Mine Action After Diana Stuart Maslen, 2004 A radical critique of the conventions underlying family law practice

Mine Action After Diana Stuart Maslen, Richard Lloyd, 2004-05-20 In 1997 many countries came together to pledge 500 million over five years to mine action programmes to tackle the destruction caused by landmines Is the world a safer place as a result of the ban Has international mine action been a success What lessons have been learnt along the way What are the challenges for the future In short what is the true extent of Princess Diana's legacy Stuart Maslen assesses the effectiveness of mine awareness mine clearance operations victim assistance international law and stockpile destruction He outlines the global threat that mines present and the evolution of the mine action programme worldwide International Law, Politics, and Inhumane Weapons Alan Bryden, 2013 This book contributes to contemporary debates on the effectiveness of international humanitarian law IHL in regulating or prohibiting inhumane weapons such as landmines Two treaties have emerged under IHL in response to the humanitarian scourge of landmines However despite a considerable body of related literature clear understandings have not been established on the effectiveness of these international legal frameworks in meeting the challenges that prompted their creation This book seeks to address this lacuna An analytical framework grounded in regime theory helps move beyond the limitations in the current literature through a structured focus on principles norms rules procedures actors and issue areas On the one hand this clarifies how political considerations determine opportunities and constraints in designing and implementing IHL regimes On the other it enables us to explore how and why ideal policy prescriptions are threatened when faced with complex challenges in post conflict contexts This book will be of much interest to students of international humanitarian law global governance human security and IR in general

Foreign Aid and Landmine Clearance Matthew Breay Bolton, 2010-01-30 In the decade since the signing of the Ottawa Treaty which banned the production and use of anti personnel mines governments have spent over 3 billion on clearing up and mitigating the security threat of mines cluster munitions and other unexploded ordnance in the world's current and former war zones However this flow of cash into regions dominated by violent social structures raises numerous political issues Through detailed archival and field research this book explores the politics behind the allocation and implementation of foreign aid by the US and Norway for demining in Afghanistan Bosnia and Sudan It is an essential resource for practitioners and policymakers working in the field of landmine clearance and for students and researchers of Development Studies and post war reconstruction Landmine Monitor Report, 2004

Landmines in War and Peace Mike Croll, 2009-04-21 Land mines and their antecedents have been used on the battlefield from ancient times through the world wars to the modern conflicts in the developing world Their use in the developing world caused tens of thousands of civilian casualties and the resulting international outrage transformed rapidly into a highly effective global movement to ban land mines and a multi million dollar mine action business This book describes how technology and military tactics defined

land mine development and deployment why they are such an effective weapon of war and how an unlikely alliance of soldiers peace activists development workers and celebrities succeeded in banning the use of antipersonnel mines Comparisons are made between the post WW2 clearance of around 100 million land mines in Europe and contemporary efforts to clear a similar number in the developing world By 1947 Europe was largely mine free yet after nearly 20 years and expenditure of 4 billion the land mine crisis in the developing world continues The elusive search for the easy way to clear mines is described Despite experiments with machines airships rats and explosive clearance methods mine clearance remains a hazardous labor intensive task undertaken by teams of deminers using metal detectors and needle like probes

[Blinded by Humanity](#) Martin Barber, 2014-10-29 How to respond effectively to humanitarian crises is one of the most pressing and seemingly intractable problems facing the United Nations Martin Barber for many years a senior UN official and with decades of humanitarian experience here argues that the explanation for UN failures or only partial successes lies not with any lack of idealism or good intentions but with the constraints placed on aid workers by ill considered policies and poor practical application officials are blinded by humanity Barber presents an inside story based on personal hands on practical experience in Laos Thailand Afghanistan Bosnia Herzegovina and finally in Abu Dhabi where he advised the UAE government on its aid programme He tells of internal struggles at head office and the challenges of working in the field All the major UN activities and headaches are here including refugee work coordinating humanitarian aid peacekeeping the huge problem of de mining and the complex internal workings of the UN Secretariat A personal narrative and lessons drawn from direct experience provide the frame for an examination of major questions concerning the future of humanitarian response how effectively have international institutions discharged their responsibilities towards people affected by conflict Specifically how did the UN perform And how might the UN better help such people in the 21st century Barber analyses recent policy developments intended to improve the quality and effectiveness of the UN's work in humanitarian fields and assesses the extent to which recent reforms are likely to make the

UN a more effective partner for countries emerging from conflict In the final chapter he highlights seven blind spots whose significance has been consistently ignored or overlooked and in each case suggests a radical new approach Based on decades of personal experience and insider access this will be essential reading for students of international relations and politics as well as for all those directly or indirectly involved with humanitarian issues

Games of Conflict and Cooperation in Asia Motoshi Suzuki, Akira Okada, 2017-02-07 This edited volume is an outcome of the first major collaborative project between Japanese economists and political scientists funded by the Japan Society for the Promotion of Science The authors of the individual chapters show that Asian states play games of conflict and cooperation strategically by creating changing or destroying institutions For them conflict and cooperation are inseparable phenomena and are integral parts of states strategic interactions under constraints Through the establishment of appropriate institutions that coordinate states actions present conflict can be turned into stable cooperation in the future No discernible difference exists in the extent of rationality between the East and the West but substantial variations between regions or even within a region are found in institutions that are influenced by history and culture Historical and cultural variations divide contemporary Asia making regional institutional cooperation difficult and prompting some Asian states to use global or inter regional arrangements in order to obtain benefits of cooperation Qualifications are provided for this line of argument in the first chapter which also discusses the affinity of international relations theory and game theory with special attention to Japan and Asia The following ten substantive chapters are developed based on the conceptual framework and for integrity and coherence are sub grouped into four parts that correspond to major issues in international relations scholarship 1 conflict management 2 arms control 3 trade and 4 currency

The Evolution and Legitimacy of International Security Institutions M. Patrick Cottrell, 2016-04-21 International institutions constitute the basis of global order As they struggle to accommodate shifts in power and emerging threats their legitimacy their political authority and right to govern often comes under fire at times fuelling perceptions of crisis Yet scholars seldom ask why some institutions are replaced while others are not Blending theory with history M Patrick Cottrell examines some of the world's landmark security institutions arguing that the possibility of replacement hinges on the sources of institutional legitimacy and the nature and timing of the challenges to it The analysis not only reveals different pathways to replacement but also offers a window into the future including a potential dark side of too much legitimacy

Indeed as global society becomes ever more dynamic the fault lines of conflict with the most significant implications for order will not occur over territory but rather over the legitimacy of international institutions *Advocacy in Conflict* Alex de Waal, 2015-05-14 Conflicts in Africa Asia and Latin America have become a common focus of advocacy by Western celebrities and NGOs This provocative volume delves into the realities of these efforts which have often involved compromising on integrity in pursuit of profile and influence Examining the methods used by Western advocates how they relate to campaigns in the countries concerned and their impact expert authors evaluate the successes and failures of past advocacy campaigns and offer constructive criticism of current efforts Taking in a range of high profile case studies including campaigns for democracy in Burma and Latin America for the rights of Palestinians in Gaza and opposing the Lord s Resistance Army in Uganda the authors challenge the assumptions set forth by advocacy organizations **Pondering on Problems of Argumentation** Frans H. van Eemeren, Bart Garssen, 2009-02-11 Pondering on Problems of Argumentation is a collection of twenty essays brought together for anyone who is interested in theoretical issues in the study of argumentation This collection of papers gives the reader an insightful and balanced view of the kind of theoretical issues argumentation theorists are currently concerned with Because most of the perspectives on argumentation that are en vogue are represented this volume provides a multidisciplinary and even interdisciplinary outlook on the current state of affairs in argumentation theory Some of the contributions in Pondering on Problems of Argumentation deal with problems of argumentation that have been recognized as theoretical issues for a considerable time like the problems of fallaciousness and identifying argumentation structures Other contributions discuss issues that have become a focus of attention only recently or regained their prominence such as the relationship between dialectic and rhetoric and the strategic use of the argumentative technique of dissociation In five separate sections papers are included dealing with argumentative strategies problems of norms of reasonableness and fallaciousness types of argument and argument schemes the structure of argumentation and rules for advocacy and discussion **Landmine Monitor Report** , 2006 The Power of Legitimacy in Global Collective Action M.
