The Making of the Holocaust André Mineau, 2022-07-18 What made the Holocaust possible What does it mean from a moral viewpoint These two questions constitute the main focus of this book Through concepts borrowed mostly from systems theory an attempt is made at establishing a theoretical framework for a broad understanding of the genesis of the Holocaust More specifically the relationships between ideology political power and genocide are discussed and the following topics are covered 1 the constitution and the historical evolution of the ideology of the Holocaust through the genesis of anti-Semitism the impact of the modern paradigms and the apparent peculiarities of Nazism 2 the emergence of powerful means of action designed for implementing the ideology in the context of totalitarianism 3 control and freedom as the basic parameters in a decision making process that went along with a diffuse Holocaust phase and generated mechanisms of extensive cooperation 4 the values and norms that made sense to the Nazis in relation to the Holocaust with a critical assessment of Nazi ethics insofar as it aimed at subverting the concept of evil and at destroying the self This book deals with four key dimensions of the Holocaust ideology power act and meaning

Jacques Kriel, 2021-12-06 This book critically assesses the implications of modern medicine's claim to be a natural science Medicine models its scientific and clinical self understanding on an obsolete positivist conception of science reality and consciousness In this view the body is modeled as a biological machine disease as breakdown of the machine and therapy as physical measures to fix the machine The problems besetting medical science and practice are rooted in the inadequacy of the positivist philosophical assumptions regarding the nature of science reality and consciousness To base the diagnostic practices and therapeutic regimes purely on knowledge of physical processes in the human body is in view of this analysis at best grossly inadequate at worst thoroughly dehumanizing Anton van Niekerk Editorial Foreword This means that medicine's clinical method cannot be transformed without transforming the underlying view of science of reality and of the human person The book proposes a broader model of science which overcomes the outdated dichotomy between human and natural sciences Science is viewed as an interdisciplinary exercise generating multiple perspectives The insights of the human sciences are essential for scientific clinical medicine Utilizing evolutionary biology and complexity theory the author proposes an alternative understanding of reality and human consciousness as a basis for a transformed clinical method Reality is a hierarchy of systems of increasing complexity Different levels can be distinguished namely material systems living material systems conscious living material systems and self conscious living material systems Each level represents a new manner of being which requires a different scientific discourse of understanding Using this model of reality the author argues against understanding human consciousness as a byproduct of physical processes in the brain The human person is a self conscious complex psycho somatic system whose well being is conditioned by much more than physical processes

What is the Meaning of Human Life?

Raymond Angelo Belliotti, 2021-08-04. This book examines core concerns of human life. What is the relationship between a meaningful life and theism? Why are some human beings radically adrift without radical foundations and struggling with hopelessness? Is the cosmos meaningless? Is human life akin to the ancient Myth of Sisyphus? What is the role of struggle and suffering in creating meaning? How do we discover or create value? Is happiness overrated as a goal of life? How, if at all, can we learn to die meaningfully?
