National Deconstruction Violence Identity And Justice In Bosnia:

National Deconstruction David Campbell, How did Bosnia once a polity of intersecting and overlapping identities come to be understood as an intractable ethnic problem David Campbell pursues this question and its implications for the politics of community democracy justice and multiculturalism through readings of media and academic representations of the conflict in Bosnia National Deconstruction is a rethinking of the meaning of ethnic nationalist violence and a critique of the impoverished discourse of identity politics that crippled the international response to the Bosnian crisis Rather than assuming the preexistence of an entity called Bosnia Campbell considers the complex array of historical statistical cartographic and other practices through which the definitions of Bosnia have come to be These practices traverse a continuum of political spaces from the bodies of individuals and the corporate body of the former Yugoslavia to the international bodies of the world community Among the book's many original disclosures arrived at through a critical reading of international diplomacy is the shared identity politics of the peacemakers and paramilitaries Equally significant is Campbell's conclusion that the international response to the Bosnian war was hamstrung by the poverty of Western thought on the politics of heterogeneous communities Indeed he contends that Europe and the United States intervened in Bosnia not to save the ideal of multiculturalism abroad but rather to shore up the nationalist imaginary so as to contain the ideal of multiculturalism at home By bringing to the fore the concern with ethics politics and responsibility contained in more traditional accounts of the Bosnian war this book is a major statement on the inherently ethical and political assumptions of deconstructive thought and the reworkings of the politics of community it enables *The formation of Croatian national identity* Alex Bellamy, 2013-07-19 This electronic version has been made available under a Creative Commons BY NC ND open access license This book assesses the formation of Croatian national identity in the 1990s It develops a novel framework calling into question both primordial and modernist approaches to nationalism and national identity before applying that framework to Croatia In doing so the book provides a new way of thinking about how national identity is formed and why it is so important An explanation is given of how Croatian national identity was formed in the abstract via a historical narrative that traces centuries of yearning for a national state The book shows how the government opposition parties dissident intellectuals and diaspora groups offered alternative accounts of this narrative in order to legitimise contemporary political programmes based on different versions of national identity It then looks at how these debates were manifested in social activities as diverse as football religion economics and language This book attempts to make an important contribution to both the way we study nationalism and national identity and our understanding of post Yugoslav politics and society

Ontological Security in International Relations Brent J. Steele, 2008-03-10 The central assertion of this book is that states pursue social actions to serve self identity needs even when these actions compromise their physical existence Three forms of social action sometimes referred to as motives of state behaviour moral humanitarian and honour driven are analyzed here

through an ontological security approach Brent J Steele develops an account of social action which interprets these behaviours as fulfilling a nation state's drive to secure self identity through time The anxiety which consumes all social agents motivates them to secure their sense of being and thus he posits that transformational possibilities exist in the Self of a nation state The volume consequently both challenges and complements realist liberal constructivist and post structural accounts to international politics Using ontological security to interpret three cases British neutrality during the American Civil War 1861-1865 Belgium's decision to fight Germany in 1914 and NATO's 1999 Kosovo intervention the book concludes by discussing the importance for self interrogation in both the study and practice of international relations Ontological Security in International Relations will be of particular interest to students and researchers of international politics international ethics international relations and security studies

Meaning and International Relations Peter Mandaville, Andrew Williams, 2015-04-15 This innovative volume brings together specialists in international relations to tackle a set of difficult questions about what it means to live in a globalized world where the purpose and direction of world politics are no longer clear cut What emerges from these essays is a very clear sense that while we may be living in an era that lacks a single universal purpose ours is still a world replete with meaning The authors in this volume stress the need for a pluralistic conception of meaning in a globalized world and demonstrate how increased communication and interaction in transnational spaces work to produce complex tapestries of culture and politics Meaning and International Relations also makes an original and convincing case for the relevance of hermeneutic approaches to understanding contemporary international relations

Nationalism Philip Spencer, Howard Wollman, 2002-07-09 Spencer and Wollman seek to challenge fixed notions of national identity ethnicity and culture to more fully explore and understand the contemporary complexities of citizenship and the genuine potential for a cosmopolitan democracy

The Balkans and the West Andrew Hammond, 2017-03-02 This collection of essays locates investigates and challenges the manner in which the Balkans and the West have constructed each other since 1945 Scholars from the two sections of the continent explore a wide range of fiction film journalism travel writing and diplomatic records both to analyse Western European balkanism and to study Balkan representations of the West over the last fifty years The first section looks back to the Cold War examining the divergent often favourable images of the Balkans that existed in Western culture as well as the variety of responses that appeared in South East European writings on the West The second section analyses the transitions that took place in representation during the 1990s Here contributors explore both the harsh denigration of the Balkans which came to dominate western discourse after the initial euphoria of 1989 and the emerging tradition of

contesting Western balkanism in South East European cultural production Through this dual emphasis the volume exposes the representational practices that help to maintain a deeply divided Europe and challenges the economic and political injustices that result Despite the rise to prominence of postcolonial theory with its awareness of global inequality the current crises in many parts of South East Europe have received scant attention in literary and cultural studies The Balkans and the West addresses this deficiency Ranging in focus from Serbian cinema to Romanian travel literature from Western economic writings to Yugoslav fiction and from public discourse in Albania to NATO's vast propaganda machine the essays offer wide insight into representation and power in the contemporary European context *Contemporary Security Studies* Alan

The Future of Political Community Gideon Baker,Jens Bartelson,2009-12-04 This book explores the alternative futures of political community and moves beyond the critique of what is wrong with existing state based forms of political community It does so not with the defence of a particular normative model of political community in mind but rather in the quest for new ways of thinking about political community itself Exploring how the political must be rethought in the twenty first century and beyond this book is divided into three parts Part I focuses on the core problem that despite the obvious need to rethink political community beyond the nation state our conceptual language is still thoroughly shaped by modernity its prioritisation of the state and sovereignty and its assumption of unifying progress in history Part II focuses on postmodern political community these chapters take up the calls made above for new thinking about political community that goes beyond modern conceptions Part III turns to the question of the emergence and decline of new forms of political community The purpose of this section is to consider how the transformation of political community occurs in practice and what the primary driver of this change is globally locally and historically This book will be of strong interest to students and scholars of International Relations Political and Social Theory

The Edge of Law Alex Jeffrey,2019-12-19 The Edge of Law explores the spatial implications of establishing a new legal institution in the wake of violent conflict Using the example of the establishment of

the War Crimes Chamber of the Court of Bosnia and Herzegovina Alex Jeffrey argues that legal processes constantly demarcate a line of inclusion and exclusion materially territorially and corporally In contrast to accounts that have focused on the judicial outcomes of these transitional justice efforts *The Edge of Law* draws on long term fieldwork in Bosnia and Herzegovina to focus on the social and political consequences of the trials tracing the fraught mechanisms that have been used by international and local political elites to convey their legitimacy This book will be of interest to socio legal and geographical scholars working in the fields of transitional justice legal systems critical geopolitics and criminology

Critical Theorists and International Relations Jenny Edkins, Nick Vaughan-Williams, 2009-02-10 Covering a broad range of approaches within critical theory including Marxism and post Marxism hermeneutics feminism queer theory deconstruction and psychoanalysis this book provides students with an introduction to 32 key critical theorists whose work has been influential in the field of international relations *Empire in Denial* David Chandler, 2006-07-20 This book argues that state building as it is currently conceived does not work In the 1990s interventionist policies challenged the rights of individual states to self governance Today non western states are more likely to be fettered by international institutions offering programmes of poverty reduction democratisation and good governance States without the right of self government will always lack legitimate authority The international policy agenda focuses on bureaucratic mechanisms which can only institutionalise divisions between the West and the non West and are unable to overcome the social and political divisions of post conflict states Highlighting the dangers of current policy including the redefinition of sovereignty and the subsequent erosion of ties linking power and accountability *The New Bosnian Mosaic* Elissa Helms, 2016-02-17 Since the violent events of the Bosnian war and the revelations of ethnic cleansing that shocked the world in the early 1990s Bosnia has become a metaphor for the new ethnic nationalisms for the transformation of warfare in the post Cold War era and for new forms of peacekeeping and state building This book is unique in offering a re examination of the Bosnian case with a bottom up perspective It gathers together cultural anthropologists and other social scientists to consider the specificities of the Bosnian case However the book also raises broader questions what are the consequences of internecine violence and how should societies attempt to overcome them Are the uncertainties and the transformations of Bosnian post war society due entirely to the war or are they related to wider processes encompassing post communist Europe as a whole And are the difficulties experienced by international state building operations mainly due to distinctive features of the local societies or are they due to the policies promoted by the international community itself *War, Community, and Social Change* Dario Spini, Guy Elchereth, Dinka Corkalo Biruski, 2013-08-13 Collective experiences in the former Yugoslavia documents and analyses how social representations and practices are shaped by collective violence in a context of ethnic discourse What are the effects of violence and what are the effects of collectively experienced victimisation on societal norms attitudes and collective beliefs This volume stresses that mass violence has a de and re structuring role for manifold psychosocial

processes A combined psychosocial approach draws attention to how most people in the former Yugoslavia had to endure and cope with war and dramatic societal changes and how they resisted and overcame ethnic rivalry violence and segregation It is a departure from the mindset that depict most people in the former Yugoslavia as either blind followers of ethnic war entrepreneurs or as intrinsically motivated for violence by deep rooted intra ethnic loyalties and inter ethnic animosities

The Ashgate Research Companion to Ethics and International Relations Patrick Hayden, 2016-04-01 While skepticism about the role of moral considerations in international politics has been influential within the discipline of international relations IR those writing on topics such as war peace rights and trade up until the twentieth century took seriously the importance of ethical values and moral debates The 1990s and 2000s have seen a substantial growth of attention to the ways in which IR conceives and analyzes themes of an ethical nature and how issues problems and policies involving ethics are addressed by a variety of actors within the international system This indispensable research companion widens the perspective from ethics and international relations to ethics in international relations redressing the misperception that ethical concepts principles norms and rules are not in part constitutive of the international system and the agents acting within that system Necessarily cross disciplinary expertise is drawn from IR and also philosophy political theory religious studies history and law making this an ideal volume for any library reference collection

Europe in the World Luiza Bialasiewicz, 2016-04-22 This edited volume provides an innovative contribution to the debate on contemporary European geopolitics by tracing some of the new political geographies and geographical imaginations emergent within and made possible by the EU's actions in the international arena Drawing on case studies that range from the Arctic to East Africa the nine empirical chapters provide a critical geopolitical reading of the ways in which particular places countries and regions are brought into the EU's orbit and the ways in which they are made to work for EU rope The analyses look at how the spaces of EU ropean power and actorness are narrated and created but also at how EU rope s discursive and material strategies of incorporation are differently appropriated by local and regional elites from the southern shores of the Mediterranean to Eastern Europe and the Balkans The question of EU border management is a particularly important concern of several contributions highlighting some of the ways in which the Union's border work is actively re making the European space
