easy comparison across countries and through time Part One analyzes the most relevant ideas and theories that have been considered as causal variables of economic growth It summarizes these ideas pedagogically and tests them against the historical data The results of such analyses are highly troubling because they reveal an absence of correlation between theory and reality Part Two presents a collection of statistics illustrating the development of the world economy during the last centuries The data was extracted from economic history and economic history books from the publications of the World Bank the Organization for Economic Cooperation and Development the International Monetary Fund the World Trade Organization the United Nations specialized agencies research institutes and country statistical publications and other books and journals Analyzing the data over geography and time Sabillon concludes that contrary to contemporary wisdom left to market forces alone the economy will not and does not flourish The factors that cause growth he says still need to be studied with a fresh eye This orderly and consistent presentation of statistics may be just the tool that helps future economic theorists to identify a reliable path to sustained growth This analysis of the long term historical development of the nations of the world is the culmination of a fourteen year research project funded in part by the Swiss National Fund for Scientific Research the Graduate Institute of International Studies in Geneva Switzerland and by the Geneva Business Institute Carlos Sabillon has an advanced degree from the Institute of International Studies Geneva Switzerland in Economic History His book *Manufacturing Technology and Economic Growth* was published by M E Sharpe Inc 2000

National Security, Democracy, and Good Governance in Postmilitary-Rule Nigeria, Volume Two Dr. Dan Mou, 2017-01-12 This book shows that the security economic political and social problems challenging national security democracy and good governance currently in Nigeria would get better or worse depending on what happens to the 71 percent of Nigerias population still living below the poverty line This is in spite of the billions of petrodollars that Nigeria garnered as revenue over the past few decades It reveals that one does not need to be a political prophet to predict that if these challenges are not successfully addressed through good governance and inclusive growth this country will witness worse civil disobedience violence revolts militancy breakdown of law and order more kidnappings and more of the citizens trying to check out of the country to other parts of the world in the future It concludes however that under such intense pressures the Government of Nigeria even if it is simply for its self preservation will be forced by the objective conditions to move against the interests of the dominant groups and classes in Nigeria These are the ones who have for long captured and hijacked state power and the resources of the country for their exclusive use There is this perception that Nigerians don't write and read This perception is deep seated even among intellectuals who see our authors as shallow researchers But Dr Dan Mou has debunked that myth and shown that Nigerians can write well researched and detailed books It is quite prophetic in its assessment of the Nigerian State Agbo Agbo deputy editor The Nation Dr Dan Mou has proven

himself a world class scholar and an intellectual colossus His reputation as an internationally renowned public policy expert has continued to soar I congratulate him for these remarkable achievements Professor Justice Abdul Fatai Kuti first justice of Abuja High Court and former dean faculty of law University of Ado Ekiti Ekiti State of Nigeria Dr Mou is certainly one of the best scholars we have on the African continent As an educationist myself before I became a traditional ruler I agree totally with his analysis and conclusions I share the optimism Dr Mou has expressed that once the recommendations therein are adopted and meticulously implemented with proper monitoring and evaluation of such resultant policies and programmes Nigeria and indeed Africa would be able to solve most of these challenges HRH Alh Dr Sheban Audu Nizazo III Etsu Kwali Etsu Kwalis Palace Abuja Nigeria The 1995 National Shellfish Register of Classified Growing Waters ,1997
