Donovan,2017-05-08 The time has come You are an Earth scientist You've spent weeks months years working on this project now is the time to pull it together for publication You might be writing an undergraduate or graduate thesis a research paper for a leading journal a note for the newsletter of the local amateur scientific society a book review or an abstract for a specialist geological conference How do you make the transition from promising unpublished researcher to established academic author Of course the phrase academic publishing covers a multitude of sins monographs research papers book reviews conference abstracts or whatever each requires a different approach You have to decide what it is you are going to

write and where to publish it There are co authors supervisors of your degree peer reviewers and editors to deal with on the way But the only way to write like an academic is to write like an academic where do you start You could do much worse than start here There are many books on how to write and be published aimed at research students and other aspiring academics Many of these are readable comprehensive and provide good advice This book is composed of numerous short chapters on this subject all directly relevant to one or more aspects of academic publishing and aimed particularly at the Earth scientists in the broadest sense Geologists will be encouraged to use the book as much as a reference as a reader dipping in to the chapters that contain relevant tips hints and comments to enable them to improve the paper that they are currently writing The book is intended to be informative readable and above all of practical application for all readers In summary the volume will be a readable compilation investigating many facets of academic publishing relevant to the Earth sciences It will be of particular interest to postgraduate students postdocs and new academics
