National Gallery Technical Bulletin National Gallery (Great Britain), 2012 Traces of Vermeer Jane Jelley, 2017-07-21 Johannes Vermeer's luminous paintings are loved and admired around the world yet we do not understand how they were made We see sunlit spaces the glimmer of satin silver and linen we see the softness of a hand on a lute string or letter We recognise the distilled impression of a moment of time and we feel it to be real. We might hope for some answers from the experts but they are confounded too Even with the modern technology available they do not know why there is no evidence of any preliminary drawing why there are shifts in focus and why his pictures are unusually blurred Some wonder if he might possibly have used a camera obscura to capture what he saw before him The few traces Vermeer has left behind tell us little there are no letters or diaries and no reports of him at work Jane Jelley has taken a new path in this detective story A painter herself she has worked with the materials of his time the cochineal insect and lapis lazuli the sheep bones soot earth and rust She shows us how painters made their pictures layer by layer she investigates old secrets and hears travellers tales She explores how Vermeer could have used a lens in the creation of his masterpieces. The clues were there all along After all this time now we can unlock the studio door and catch a glimpse of Vermeer inside painting light Handheld XRF for Art and Archaeology Aaron N. Shugar, Jennifer L. Mass, 2012 This volume focuses specifically on the applications possibilities and limitations of handheld X ray fluorescence devices in art conservation and archaeology **Colour in Painting: materials** and spirituality Dianora Della Torre Arrigoni, 2015-10-16 What has colour been created with And which meanings has it assumed through the time and for the many different artistic movements Questions which may spontaneously arise in many people while observing a painting questions however which do not easily find an answer in the traditional texts of the history of art promted by the same curiosity the author has tried to share with all those who have asked themselves the same questions the results of her studies and her passionate researches through easy reading that is suitable for anyone who wants to know more about both the material and the spiritual aspect of colour in painting art The National Gallery **Chemicals and Methods for Conservation and Restoration** Johannes **Review** National Gallery (Great Britain),2003 Karl Fink, 2017-06-15 Before the 1970s most information concerning the conservation and restoration of paintings wood and archaeological artefacts were focused on the history of the artefacts previous attempts of conservation and the future use of these artefacts The technical methods of how the restoration and conservation were made were dealt with only very briefly Today sophisticated methods of scientific analysis such as DNA are common place and this encourages conservators and scientists to work together to work out the development of new methods for analysis and conservation of artefacts This book focuses on the chemicals used for conservation and restoration of various artefacts in artwork and archaeology as well as special applications of these materials Also the methods used both methods for cleaning conservation and restoration as well as methods for the analysis of the state of the respective artefacts Topics include oil paintings paper conservation textiles and

dyes for them archaeological wood fossils stones metals and metallic coins and glasses including church windows Durer to Veronese Jill Dunkerton, Susan Foister, Nicholas Penny, 2002-01-01 The authors look closely at a variety of types of painting including large altarpieces small domestic devotional images diplomatic gifts furniture decorations and both intimate and full length portraits as well as frescoes drawings and prints They provide insights into the meanings of individual pictures and into the purposes they were originally intended to serve and they explore the social position of the "Art, Technology and Nature " Camilla Skovbjerg Paldam, 2017-07-05 Since 1900 the connections between art and technology with nature have become increasingly inextricable Through a selection of innovative readings by international scholars this book presents the first investigation of the intersections between art technology and nature in post medieval times Transdisciplinary in approach this volume s 14 essays explore art technology and nature s shifting constellations that are discernible at the micro level and as part of a larger chronological pattern Included are subjects ranging from Renaissance wooden dolls science in the Italian art academies and artisanal epistemologies in the followers of Leonardo to Surrealism and its precursors in Mannerist grotesques and the Wunderkammer eighteenth century plant printing the climate and its artistic presentations from Constable to Olafur Eliasson and the hermeneutics of bioart In their comprehensive introduction editors Camilla Skovbjerg Paldam and Jacob Wamberg trace the Kantian heritage of radically separating art and technology and inserting both at a distance to nature suggesting this was a transient chapter in history Thus they argue the present renegotiation between art technology and nature is reminiscent of the ancient and medieval periods in which art and technology were categorized as aspects of a common area of cultivated products and their methods the Latin ars the Greek techne an area moreover supposed to imitate the creative forces of nature Renewable Resources for Surface Coatings, Inks and Adhesives Rainer Höfer, 2022-11-11 Providing a detailed survey of renewable raw materials for paints inks and glues this book is ideal for researchers and practitioners working in the areas of green chemistry industrial chemistry and sustainability Beginning with a brief history of coatings and adhesives this book walks the reader through the chemistry properties sourcing and processing of a number of renewable raw materials including lipids natural resins proteins and carbohydrates Their use in a range of recent developments and concepts from material protection to decorative paints and coatings adhesives and sealants is highlighted providing the reader with a complete and modern foundation to the field

the basis of scientific studies on the technical execution of paintings works from the Capodimonte Museum Naples are The Geometry of an Art Kirsti Andersen, 2008-11-23 Key Issues ver since the late 1970s when analysed as case studies Pia Holdt a student of mine at the time and Jed Buchwald a colleague normally working in another field made E me aware of how fascinating the history of perspective constructions is I have wanted to know more My studies have resulted in the present book in which I am mainly concerned with describing how the understanding of the geometry behind perspective developed and how and to what extent new insights within the mathematical theory of perspective influenced the way the discipline was presented in textbooks In order to throw light on these aspects of the history of perspective I have chosen to focus upon a number of key questions that I have divided into two groups Questions Concerning the History of Geometrical Perspective How did geometrical constructions of perspective images emerge How were they understood mathematically How did the geometrical constructions give rise to a mathematical theory of perspective How did this theory evolve Inconnection with the last question it is natural to take up the following themes The Renaissance Restored Matthew Hayes, 2021-07-13 This handsomely illustrated volume traces the intersections of art history and paintings restoration in nineteenth century Europe Repairing works of art and writing about them the practices that became art conservation and art history share a common ancestry By the nineteenth century the two fields had become inseparably linked While the art historical scholarship of this period has been widely studied its restoration practices have received less scrutiny until now This book charts the intersections between art history and conservation in the treatment of Italian Renaissance paintings in nineteenth century Europe Initial chapters discuss the restoration of works by Giotto and Titian framed by the contemporary scholarship of art historians such as Jacob Burckhardt G B Cavalcaselle and Joseph Crowe that was redefining the earlier age Subsequent chapters recount how paintings conservation was integrated into museum settings. The narrative uses period texts unpublished archival materials and historical photographs in probing how paintings looked at a time when scholars were writing the foundational texts of art history and how contemporary restorers were negotiating the appearances of these works The book proposes a model for a new conservation history object focused yet enriched by consideration of a wider Artistic Practices and Cultural Transfer in Early Modern Italy Allison Sherman, 2017-07-05 For too long cultural horizon the centre of the Renaissance has been considered to be Rome and the art produced in or inspired by it This collection of essays dedicated to Deborah Howard brings together an impressive group of internationally recognised scholars of art and architecture to showcase both the diversity within and the porosity between the centre and periphery in Renaissance art Without abandoning Rome but together with other centres of art production the essays both shift their focus away from conventional categories and bring together recent trends in Renaissance studies notably a focus on cultural contact material culture and historiography They explore the material mechanisms for the transmission and evolution of ideas artistic training and networks as well as the dynamics of collaboration and exchange between artists theorists and patrons The chapters each with a wealth of groundbreaking research and previously unpublished documentary evidence as well as innovative methodologies reinterpret Italian art relating to canonical sites and artists such as Michelangelo Titian Tintoretto Veronese and Sebastiano del Piombo in addition to showcasing the work of several hitherto neglected architects painters and an Science and Art Antonio Sgamellotti, Brunetto Giovanni Brunetti, Costanza inimitable engineer inventor Miliani, 2020-02-24 Science and art are increasingly interconnected in the activities of the study and conservation of works of art Science plays a key role in cultural heritage from developing new analytical techniques for studying the art to investigating new ways of preserving the materials for the future For example high resolution multispectral examination of paintings allows art historians to view underdrawings barely visible before while the use of non invasive and micro sampling analytical techniques allow scientists to identify pigments and binders that help art conservators in their work It also allows curators to understand more about how the artwork was originally painted Through a series of case studies written by scientists together with art historians archaeologists and conservators Science and Art The Painted Surface demonstrates how the cooperation between science and humanities can lead to an increased understanding of the history of art and to better techniques in conservation The examples used in the book cover paintings from ancient history Renaissance modern and contemporary art belonging to the artistic expressions of world regions from the Far East to America and Europe Topics covered include the study of polychrome surfaces from pre Columbian and medieval manuscripts the revelation of hidden images below the surface of Van Gogh paintings and conservation of acrylic paints in contemporary art Presented in an easily readable form for a large audience the book guides readers into new areas uncovered by the link between science and art The book features contributions from leading institutions across the globe including the Metropolitan Museum of Art New York Art Institute of Chicago Getty Conservation Institute Opificio delle Pietre Dure Firenze National Gallery of London Tate Britain Warsaw Academy of Fine Art and the National Gallery of Denmark as well as a chapter covering the Thangka paintings by Nobel Prize winner Richard Ernst Conservation of Easel Paintings Joyce Hill Stoner, Rebecca Rushfield, 2013-02-15 Conservation of Easel Paintings is the first comprehensive text on the history philosophy and methods of treatment of easel paintings that combines both theory with practice With contributions from an international group of experts and interviews with important artists this volume provides an all encompassing guide to necessary background knowledge in technical art history artists materials scientific methods of examination and documentation with sections that present varying approaches and methods for treatment including consolidation lining cleaning retouching and varnishing The book concludes with a section featuring issues of preventive conservation storage shipping exhibition lighting safety issues and public outreach Conservation of Easel Paintings is a crucial resource in the training of conservation students and will provide generations of practicing paintings conservators and interested art historians curators directors collectors dealers artists and students of art and art history with invaluable information and guidance Rembrandt/not Rembrandt in the

Metropolitan Museum of Art: Paintings, drawings, and prints: art-historical perspectives Hubertus von Sonnenburg, Walter A. Liedtke, Metropolitan Museum of Art (New York, N.Y.), 1995 <u>Unseemly Pictures</u> Helen Pierce, 2008 This engaging book is the first full study of the satirical print in seventeenth century England from the rule of James I to the Regicide It considers graphic satire both as a particular pictorial category within the wider medium of print and as a vehicle for political agitation criticism and debate Helen Pierce demonstrates that graphic satire formed an integral part of a wider culture of political propaganda and critique during this period and she presents many witty and satirical prints in the context of such related media as manuscript verses ballads pamphlets and plays She also challenges the commonly held notion that a visual iconography of politics and satire in England originated during the 1640s tracing the roots of this iconography back into native and European graphic cultures and traditions Published for the Paul Mellon Centre for Studies in British Art

Clyfford Still Susan F. Lake, Barbara A. Ramsay, 2022-04-05 This groundbreaking book provides the first detailed account of the materials and techniques of perhaps the most radical and until now least studied major American Abstract Expressionist Among the most radical of the great American Abstract Expressionist painters Clyfford Still has also long been among the least studied Still severed ties with the commercial art world in the early 1950s and his estate at the time of his death in 1980 comprised some 3 125 artworks including more than 800 paintings that were all but unknown to the art world Susan F Lake and Barbara A Ramsay were granted access to this collection by the estate and by the Clyfford Still Museum in Denver which houses this immense corpus today This volume based on the authors materials research and enriched by their unprecedented access to Still's artworks paints correspondence studio records and personal library provides the first detailed account of his materials working methods and techniques Initial chapters provide an engaging and erudite overview of the artist's life Subsequent chapters trace the development of his visionary style offer in depth materials analysis of selected works from each decade of his career and suggest new approaches to the care and conservation of his paintings There is also a series of technical appendices as well as a full bibliography An Introduction to the Making of Western Art Susan L. Green, 2024-03-29 This book is the first introduction to Western art that not only considers how choice of materials can impact form but also how objects in different media can alter in appearance over time and the role of conservators in the preservation of our cultural heritage The first four chapters cover wall and easel paintings sculpture drawings and prints from the late Middle Ages to the present day They examine with numerous examples how these works have been produced how they might have been transformed and how efforts regarding their preservation can sometimes be misleading or result in controversy The final two chapters look at how photography new techniques and modern materials prompted innovative ways of creating art in the twentieth century and how the rapid expansion of technology in the twenty first century has led to a revolution in how artworks are constructed and seen generating specific challenges for collectors curators and conservators alike This book is primarily directed at undergraduates interested in art history museum studies and
