Revenuers and Moonshiners Wilbur R. Miller,2017-11-01 The federal government s attempt to enforce civil rights measures during Reconstruction is usually regarded as a failure Far more successful however was the collection of federal excise taxes on liquor during the same period an effort that secured for the government its single most important source of internal revenue In Revenuers and Moonshiners Wilbur Miller explores the development and professionalization of the federal bureaucracy by examining federal liquor law enforcement in the mountain South after the Civil War He addresses the central questions of the conditions under which unpopular federal laws could be enforced and the ways in which enforcement remained limited The extension of federal taxing power to cover homemade whiskey was fiercely resisted by mountain people who had long relied on distilling to produce an easily transported and readily salable product made from their corn As a result the collection of the tax required the creation of the most extensive civilian law enforcement agency in the nation s history the Bureau of Internal Revenue The bureau both

regulated taxpaying distilleries and combated illicit production This battle against moonshiners Miller argues implemented by the Republican party's vision of a federal authority capable of reaching into the most remote parts of the nation Miller concentrates his analysis on the revenueurs but he nevertheless draws a clear picture of the mountain people who resisted them He dispels traditional views of moonshiners as folk heroes imbued with a stubborn individualism or simple country folk victimized by outside forces beyond their control or understanding Rather Miller shows that the men and sometimes women who made moonshine were members of a complex and changing society that was a product of both traditional aspects of mountain culture and the forces of industrialization that were reshaping their society after the Civil War Originally published in 1991 A UNC Press Enduring Edition UNC Press Enduring Editions use the latest in digital technology to make available again books from our distinguished backlist that were previously out of print These editions are published unaltered from the original and are presented in affordable paperback formats bringing readers both historical and cultural value *National Democratic Reforms in Africa* Said Adejumobi, 2015-12-27 From putative success stories such as Ghana and Rwanda to failed efforts in Zimbabwe and other countries this volume brings together seven incisive case studies from diverse contexts including post war Sierra Leone Uganda and the new nation of South Sudan to distil insights into the troubled progress of reform across the African continent Connected Empires, Connected Worlds Robert S.G. **Modernity's Wager** Adam B. Seligman, 2003-08-03 In this work of social philosophy Adam Seligman evaluates modernity's wager namely the gambit to liberate the modern individual from external social and religious norms by supplanting them with the rational self as its own moral authority The State of Algeria Malika Rebai Maamri, 2015-10-12 Algeria's current politics are influenced by its colonial period under the French to an extent not seen in other North African and Middle Eastern states Indeed Malika Rebai Maamri argues that Algeria's postcolonial history and politics are in fact a series of attempts to come to terms with the dire consequences of this colonial past With over half a century having passed since

independence the country is still struggling to create a unified Algerian identity and any discussion on the concept highlights how all too frequently the concept of identity can serve as a form of exclusion Exploring a wide range of issues in Algerian society such as the political cultural social economic and gender relations Rebai Maamri shows how belonging and citizenship are produced and perceived In doing so she offers in depth analysis of a country which is often side lined in the study of the Middle East and North Africa and yet is a vital component in the search for a post colonial identity and state in the region

*The Moral Economy of the Peasant* James C. Scott, 1977-09-10 James C Scott places the critical problem of the peasant household subsistence at the center of this study The fear of food shortages he argues persuasively explains many otherwise puzzling technical social and moral arrangements in peasant society such as resistance to innovation the desire to own land even at some cost in terms of income relationships with other people and relationships with institutions including the state Once the centrality of the subsistence problem is recognized its effects on notions of economic and political justice can also be seen Scott draws from the history of agrarian society in lower Burma and Vietnam to show how the transformations of the colonial era systematically violated the peasants moral economy and created a situation of potential rebellion and revolution Demonstrating keen insights into the behavior of people in other cultures and a rare ability to generalize soundly from case studies Scott offers a different perspective on peasant behavior that will be of interest particularly to political scientists anthropologists sociologists and Southeast Asianists The book is extraordinarily original and valuable and will have a very broad appeal I think the central thesis is correct and compelling Clifford Geertz In this major work Scott views peasants as political and moral actors defending their values as well as their individual security making his book vital to an understanding of peasant politics Library Journal

The Sociology of Law and the Global Transformation of Democracy Chris Thornhill, 2018-06-21 This book provides a new legal sociological account of contemporary democracy It is based on a revision of standard positions in democratic theory reflecting the impact of global legal norms on the institutions of national states Chris Thornhill argues that the establishment of fully democratic fully inclusive governance systems in national societies was generally impeded by inner societal structural factors and that inclusive patterns of democratic citizenship only evolved on the foundation of global legal norms that were consolidated after 1945 He claims that this process can be best understood through a transposition of key insights of classical legal sociology onto the form of global society Extensive analysis of select case studies in different regions illustrate these claims Thornhill

offers a sociological theory of global law to explain contemporary processes of democratic integration and institutional formation and contemporary constructions of citizenship and political rights This title is also available as Open Access
