atomic and hydrogen In The Nuclear Age Serhii Plokhy one of our preeminent Cold War historians explores why governments have acquired and stockpiled nuclear weapons and reveals the global failure to reach meaningful nuclear arms treaties Plokhy shows how since the Cuban missile crisis of 1962 the risk of nuclear war has never been so high Russia threatens nuclear aggression in its war on Ukraine China is constructing hundreds of new missile silos and India and Pakistan are locked in ongoing nuclear competition Plokhy also examines how more countries than ever have come within perilous reach of acquiring nuclear arms while new technologies such as hypersonic missiles and artificial intelligence make the nuclear landscape increasingly unpredictable From Hiroshima Nagasaki and the Castle Bravo test of 1954 to the rapidly developing nuclear programs of North Korea and Iran The Nuclear Age reveals the fear that governs the proliferation of nuclear weapons Plokhy profiles the global players who have diagnosed stoked and influenced this fear from H G Wells to Nikita Khrushchev and Vladimir Putin and he outlines what we might learn from our past to

control today's arms race As the danger of nuclear war remains imminent The Nuclear Age diagnoses our era of rearmament

Index to Documents The Senate of the United States, During the Second of the Twenty-Sixth Congress, 1841 **World War II and the West It Wrought** Mark Brilliant, David M. Kennedy, 2020-04-28 Few episodes in American history were more transformative than World War II and in no region did it bring greater change than in the West Having lifted the United States out of the Great Depression World War II set in motion a massive westward population movement ignited a quarter century boom that redefined the West as the nation's most economically dynamic region and triggered unprecedented public investment in manufacturing education scientific research and infrastructure an economic revolution that would lay the groundwork for prodigiously innovative high tech centers in Silicon Valley the Puget Sound area and elsewhere Amidst robust economic growth and widely shared prosperity in the post war decades Westerners made significant strides toward greater racial and gender equality even as they struggled to manage the environmental consequences of their region's surging vitality At the same time wartime policies that facilitated the federal withdrawal of Western public lands and the occupation of Pacific islands for military use continued an ongoing project of U.S. expansionism at home and abroad This volume explores the lasting consequences of a pivotal chapter in U.S. history and offers new categories for understanding the post war West Contributors to this volume include Mark Brilliant Geraldo L. Cadava Matthew Dallek Mary L. Dudziak Jared Farmer David M. Kennedy Daniel J. Kevles Rebecca Jo Plant Gavin Wright and Richard White **Making of Modern Africa: The Late Nineteenth Century to the Present Day**, 1969 **Bulletin of the Atomic Scientists**, 1987-11 **How Power Shapes Energy Transitions in Southeast Asia** Jens Marquardt, 2016-12-01 An understanding of the role of energy related governance systems and the conditions required for a shift towards renewables in developing countries is urgently needed in order to tap into the global potential of low carbon development Although renewable energy sources have become technically feasible and economically viable social and political factors continue to persist as the most critical obstacles for their dissemination How Power Shapes Energy Transitions in Southeast Asia conceptualizes power for the field of sustainable energy governance Based on empirical findings from the Philippines and Indonesia the book develops an analytical approach that incorporates power theory into a multi level governance framework The book begins with a profound background on renewable energy development around the world and presents major trends in development cooperation A power based multi level governance approach is introduced that is rooted in development thinking Examining how coordination and power relations shape the development and dissemination of renewable energy technologies the book also shows how decentralization affects low carbon development in emerging economies Sparking debate on the ways in which energy transitions can be triggered and sustained in developing countries this book will be of great interest to students and scholars of renewable energy development and environmental politics and governance as well as practitioners in development cooperation **A Call to Arms** Maury Klein, 2013-07-16 A narrative account of the American mobilization for World War II

reveals its colossal scale and enduring impact on history exploring how the nation's productivity became a decisive factor in shaping America's economy and the war's outcome By the author of *Rainbow's End* 30 000 first printing **Pro**

Smartphone Cross-Platform Development Sarah Allen,Vidal Graupera, Lee Lundrigan,2010-11-22 Learn the theory behind cross platform development and put the theory into practice with code using the invaluable information presented in this book With in depth coverage of development and distribution techniques for iPhone BlackBerry Windows Mobile and Android you ll learn the native approach to working with each of these platforms With detailed coverage of emerging frameworks like PhoneGap and Rhomobile you ll learn the art of creating applications that will run across all devices You ll also be introduced to the code signing process and the distribution of applications through the major application stores including Research In Motion BlackBerry Apple and Microsoft *Politics of European Union Regional Policy* Ian Bache,1998-12-01 This book provides an over view of the key developments in the politics of European Union regional policy from the creation of the EEC to the present day The discussion of who decides what and to what effect in relation to regional policy is part of the contemporary academic debate about the nature of politics and policy making in the EU Bache argues that no single theory can explain the complex politics of EU regional policy making In particular current theories pay insufficient attention to the importance of implementation in shaping policy outcomes The book concludes that the application of different analytical tools at different stages of policy making provides the fullest picture of the politics of EU regional policy This title is published in conjunction with UACES the University Association for Contemporary European Studies UACES web site can be found at www.uaces.org **The Use of Nuclear Weapons and the Protection of the Environment during International**

Armed Conflict Erik V Koppe,2008-04-25 In 1996 the International Court of Justice delivered an Advisory Opinion on the legality of the use of nuclear weapons in which the Court stated that while the existing international law relating to the protection and safeguarding of the environment does not specifically prohibit the use of nuclear weapons it indicates important environmental factors that are properly to be taken into account in the context of the implementation of the principles and rules of the law applicable in armed conflict The present work analyses this conclusion focusing on the question whether or not the use of nuclear weapons during international armed conflict would violate existing norms of public international law relating to the protection and safeguarding of the environment Although the use of weaponry during armed conflict is usually related to the protection of individuals the rapidly emerging appreciation of and the worldwide realization of the intrinsic value of the natural environment as an indispensable asset for the continuation of life including human life on this planet both for present and future generations warrants a thorough and extensive examination of the question of the illegality of the employment of nuclear weapons from the point of view of international environmental protection law The book consists of two parts Part I discusses the historical development and the effects of nuclear weapons Part II discusses the protection of the environment during international armed conflict under *ius in bello* *ius ad bellum* and

ius pacis Only then is it possible to assess the legality of the use of nuclear weapons under this particular set of rules

Devolution and Localism in England David M. Smith, Enid Wistrich, 2016-04-22 Combining historical and policy study with empirical research from a qualitative study of regional elites this book offers an original and timely insight into the progress of devolution of governance in England With particular interest in how governments have tried and continue to engage English people in sub national democratic processes while dealing with the realities of governance it uses in depth interviews with key figures from three English regions to get the inside view of how these processes are seen by the regional and local political administrative business and voluntary sector elites who have to make policies work in practice Tracing the development of decentralisation policies through regional policies up to and including the general election in 2010 and the radical shift away from regionalism to localism by the new Coalition Government thereafter the authors look in detail at some of the key policies of the incumbent Coalition Government such as City Regions and Localism and their implementation Finally they consider the implications of the existing situation and speculate on possible issues for the future
