National Civic Review, No. 2, Summer 2005 National Civic Review, 2005-06-23 **Reinventing Los Angeles** Robert Gottlieb, 2007-10-12 Describes how water politics cars and freeways and immigration and globalization have shaped Los Angeles and how innovative social movements are working to make a more livable and sustainable city Los Angeles the place without a sense of place famous for sprawl and overdevelopment and defined by its car clogged freeways might seem inhospitable to ideas about connecting with nature and community But in *Reinventing Los Angeles* educator and activist Robert Gottlieb describes how imaginative and innovative social movements have coalesced around the issues of water development cars and freeways and land use to create a more livable and sustainable city Gottlieb traces the emergence of Los Angeles as a global city in the twentieth century and describes its continuing evolution today He examines the powerful influences of immigration and economic globalization as they intersect with changes in the politics of water transportation and land use and illustrates each of these core concerns with an account of grass roots and activist responses efforts to reenvision the concrete bound fenced off Los Angeles River as a natural resource Arroyofest the closing of the Pasadena Freeway for a Sunday of walking and bike riding and immigrants initiatives to create urban gardens and connect with their countries of origin *Reinventing Los Angeles* is a unique blend of personal narrative Gottlieb himself participated in several of the grass roots actions described in the book and historical and theoretical discussion It provides a road map for a new environmentalism of everyday life demonstrating the opportunities for renewal in a global city *The PerformanceStat Potential* Robert D. Behn, 2014-06-24 It started two decades ago with CompStat in the New York City Police Department and quickly jumped to police agencies across the U S and other nations It was adapted by Baltimore which created CitiStat the first application of this leadership strategy to an entire jurisdiction Today governments at all levels employ PerformanceStat a focused effort by public executives to exploit the power of purpose and motivation responsibility and discretion data and meetings analysis and learning feedback and follow up all to improve government s performance Here Harvard leadership and management guru Robert Behn analyzes the leadership behaviors at the core of PerformanceStat to identify how they work to produce results He examines how the leaders of a variety of public organizations employ the strategy the way the Los Angeles County Department of Public Social Services uses its DPSSTATS to promote economic independence how the City of New Orleans uses its BlightStat to eradicate blight in city neighborhoods and what the Federal Emergency Management Agency does with its FEMASStat to ensure that the lessons from each crisis response recovery and mitigation are applied in the future How best to harness the strategy s full capacity *The PerformanceStat Potential* explains all

Communication and Conflict Transformation through Local, Regional, and Global Engagement Peter M. Kellett, Thomas G. Matyók, 2016-12-13 Central to a transformational approach to conflict is the idea that conflicts must be viewed as embedded within broader relational patterns and social and discursive structures and must be addressed as such

This implies the need for systemic change at generative levels in order to create genuine transformation at the level of particular conflicts Central also to this book is the idea that the origins of transformation can be momentary or situational small scale or micro level as well as bigger and more systemic or macro level Micro level changes involve shifts and meaningful changes in communication and related patterns that are created in communication between people Such transformative changes can radiate out into more systemic levels and systemic transformative changes can radiate inwards to more micro levels This book engages this transformative framework Within this framework this book pulls together current work that epitomizes and highlights the contribution of communication scholarship and communication centered approaches to conflict transformation in local community regional environmental and global conflicts in various parts of the world The resulting volume presents an engaging mix of scholarly chapters think pieces and experiences from the field of practice The book embraces a wide variety of theoretical and methodological approaches as well as transformative techniques and processes including narrative dialogic critical cultural linguistic conversation analytic discourse analytic and rhetorical This book makes a valuable contribution to the ongoing dialogue across and between disciplines and people on how to transform conflicts creatively sustainably and ethically

Capitalizing on Environmental Injustice Daniel Faber, 2008-07-17 Capitalizing on Environmental Injustice provides a comprehensive overview of the achievements and challenges confronting the environmental justice movement Pressured by increased international competition and the demand for higher profits industrial and political leaders are working to weaken many of America's most essential environmental occupational and consumer protection laws In addition corporate led globalization exports many ecological hazards abroad The result is a deepening of the ecological crisis in both the United States and the Global South However not all people are impacted equally In this process of capital restructuring it is the most marginalized segments of society poor people of color and the working class that suffer the greatest force of corporate environmental abuses Daniel Faber a leading environmental sociologist analyzes the global political and economic forces that create these environmental injustices With a multi disciplinary approach Faber presents both broad overviews and powerful insider case studies examining the connections between many different struggles for change Capitalizing on Environmental Injustice explores compelling movements to challenge the polluter industrial complex and bring about meaningful social transformation

The Education Mayor Kenneth K. Wong, Francis X. Shen, Dorothea Anagnostopoulos, Stacey Rutledge, 2007-10-22 In 2002 the No Child Left Behind Act rocked America's schools with new initiatives for results based accountability But years before NCLB was signed a new movement was already under way by mayors to take control of city schools from school boards and integrate the management of public education with the overall governing of the city The Education Mayor is a critical look at mayoral control of urban school districts beginning with Boston's schools in 1992 and examining more than 100 school districts in 40 states The authors seek to answer four central questions What does school governance look like under mayoral leadership

How does mayoral control affect school and student performance What are the key factors for success or failure of integrated governance How does mayoral control effect practical changes in schools and classrooms The results of their examination indicate that although mayoral control of schools may not be appropriate for every district it can successfully emphasize accountability across the education system providing more leverage for each school district to strengthen its educational infrastructure and improve student performance Based on extensive quantitative data as well as case studies this analytical study provides a balanced look at America s education reform As the first multidistrict empirical examination and most comprehensive overall evaluation of mayoral school reform The Education Mayor is a must read for academics policymakers educational administrators and civic and political leaders concerned about public education [The Change Handbook \(Volume 1 of 2\) \(EasyRead Edition\)](#) , **Civil Society and the Reform of Finance** Charles McDaniel, Jr.,2015-07-16 Efforts to resolve the recent financial crisis have obscured a more deeply rooted financialization crisis that impacts not only the market economy but also the vital civic and moral traditions that support it This book reveals the cultural influence of finance in reshaping the foundations of American civil society and proposes a return to certain first principles of the Republic to restore the nation s economic vision This book demonstrates how funding concerns and financial incentives revalue faith traditions educational institutions non profit organizations and even the nation s healthcare system in ways that are eroding the diversity of American culture These changes also undermine the ethical framework of both democratic government and the free market system While financial influence has diminished the value of civil society this book proposes that revitalized intermediary institutions still offer the best path forward in restoring the financial sector and more broadly enriching the American competitive ethic toward development of a more virtuous economy The book is written for an academic and professional audience offering a blueprint for the involvement of civil society with government in providing more communally integrated oversight that could contribute to a genuine democratization of finance **Urban Politics** Bernard H. Ross,Myron A. Levine,2011-08-10 This popular text mixes the best classic theory and research on urban politics with the most recent developments in urban and metropolitan affairs Its very balanced and realistic approach helps students to understand the nature of urban politics and the difficulty of finding effective solutions in a suburban and global age The eighth edition provides a comprehensive review and analysis of urban policy under the Obama administration and brand new coverage of sustainable urban development A new chapter on globalization and its impact on cities brings the history of urban development up to date and a focus on the politics of local economic development underscores how questions of economic development have come to dominate the local arena The book traces the changing style of community participation including the emergence of CDCs BIDs and other new style service organizations It analyzes the impacts of the New Regionalism the New Urbanism and much more at an approachable level The eighth edition is significantly shorter and more affordable than previous editions and the entire text has been thoroughly rewritten to engage students Boxed case studies of

prominent recent and current urban development efforts provide material for class discussion and concluding material demonstrates the tradeoff between more ideal and more pragmatic urban politics Source material provides Internet addresses for further research

The Change Handbook Peggy Holman, Tom Devane, Steven Cady, 2007-01-04 The Change Handbook features chapters by the originators and foremost practitioners of such high leverage change methods as Future Search Real Time Strategic Change Gemba Kaizen and Open Space Technology The authors outline distinctive aspects of their approach detail roles and responsibilities share a story illustrating usage and answer frequently asked questions about how to put it into practice Examples of successful change efforts acquaint readers with the diverse array of methods being employed today A one stop comparative chart allows them to evaluate the methods to determine what will work best for them and an in depth reference section helps them locate the resources they need to get started

The Change Handbook (Volume 1 of 3) (EasyRead Comfort Edition), Contemporary American Federalism Joseph F. Zimmerman, 2009-07-01 Traces the development of the American federal system of government focusing principally on the shifting balance of powers between the national government and the states

No More States? Richard N. Rosecrance, Arthur A. Stein, 2006-08-04 The twentieth century witnessed an explosion of new nations carved out of existing ramshackle empires and multiethnic states Many observers contend that the creation of new states will continue indefinitely with the two hundred of today becoming the four hundred of tomorrow as more groups seek independence This provocative and compelling book explores the impact of globalization and terrorism on this trend arguing convincingly that the era of national self determination has finally come to an end Examining the forces that determine the emergence of new nation states the distinguished contributors consider a rich array of specific cases from the Middle East Asia North America Europe and Russia where new states could be created They contend that globalization rather than expanding such opportunities is not as friendly to new weak states with limited resources as it is to established rich nations Given the vast sums circulating in the world market few fledgling nations can be financially independent They find it more prudent to shelter within the protective embrace of existing federations Equally governments of federal states can induce restive petitioners_ such as Quebec Scotland and the Basques _to remain inside the metropolitan boundary through a system of tangible restraints and rewards Those who reject the benefits such as rebels in Chechnya and Aceh will fail in their bids for independence Taiwan _poised on a knife edge between integration with China and independence _faces a series of costs and diminished returns if it seeks full statehood Finally terrorism has lost its legitimacy as a technique for gaining independence in the eyes of the international community Despite the stall in new state formation there has been no sign of successful military or imperial expansion by established countries toward consolidation into fewer larger national units Neither aggression by regional states _such as the Iraq invasion of Kuwait in 1990 nor intervention _such as the U S occupation of Iraq in 2003 are likely to succeed On balance the book concludes discontented national movements will have to find ways to exist within current geopolitical boundaries

Commonsense Anticommunism Jennifer Luff, 2012-05-21 Between the Great War and Pearl Harbor conservative labor leaders declared themselves America's first line of defense against Communism In this surprising account Jennifer Luff shows how the American Federation of Labor fanned popular anticommunism but defended Communists civil liberties in the aftermath of the 1919 Red Scare The AFL's commonsense anticommunism she argues steered a middle course between the American Legion and the ACLU helping to check campaigns for federal sedition laws But in the 1930s frustration with the New Deal order led labor conservatives to red bait the Roosevelt administration and liberal unionists and abandon their reluctant civil libertarianism for red scare politics That frustration contributed to the legal architecture of federal anticommunism that culminated with the McCarthyist fervor of the 1950s Relying on untapped archival sources Luff reveals how labor conservatives and the emerging civil liberties movement debated the proper role of the state in policing radicals and grappled with the challenges to the existing political order posed by Communist organizers Surprising conclusions about familiar figures like J Edgar Hoover and unfamiliar episodes like a German plot to disrupt American munitions manufacture make Luff's story a fresh retelling of the interwar years

The Change Handbook (Volume 1 of 4) (EasyRead Super Large 20pt Edition) , Democracy in Motion Tina Nabatchi, John Gastil, G. Michael Weiksner, Matt

Leighninger, 2012-11-01 Although the field of deliberative civic engagement is growing rapidly around the world our knowledge and understanding of its practice and impacts remain highly fragmented Democracy in Motion represents the first comprehensive attempt to assess the practice and impact of deliberative civic engagement Organized in a series of chapters that address the big questions of deliberative civic engagement it uses theory research and practice from around the world to explore what we know about how we know it and what remains to be understood More than a simple summary of research the book is designed to be accessible and useful to a wide variety of audiences from scholars and practitioners working in numerous disciplines and fields to public officials activists and average citizens who are seeking to utilize deliberative civic engagement in their communities The book significantly enhances current scholarship serving as a guide to existing research and identifying useful future research It also has promise for enhancing practice for example by helping practitioners public officials and others better think through and articulate issues of design and outcomes thus enabling them to garner more support for public deliberation activities In addition by identifying what remains to be learned about public deliberation practitioners and public officials may be inspired to connect with scholars to conduct research and evaluations of their efforts

Slow Democracy Susan Clark, Woden Teachout, 2012 Reconnecting with the sources of decisions that affect us and with the processes of democracy itself is at the heart of 21st century sustainable communities Slow Democracy chronicles the ways in which ordinary people have mobilized to find local solutions to local problems It invites us to bring the advantages of slow to our community decision making Just as slow food encourages chefs and eaters to become more intimately involved with the production of local food slow democracy encourages us to govern ourselves locally with processes that are inclusive

deliberative and citizen powered Susan Clark and Woden Teachout outline the qualities of real local decision making and show us the range of ways that communities are breathing new life into participatory democracy around the country We meet residents who seize back control of their municipal water systems from global corporations parents who find unique solutions to seemingly divisive school redistricting issues and a host of other citizens across the nation who have designed local decision making systems to solve the problems unique to their area in ways that work best for their communities Though rooted in the direct participation that defined our nation s early days slow democracy is not a romantic vision for reigniting the ways of old Rather the strategies outlined here are uniquely suited to 21st century technologies and culture If our future holds an increased focus on local food local energy and local economy then surely we will need to improve our skills at local governance as well

Congress Joseph F. Zimmerman,2010-01-11 Reassessing the relationship between the federal government and the states Congress Facilitator of State Action examines how the U S Congress routinely and necessarily devolves power to the states A host of congressional statutes reveal the ways in which the U S Congress facilitates state action to solve certain problems including the enforcement of respective criminal laws Financial and nonfinancial assistance to the states are elucidated and assessed including technical assistance and the establishment of such programs as the National Driver Register Comprehensive and timely this book illuminates a key dynamic in the country s political system and offers a more complex and accurate theory of federalism Joseph F Zimmerman is Professor of Political Science at the University at Albany State University of New York His many books include Contemporary American Federalism The Growth of National Power Second Edition The Silence of Congress State Taxation of Interstate Commerce and The Government and Politics of New York State Second Edition all published by SUNY Press

The Politics of Local Government Barry E. Truchil,2017-12-20 Combining scholarly literature with elected experience at the local governmental level Barry E Truchil addresses the inner workings and politics of local government in small town and suburban settings in The Politics of Local Government This book explores issues involving development and implementation of budgets regulation and control of development including conversion of open space to housing and business buildings as well as the initiation of progressive changes such as the use of green energy and control of corruption Given the limited available research in this area this book fills a void for scholars in the field undergraduate and graduate students as well as those interested in the politics of local government

The Future of Democracy Peter Levine,2015-01-06 We need young people to be civically engaged in order to define and address public problems Their participation is important for democracy for institutions such as schools and for young people themselves who are more likely to succeed in life if they are engaged in their communities In The Future of Democracy Peter Levine scholar and practitioner sounds the alarm in recent years young Americans have become dangerously less engaged They are tolerant patriotic and idealistic and some have invented such novel and impressive forms of civic engagement as blogs boycott movements and transnational youth networks But most lack the skills and opportunities

they need to participate in politics or address public problems Levine's timely manifesto clearly explains the causes symptoms and repercussions of this damaging trend and most importantly the means whereby America can confront and reverse it Levine demonstrates how to change young people's civic attitudes skills and knowledge and equally importantly to reform our institutions so that civic engagement is rewarding and effective We must both prepare citizens for politics and improve politics for citizens
