comprehensive theoretical framework for understanding the success and failure of international engagement that offers a new understanding of the extent to which international responses may or may not be helpful Through an analysis of over 500 closed source documents and about 70 interviews the efforts of pan European international organizations with mandates from the OSCE EU UN and NATO are examined on both political and cultural levels This work s innovative analyses of those institutions performances shows how successes have often been overlooked and identifies misperceptions that reshape our understanding of the limitations to imagining peace
