National Minorities And The European Nation States System:

National Minorities and the European Nation-states System Jennifer Jackson Preece, 1998 The collapse of Yugoslavia Czechoslovakia and the Soviet Union has resulted in a proliferation of discontented national minorities Thus the possibility for destabilizing ethnic conflict has become acute National minorities have accordingly emerged as a major focus of international relations in post Cold War Europe Jennifer Jackson Preece's powerful new study offers an innovative analysis of these developments Scrutinizing them within the historical context of changing practices and evolving norms she reveals that the European national minority question is nothing new rather its foundations extend deep into contemporary history Moreover the problem is intrinsically derivative of the nation states system itself a system which potentially intensifies minority disaffection Examining these issues against the backdrop of relevant treaties diplomatic negotiations and international practices Jackson Preece presents the definitive assessment of the fate of national minorities in the European states system National Minorities and the European Nation-states System, 1998 The International Status of National Minorities in the European Nation States System, 1919-1995 Jennifer Ann Jackson Preece, 1996 Ethnic **Diversity and the Nation State** David James Smith, John Hiden, 2012 This book explores a largely forgotten legacy of multicultural political thought and practice from within Eastern Europe and examines its relevance to post Cold War debates on state and nationhood Featuring a Preface by former UK Home Secretary Charles Clarke it weaves theory and practice to challenge established understandings of the nation state Eastern Europe is still too often viewed through the prism of ethnic conflict which overlooks the region s positive contribution to modern debates on the political management of ethno cultural diversity and towards the construction of a united Europe beyond the nation state Based on extensive archival research in Estonia Latvia Germany Russia as well as the League of Nations Archive in Geneva this book explores this neglected multicultural legacy and assesses its significance in the post Cold War era which has seen the reappearance of national cultural autonomy laws in several states of Eastern Europe Ethnic Diversity and the Nation Stateis invaluable reading for students and scholars of political science history sociology and European studies and also for policy makers and others interested in minority rights and ethnic conflict regulation The New Minorities of Europe Michael Johns, 2014-02-27 The New Minorities of Europe Social Cohesion in the European Unionargues that while the EU currently faces economic issues it is pressed with larger questions and potential problems due to the backlash against those who move freely inside the union It uses the intra EU migrants particularly the Polish community who moved post 2004 into Britain and to a lesser extent Ireland as the case through which to examine these issues The book argues that the traditional definitions of minorities and migrants are no longer valid in the EU and we should look at all groups collectively through a continuum of social cohesion based on their ability to access rights The book traces the development of free movement in the EU the movement of the intra EU migrants and the challenges and growing chilly climate they and other non EU immigrants face across Europe The book

concludes with a proposal for the development of a High Commission on Social Cohesion in the European Union similar to the OSCE High Commissioner on National Minorities who could use Quiet Diplomacy to try to work with minority groups in all their forms and the EU member states to address these issues Research Handbook on Minority Politics in the European Union Tove H. The League of Nations

and the Organization of Peace Martyn Housden, 2014-07-22 The League of Nations pre cursor to the United Nations was founded in 1919 as a response to the First World War to ensure collective security and prevent the outbreak of future wars It was set up to facilitate diplomacy in the face of future international conflict but also to work towards eradicating the very causes of war by promoting social and economic justice. The philosophy behind much of the League's fascinating and varied roles was to help create satisfied populations who would reject future threats to the peace of their world In this new volume for Seminar Studies Martyn Housden sets out to balance the League's work in settling disputes international security and disarmament with an analysis of its achievements in social and economic fields He explores the individual contributions of founding members of the League such as Fridtjof Nansen Ludwik Rajchman Rachel Crowdy Robert Cecil and Jan Smuts whose humanitarian work laid the foundations for the later successes of the United Nations in such areas as the welfare of vulnerable people especially prisoners of war and refugees dealing with epidemic diseases and promoting good health anti drugs campaigns Supported by previously unpublished documents and photographs this book illustrates how an understanding of the League of Nations its achievements and its ultimate failure to stop the Second World War is central to our understanding of diplomacy and international relations in the Inter War period **Human Security and the UN** S. Neil MacFarlane, Yuen Foong Khong, 2006-02-13 How did the individual human being become the focus of the contemporary discourse on security What was the role of the United Nations in securing the individual What are the payoffs and costs of this extension of the concept Neil MacFarlane and Yuen Foong Khong tackle these questions by analyzing historical and contemporary debates about what is to be secured From Westphalia through the 19th century the state s claim to be the object of security was sustainable because it offered its subjects some measure of protection The state s ability to provide security for its citizens came under heavy strain in the 20th century as a result of technological strategic and ideological innovations By the end of World War II efforts to reclaim the security rights of individuals gathered pace as seen in the Universal Declaration of Human Rights and a host of United Nations covenants and conventions MacFarlane and Khong highlight the UN s work in promoting human security ideas since the 1940s giving special emphasis to its role in extending the notion of security to include development economic environmental and other issues in the 1990s **Fezzes in the River** Sarah D. Shields, 2011-03-16 Self determination imported into the Middle East on the heels of World War I held out the promise of democratic governance to the former territories of the Ottoman Empire The new states that European Great Powers carved out of the multilingual multiethnic and multireligious empire were expected to adhere to new forms of affiliation that emphasized previously unimportant differences In 1936 the new Republic of Turkey lay claim to Antioch and the Sanjak province of Alexandretta which the French had ruled since 1920 as part of its mandate over Syria Turkey s ambassador made a passionate argument that Alexandretta was a homeland of the Turks a place that was essentially Turkish With France and Turkey unable to reach agreement the League of Nations was called in to broker a compromise consistent

with the spirit of the new democratic impulse one of many disputes that it had to adjudicate as self determination became a rallying cry for peoples who wanted to form new nations around their collective identities Over the next four years Turkey struggled for recognition of its claims to the territory while Turkish authorities competed to win hearts and minds in Alexandretta province In this nuanced narrative Sarah D Shields illuminates how the people of this region about a quarter of a million Arabs Armenians Circassians Kurds and Turks were forced to choose between Turkish and Arab identities In the end Shields shows national identities played no role in the outcome of the dispute What happened on the ground in this contested region was determined by Great Power diplomacy amidst the crisis of European democracy in the late 1930s a story skillfully interwoven with the violent struggles that took place on the streets of the province In the end a new kind of identity politics was unleashed that redefined belonging transformed nationalism and set in motion the process of dysfunctional democracy that continues to plague the Middle East The Global Covenant Robert Jackson, 2003-03-27 The Global Covernant is a ground breaking work by one of the leading scholars in international relations that rejuvenates the classical international society approach and brings it into contact with the new era of world politics It investigates the most important international issues of our time including peace and security war and intervention human rights failed states territories and boundaries and democracy It draws on a family of closely related disciplines diplomatic and military history international legal studies and international political theory It addresses basic methodological questions and presents the elements of a human sciences approach to the study of world politics It contemplates the future of international society in the 21st century The Global Covenant concludes by justifying the pluralist society of sovereign states as one that respects human diversity and upholds human freedom **Cooperation or Conflict?** Carmen Gebhard, 2016-05-13 Following the end of the Second World War the creation of regional organizations in Europe provided niche functions to help ensure regional stability through security and transition Yet as the Cold War ended and the Soviet Union dissolved each of these organizations evolved to have a post Cold War role in the region Since then the level of convergence of norms interests and objectives between these main regional organizations has increased considerably Is there a common agenda in Europe Does Europe still need so many organizational elements to tackle the major challenges This book examines the way the EU NATO OSCE and Council of Europe relate to and interact with each other identifying the areas of positive convergence and divergence as well as areas of negative cooperation and conflict By tracing the institutional development and regional integration in Europe the book questions to what degree do European organizations maintain separate identities and most importantly do these organizations still offer a unique and useful service to regional stability. In developing this argument policy areas analysed include Minority Issues in Europe: Rights, Concepts, Policy Tove H. Malloy, 2013-10-16 Minorities have been part of European history and politics since the middle of the 16th Century often seen as obstacles to state building and later as a threat to nation building Traditional minorities have had to fight their own way to be able to remain in their homelands while

new arrivals have been met with rejection and were expected to return home Minorities are still seen as a threat to peace and security and mostly as outsiders In the early 21st Century of inter connected societies minorities are more than ever an issue often seen as a threat to social cohesion This book provides the advanced student with a multi disciplinary informed perspective on minority history and politics as well as social and cultural issues related to minority identity and minority Managing Diversity through Non-Territorial Autonomy Tove H. Malloy, Alexander Osipov, Balázs existence in Europe Vizi, 2015-07-23 Non territorial autonomy NTA is a statecraft tool that is increasingly gaining importance in societies seeking to accommodate demands by ethno cultural groups for a voice in cultural affairs important to the protection and preservation of their identity such as language education and religion As states recognize the specific rights of identity minorities in multicultural and multi ethnic societies they are faced with a need to improve their diversity management regimes NTA offers policy makers a range of options for institutional design adaptable to specific circumstances and historical legacies It devolves degrees of power through legal frameworks and institutions in specific areas of ethno cultural life while maintaining social unity at the core level of society Throughout Europe and North America NTA exists and is implemented at a state regional and local level Much has been written about the concept of autonomy and its usage as a statecraft tool in states facing regional division but little literature addresses its non territorial institutional and public administration functions This edited volume seeks to fill this gap Managing Diversity through Non Territorial Autonomy Assessing Advantages Deficiencies and Risks carves a space for contextual knowledge production on NTA in law as well as social and political sciences Contextual knowledge involves a description of institutions and their functionality as well as of the institutional and legal frames protecting these What are the institutions bodies and functions that ethno cultural groups can draw on when seeking to have a voice over their own affairs as well as over issues in society related to their identity production How are these entities incorporated and empowered to have a voice What degree of voice do they have and how are they designed to project this voice Thus contextual knowledge also involves critical assessment and risk analysis as well as penetrating insights as to the unintended consequences and hidden agendas that may inform NTA policies This volume is to provide both policy makers and ethno cultural groups with a tool kit that promotes social cohesion while respecting diversity This is the first volume in a series of five which will examine the protection and representation of minorities through non territorial means on the Move A. T. Lane, Elżbieta Stadtmüller, 2005 This collection of essays by a multinational group of authors examines the political social and economic consequences of the most recent enlargement of the European Union It does not confine itself to a discussion of the impact on the new member states but also considers the likely effects of this enlargement on the EU itself These effects include not only the familiar need for new modes of governance but also involve other changes resulting from a process of what has been called mutual learning These essays analyse various aspects of this process starting with the Constitutional Convention Sometimes the focus is on the impact on the new members sometimes on the changes likely to

occur in the EU and its older members as a result of this enlargement The emphasis on change is encapsulated in the book s title Europe on the Move State Identities and the Homogenisation of Peoples Heather Rae,2002-08-15 Why are forced displacement ethnic cleansing and genocide an enduring feature of state systems In this book Heather Rae locates these practices of pathological homogenisation in the processes of state building Political elites have repeatedly used cultural resources to redefine bounded political communities as exclusive moral communities from which outsiders must be expelled Showing that these practices predate the age of nationalism Rae examines cases from both pre nationalist and nationalist eras the expulsion of the Jews from fifteenth century Spain the persecution of the Huguenots under Louis XIV and in the twentieth century the Armenian genocide and ethnic cleansing in former Yugoslavia She argues that those atrocities prompted the development of international norms of legitimate state behaviour that increasingly define sovereignty as conditional Rae concludes by examining two threshold cases the Czech Republic and Macedonia to identify the factors that may inhibit pathological homogenization as a method of state building
