Global Capital and National Governments Layna Mosley, 2003-02-03 *Global Capital and National Governments* suggests that international financial integration does not mean the end of social democratic welfare policies Capital market openness allows participants to react swiftly and severely to government policy but in the developed world capital market participants consider only a few government policies when making decisions Governments that conform to capital market pressures in macroeconomic areas remain relatively unconstrained in supply side and micro economic policy areas Therefore despite financial globalization cross national policy divergence among advanced democracies remains likely Still in the developing world the influence of financial markets on government policy autonomy is more pronounced The risk of default renders market participants willing to consider a range of government policies in investment decisions This inference however must be tempered with awareness that governments retain choice As evidence for its conclusions *Global Capital and National Governments* draws on interviews with fund managers quantitative analyses and archival investment banking materials

Global Corporations and National Governments Edward Graham, 1996-06-01 There is inherent tension between the increasingly global focus of foreign investors and the continuing national focus of governments Countries particularly developing ones compete to attract investment from global corporations and they attach performance requirements to tilt the impact of those investments in their favor This is because the host nations expect investment to raise growth levels efficiency and living standards At the same time the home countries of such corporations worry that their firms are not accorded fair and reciprocal treatment abroad These issues have become a source of conflict among nations one that could escalate considerably if an agreement is not soon reached Graham s study analyzes the nature and depth of the international investment problem and its potential impact on the world economy and on economic relations among nations He urges that current rules on foreign direct investment be enlarged and restructured via new international rules and institutional arrangements and offers two alternatives for doing so

provides thorough grounding in economic and international business theory complemented by cases examples and IB insights from a diverse range of companies and cultures *The Power of Cities in International Relations* Simon Curtis, 2014-04-16

Cities have become increasingly important to global politics but have largely occupied a peripheral place in the academic study of International Relations IR This is a notable oversight for the discipline although one which may be explained by IR's traditional state centrism the subjugation of the city to the demands of the territorial state in the modern period and a lack of conceptual and analytical frameworks that can allow scholars to include the impact of cities within their work Presenting case specific scholarship from leading experts in the field each contribution guides the reader through the changing nature of cities in the international system and their increasing prominence in global governance outcomes The book features case studies on the financial power of cities city action in the security domain collaboration of cities in coping with environmental problems transnational urban regions and mayors as international actors to illustrate if the relationship between the city and the state has changed in profound ways and how cities are empowered by structural changes in world politics The multidisciplinary and global focus in *The Power of Cities in International Relations* sheds much needed light on the significance of the reemergence of cities from the long shadow of the nation state Only by examining the mechanisms that have empowered cities in the last few decades can we understand their new functions and capabilities in global politics
