The East and the Idea of Europe Pekka Korhonen,Katalin Miklóssy,2010-09-13 In this volume the authors examine the mutual relationship of the East and Europe within the Eurasian geopolitical space They investigate how people to the East of Europe understand themselves vis vis Europe how they have processed European influences and how states in the East compete with the West The East is a strong rhetorical metaphor efficiently colouring something as non European or not essentially European Studies in this volume examine the linguistic techniques that are

used in erecting social and political boundaries and how they are eventually demolished The main focus is on turning points of time and transitional periods where the stability of status quo and maintenance of traditional values have been questioned both in history and at present All analysis is strictly based on original language sources which are interpreted with thorough social cultural and historical expertise The main conceptual tool used for analysis is the binarity of boundaries Binarity or the use of boundary creating dichotomies is constantly used in public discussion and political strategies to structure geopolitical space create imperial power plays and competing centre periphery formations The empirically strong social and cultural expertise of the authors and their multidisciplinary use of geopolitical theory in conjunction with new linguistically inspired analytical tools create a highly original perspective on the Eurasian political space The book is a significant contribution to studies on Europe and its neighbourhood

The Unknown Europe James R. Payton Jr., 2021-11-03 The fascinating history of Eastern Europe includes highs of soaring cultural achievement and lows of almost unimaginable repression But we in the West don't know much about Eastern Europe or its history this book helps us see why We got interested when the region became a threat during the Cold War but what we learned focused on the Communist period after World War II not Eastern Europe itself or its deep history a history that continues to live in the hearts of its peoples James Payton offers an accessible treatment of the history of the region an opportunity to learn about Eastern Europeans as they are He overviews that story from pre history to the present examining eleven turning points that profoundly shaped Eastern European history His treatment considers the backgrounds to the turning points the events and the long lasting impacts they had for the various Eastern European nations This helps us

understand how Eastern Europeans themselves see their history the long haul over the centuries with the influence and impact of events of the sometimes distant past shaping how they see themselves their neighbors and their place in the world

Ideologies of Eastness in Central and Eastern Europe Tomasz Zarycki, 2014-03-21 This book explores how the countries of Eastern Europe which were formerly part of the Soviet bloc have since the end of communist rule developed a new ideology of their place in the world Drawing on post colonial theory and on identity discourses in the writings of local intelligentsia figures the book shows how people in these countries no longer think of themselves as part of the east and how they have invented new stereotypes of the countries to the east of them such as Ukraine and Belarus to which they see themselves as superior The book demonstrates how there are a whole range of ideologies of eastness how these have changed over time and how such ideologies impact in a practical way relations with countries further east

The National Planning Idea In U.s. Public Policy David E Wilson,2019-07-11 This book explores the eventful but largely forgotten history of national planning efforts in the United States first identifying and comparing five alternative approaches to contemporary national planning then using these approaches to assess the events of 1973 1976 a period when crisis pressures brought a vigorous resurgence of national planning activity and debate Dr Wilson concludes that two new approaches to planning learning adaptive and general systems are increasingly being used in lieu of the long established and less flexible rational and incremental approaches and that these might eventually achieve a beneficial new synthesis in both federal policy practice and social science theory He argues that the twin questions of a planned versus a planning society and of who will plan for whom are inexorably emerging as key issues in U S public policy Along with its companion volume *National Planning in the United States An Annotated Bibliography* also published by Westview this book provides extensive new interdisciplinary research material and integrative perspectives on current planning challenges

The Idea of Europe in British Travel Narratives, 1789-1914 Katarina Gephardt,2016-03-03 The nineteenth century was the heyday of travel with Britons continually reassessing their own culture in relation to not only the colonized but also other Europeans especially the ones that they encountered on the southern and eastern peripheries of the continent Offering illustrative case studies Katarina Gephardt shows how specific rhetorical strategies used in contemporary travel writing produced popular fictional representations of continental Europe in the works of Ann Radcliffe Lord Byron Charles Dickens and Bram Stoker She examines a wide range of autobiographical and fictional travel narratives to demonstrate that the imaginative geographies underpinning British ideas of Europe emerged from the spaces between fact and fiction Adding texture to her study are her analyses of the visual dimensions of cross cultural representation and of the role of evolving technologies in defining a shared

set of rhetorical strategies Gephardt argues that British writers envisioned their country simultaneously as distinct from the Continent and as a part of Europe anticipating the contradictory British discourse around European integration that involves both fear that the European super state will violate British sovereignty and a desire to play a more central role in the European Union

National Pasts in Europe and East Asia Peter W. Preston, 2012-07-26 With the rise of industrial capitalism in Europe and the related imposition of colonial rule in much of East Asia both Europe and East Asia have intertwined histories that continue to shape their political thinking and political decision making The contemporary interactions of the two regions now once again major trading partners will both depend upon and facilitate deeper understandings of their respective sets of national pasts This book compares national pasts as well as the current processes of change taking place in Europe and East Asia including the dynamics of the European Union in Europe and the re emergence of the historical centre of China in East Asia It argues that as the change unfolds in the economic social and political fields the various national pasts embedded with the polities of the two regions will also need to be revisited and reworked This book makes an invaluable contribution to research on comparative politics as well as studies on South East Asia and Europe
