**The Nation in the Village** ,2004      **The Nation in the Village** Keely Stauter-Halsted,2015-09-25 How do peasants come to think of themselves as members of a nation The widely accepted argument is that national sentiment originates among intellectuals or urban middle classes then trickles down to the working class and peasants Keely Stauter Halsted argues that such models overlook the independent contribution of peasant societies She explores the complex case of the Polish peasants of Austrian Galicia from the 1848 emancipation of the serfs to the eve of the First World War In the years immediately after emancipation Polish speaking peasants were more apt to identify with the Austrian Emperor and the Catholic Church than with their Polish lords or the middle classes of the Galician capital Cracow Yet by the end of the century Polish speaking peasants would cheer Long live Poland and celebrate the centennial of the peasant fueled insurrection in defense of Polish independence The explanation for this shift Stauter Halsted says is the symbiosis that developed between peasant elites and upper class reformers She reconstructs this difficult halting process paying particular attention to public life and conflicts within the rural communities themselves The author s approach is at once comparative and interdisciplinary drawing from literature on national identity formation in Latin America China and Western Europe The Nation in the Village combines anthropology sociology and literary criticism with economic social cultural and political history

**Nature and National Identity After Communism** Katrina Z. S. Schwartz,2006-11-26 In this groundbreaking book Katrina Schwartz examines the intersection of environmental politics globalization and national identity in a small East European country modern day Latvia Based on extensive ethnographic research and lively discourse analysis it explores that country s post Soviet responses to European assistance and political pressure in nature management biodiversity conservation and rural development These responses were shaped by hotly contested notions of national identity articulated as contrasting visions of the ideal rural landscape The players in this story include Latvian farmers and other traditional rural dwellers environmental advocates and professionals with divided attitudes toward new European approaches to sustainable development An entrenched set of forestry and land management practices with roots in the Soviet and pre Soviet eras confront growing international pressures on a small country to conform to current Western notions of environmental responsibility notions often perceived by Latvians to be at odds with local interests While the case is that of Latvia the dynamics Schwartz explores have wide applicability and speak powerfully to broader theoretical discussions about sustainable development social constructions of nature the sources of nationalism and the impacts of globalization and regional integration on the traditional nation state

**Diaspora Nationalism and Jewish Identity in Habsburg Galicia** Joshua Shanes,2012-08-06 The triumph of Zionism has clouded recollection of competing forms of Jewish nationalism vying for power a century ago This study explores alternative ways to construct the modern Jewish nation Jewish nationalism emerges from this book as a Diaspora phenomenon much broader than the Zionist movement Like its non Jewish

counterparts Jewish nationalism was first and foremost a movement to nationalize Jews to construct a modern Jewish nation while simultaneously masking its very modernity Diaspora Nationalism and Jewish Identity in Habsburg Galicia traces this process in what was the second largest Jewish community in Europe Galicia The history of this vital but very much understudied community of Jews fills a critical lacuna in existing scholarship while revisiting the broader question of how Jewish nationalism or indeed any modern nationalism was born Based on a wide variety of sources many newly uncovered this study challenges the still dominant Zionist narrative by demonstrating that Jewish nationalism was a part of the rising nationalist movements in Europe

Displays of Belonging Sarah Ellen Zarrow, 2025-06-15 Displays of Belonging illuminates the lives and work of Polish Jewish collectors and museologists who sought to preserve the treasures of the Jewish past while demonstrating Jewish belonging on Polish soil As Jews comfortable in the Polish language and within Polish artistic and academic society they saw themselves as intermediaries between less integrated Jews and the Polish cultural elite At the turn of the century Jewish ethnographers and museum creators staked their claim to belonging to the civic nation though the display of Jewish folk art fine art and Judaica After the First World War the nearly three million Jews in the Second Polish Republic were suddenly challenged with finding a place for themselves in a state that increasingly defined itself as a creation of the ethnic Polish nation to which Jews by many accounts did not belong By tracing emergent documentation and display practices in partitioned Poland and in the interwar Second Polish Republic Sarah Ellen Zarrow offers a better understanding of how integrated Jews identified with Polish culture and history and with non Jewish Poles and how they conceived of negotiated and argued their collective place within Poland This is not a case of assimilation nor of acculturation but rather of displaying a parallel culture that was at once similar and yet distinctive Displays of Belonging offers a nuanced understanding of the multiplicity of ways in which Jews in Poland saw their present and dreamed of their future It places Jewish ethnographic practice and art collection within a Polish context and sheds light on ways in which ideas about belonging and national identity were negotiated in the space of museums

comparative way However in recent years scholars have demonstrated that social movements rely on collective memories to assert claims mobilize supporters and legitimize their political visions while also helping to further shape collective memories This book delves into the synergies between memory studies and social movements exploring how social movements have been constructing and creating memories of their own activity how specific landscapes of memory have influenced social movements and how activists have used memory as a cultural resource to further their own goals and ambitions The case studies presented cover a range of different types of political activism including the fights for workers gay feminist and pacifist rights as well as ecological urban and far right movements across the globe portraying the diverse interrelations that exist between social movements and collective memory

**Nationalism and Yugoslavia** Pieter Troch, 2015-08-18 Created after World War I Yugoslavia was a combination of ethnically religiously and linguistically diverse but connected South Slav peoples Slovenes Croats and Serbs but also Bosnian Muslims Macedonians and Montenegrins in addition to non Slav minorities The Great Powers and the country's intellectual and political elites believed that a coherent identity could be formed in which the different South Slav groups in the state could identify with a single Balkan Yugoslav identity Pieter Troch draws on previously unpublished sources from the domain of education to show how the state's nationalities policy initially allowed for

a flexible and inclusive Yugoslav nationhood and how that system was slowly replaced with a more domineering and rigid top down nationalism during the dictatorship of King Alexander I who banned political parties and coded a strongly politicised Yugoslav national identity As Yugoslav society became increasingly split between the pro Yugoslav central regime and anti Yugoslav opposition the seeds were sown for the failure of the Yugoslav idea Nationalism and Yugoslavia provides a valuable new insight into the complexities of pre war Yugoslavia

Storm, 2012-10-24 In reaction to the centralizing nation building efforts of states in nineteenth century Europe many regions began to define their own identity In thirteen stimulating essays specialists analyze why regional identities became widely celebrated towards the end of that century and why some considered themselves part of the new national self image

*Creating the Other* Nancy M. Wingfield, 2004-09-01 The

historic myths of a people nation usually play an important role in the creation and consolidation of the basic concepts from which the self image of that nation derives These concepts include not only images of the nation itself but also images of other peoples Although the construction of ethnic stereotypes during the long nineteenth century initially had other functions than simply the homogenization of the particular culture and the exclusion of others from the public sphere the evaluation of peoples according to criteria that included level of civilization yielded rankings of ethnic groups within the Habsburg Monarchy That provided the basis for later more divisive ethnic characterizations of exclusive nationalism as addressed in this volume that examines the roots and results of ethnic nationalist and racial conflict in the region from a variety of historical and theoretical perspectives

**Civil War in Central Europe, 1918-1921** Jochen Böhrer, 2018-11-22 The First World War did not end in Central Europe in November 1918 The armistices marked the creation of the Second Polish Republic and the first shot of the Central European Civil War which raged from 1918 to 1921 The fallen German Russian and Austrian Empires left in their wake lands with peoples of mixed nationalities and ethnicities These lands soon became battle grounds and the ethno political violence that ensued forced those living within them to decide on their national identity Civil War in Central Europe seeks to challenge previous notions that such conflicts which occurred between the First and Second World Wars were isolated incidents and argues that they should be considered as part of a European war a war which transformed Poland into a nation

**Populism in Central and Eastern Europe** Roman Krakovsky, 2025-02-01 The rise of illiberal democracies across Central and Eastern Europe represents an ongoing challenge to the democratic and liberal principles of post Enlightenment societies However considerable debate remains about how to disentangle the complex factors that have contributed to this phenomenon and gain a clearer understanding of the issues shaping the political landscape In this incisive analysis of the populist phenomenon Populism in Central and Eastern Europe re examines the roots of the current political situation tracing the historical evolution of Central and Eastern European populism From late nineteenth century Imperial Russia to Viktor Orb n s Hungary and Jaroslaw Kaczy ski s Poland this book offers an innovative approach to addressing these enduring political issues

*Recovered Territory* Peter Polak-Springer, 2015-10-01 Upper Silesia one of Central Europe s most important industrial borderlands was at the center of heated conflict between Germany and Poland and experienced annexations and border re drawings in 1922 1939 and 1945 This transnational history examines these episodes of territorial re nationalization and their cumulative impacts on the region and nations involved as well as their use by the Nazi and postwar communist regimes to legitimate violent ethnic cleansing In their interaction with and mutual influence on one another political and cultural actors from both nations developed a transnational culture of territorial rivalry Architecture spaces of memory films museums folklore language policy mass rallies and archeological digs were some of the means they used to give the borderland a German Polish face Representative of the wider politics of twentieth century Europe the situation in Upper Silesia played a critical role in the making of history s most violent and

uprooting eras 1939 1950      **Poland** Patrice M. Dabrowski,2014-10-01 Since its beginnings Poland has been a moving target geographically as well as demographically and the very definition of who is a Pole has been in flux In the late medieval and early modern periods the country grew to be the largest in continental Europe only to be later wiped off the map for more than a century The Polish phoenix that rose out of the ashes of World War I was obliterated by the joint Nazi Soviet occupation that began with World War II The postwar entity known as Poland was shaped and controlled by the Soviet Union Yet even under these constraints Poles persisted in their desire to wrest from their oppressors a modicum of national dignity and ultimately managed to achieve much more than that Poland is a sweeping account designed to amplify major figures moments milestones and turning points in Polish history These include important battles and illustrious individuals alliances forged by marriages and choices of religious denomination and meditations on the likes of the Polish battle slogan for our freedom and yours that resounded during the Polish fight for independence in the long 19th century and echoed in the Solidarity period of the late 20th century The experience of oppression helped Poles to endure and surmount various challenges in the 20th century and Poland s demonstration of strength was a model for other peoples seeking to extract themselves from foreign yoke Patrice Dabrowski s work situates Poland and the Poles within a broader European framework that locates this multiethnic and multid denominational region squarely between East and West This illuminating chronicle will appeal to general readers and will be of special interest to those of Polish descent who will appreciate Poland s longstanding republican experiment
