Research Reports - National Geographic Society National Geographic Society (U.S.),1978 Abstracts and reviews of research and exploration authorized under grants from the National Geographic Society **The Kyrenia Ship Final Excavation Report, Volume I** Susan Womer Katzev, Helena Wylde Swiny, 2022-12-01 The Kyrenia Ship a Greek merchantman built around 315 BC which sank off the north coast of Cyprus was excavated between 1968 and 1972 under the direction of Michael L Katzev of the University of Pennsylvania and Oberlin College The importance of this ship lies in the exceptionally well preserved hull that provided new insights into ancient shipbuilding as well as the cargo it carried The hold was stacked with transport amphoras of various types made on Rhodes with a few examples from Samos Kos Knidos and Cyprus supplemented by a consignment of millstones iron billets and almonds The cabin pottery from Rhodes also suggests this was the vessel's home port a conclusion supported by most of the scientific ceramic analyses Its trade route included Rhodes Cyprus and the Levant with perhaps Egypt as a final destination This volume provides a detailed history of the excavation followed by definitive studies of the amphora cargo and the pottery associated with shipboard life Some of the amphora stamps suggest that the ship sank between 294 and 291 BC dates corroborated by the cabin wares The repetition of four drinking cups kantharoi oil containers gutti wine measures olpai as well as bowls and saucers suggests that the ship was sailed by a crew of four Seven bronze coins were recovered five minted in the name of Alexander the Great and one well known type of Ptolemy I produced only on Cyprus **Cordilleran Section of the Geological Society of America** Mason L. Hill, 1987 **Research Reports** National Geographic Society (U.S.), 1985 *The Late Bronze Age and Early Iron Ages of Central Transjordan* Patrick E. McGovern, Robin Brown, 1986 A critical transition period in the archaeology and history of Palestine the Late Bronze Age and Early Iron Age is described in detail from the perspective of a group of sites in the Baq ah Valley A major emphasis is on how scientific techniques including magnetic location of undisturbed burial deposits and analytical reconstruction of very early industries can be effectively integrated into an archaeological project Contrary to traditional views the evidence supports a relatively peaceful development within a single cultural tradition rather than the intrusion of a new people or segment of the existing population by invasion migration or revolt University Museum Monograph 65 **Research in Education** , 1972 **Research Reports** United States. Commission on Population Growth and the American Future, 1972 **Conservation of Marine Archaeological Objects** Colin Pearson, 2014-05-20 Over the past twenty years there has been a significant increase in underwater activities such as scuba diving which coupled with the adventure and romance always associated with shipwrecks has led to rapid developments in the discovery and excavation of shipwrecked material These shipwrecks are invaluable archaeological time capsules which in the majority of cases have come to an equilibrium with their environment As soon as artefacts on the wreck site are moved this equilibrium is disturbed and the artefacts may commence to deteriorate sometimes in a rapid and devastating fashion In fact excavation without

having conservation facilities available is vandalism the artefacts are much safer being left on the sea bed Such famous shipwrecks as the Mary Rose 1545 the Wasa 1628 and the Batabia 1629 have not only brought the world s attention to these unique finds but have also produced tremendous conservation problems The treatment of a 30 metre waterlogged wooden hull or large cast iron cannon is still causing headaches to conservators **Serçe Limani, Vol 2** George F. Bass,Berta Lledo,Sheila Matthews,Robert H. Brill,2009-07-20 For almost a millennium a modest wooden ship lay underwater off the coast of Ser e Limani Turkey filled with evidence of trade and objects of daily life The ship now excavated by the Institute of Nautical Archaeology at Texas A M University trafficked in both the Byzantine and Islamic worlds of its time Known as the Glass Wreck it bore cargo that included three metric tons of glass cullet including broken Islamic vessels and eighty pieces of intact glassware along with various artifacts of ship life This second volume of the discovery s investigation focuses on the excavation conservation and study of the glass found in the wreckage The extensive catalog will be a valuable tool for archaeologists and scholars of Islamic glass and Islamic trade Further the systematic methodology and presentation of such a large undertaking will serve as a model for future study across many disciplines *Research Reports - National Geographic Society* National Geographic Society (U.S.),1968 Abstracts and reviews of research and exploration authorized under grants from the National Geographic Society *Genetic Resources, Chromosome Engineering, and Crop Improvement* Ram J. Singh,2006-11-07 Summarizing landmark research Volume 3 of this essential series furnishes information on the availability of germplasm resources that breeders can exploit for producing high yielding vegetable crop varieties Written by leading international experts this volume offers the most comprehensive and up to date information on employing genetic resource

The Pygmy Hippo Story Phillip T. Robinson,Gabriella L. Flacke,Knut M. Hentschel,2017-03-01 Though the pygmy hippopotamus has been designated as a flagship species of West African forests meaning that by raising conservation efforts for a single species an entire ecological region could benefit very little research has been published on the animal They are solitary nocturnal and highly evasive and until recent developments in camera trap technology they were considered the least photographed large mammal species in the world The information currently available on this endangered species is scattered limited redundant and often inaccurate and no major volume exists as a resource for those interested in the conservation effort for the species until now Phillip Robinson and his coauthors provide a treatment of the natural history biology and ecology of the pygmy hippo along with a discussion of the rare animal s taxonomic niche and a summary of the research initiatives involving it up to this point The authors show the ways in which the pygmy hippo has come into contact with people in West African countries both in terms of ecological and cultural impact This creature has been the subject of local folktales and is treated as almost mythic in some regions Information on issues related to captivity breeding and zoos is provided The book is heavily illustrated with original photographs and anatomic drawings The project should be of use to conservation biologists zoologists and natural history readers and will be the definitive single volume account of an animal

that the scientific community has designated to be ecologically significant to West Africa **Resources in Education** ,1992
 Serves as an index to Eric reports microform **The Straits from Troy to Constantinople** John D. Grainger,2022-01-31 In
 ancient times the series of waterways now known as the Turkish Straits comprising the Dardanelles or Hellespont Sea of
 Marmara and the Bosphorus formed both a divide and a bridge between Europe and Asia Its western and eastern entrances
 were guarded at different times by two of the most fabled cities of all time respectively Troy in Asia and Byzantion or
 Byzantium on the European coast The narrow crossing points at the Hellespont and Bosphorus were strategically important
 invasion routes while the waters themselves were vital routes of travel and commerce particularly the supply of grain from
 the hinterland of the Black Sea to the Greek cities This made them sought after prizes and sources of friction between
 successive empires Persians Macedonians and Romans among them and ensured they were associated with some of the great
 names of history from Odysseus to Xerxes Alexander to Constantine the Great John D Grainger relates the fascinating history
 of this pivotal region from the Trojan War to Byzantion s refounding as the new capital of the Roman Empire Renamed
 Constantinople it dominated the straits for a thousand years *Social Security Bulletin* ,1972 **Serçe Limani** George F.
 Bass,Sheila Matthews,J. Richard Steffy,Frederick H. van Doorninck,2004-08-16 For almost a millennium a modest wooden
 ship lay underwater off the coast of Ser e Limani Turkey filled with evidence of trade and objects of daily life The ship now
 excavated by the Institute of Nautical Archaeology at Texas A M University trafficked in both the Byzantine and Islamic
 worlds of its time The ship is known as the Glass Wreck because its cargo included three metric tons of glass cullet including
 broken Islamic vessels and eighty pieces of intact glassware In addition it held glazed Islamic bowls red ware cooking vessels
 copper cauldrons and buckets wine amphoras weapons tools jewelry fishing gear remnants of meals coins scales and weights
 and more This first volume of the complete site report introduces the discovery the methods of its excavation and the
 conservation of its artifacts Chapters cover the details of the ship its contents the probable personal possessions of the crew
 and the picture of daily shipboard life that can be drawn from the discoveries Mammals of Africa Jonathan Kingdon,David
