## **Nations At War A Scientific Study Of International Conflict:**

**Nations at War** Daniel S. Geller,J. David Singer,1998-02-13 Nations at War provides an explanation of war in international politics grounded on data based empirical research The book classifies and synthesizes the research findings of over 500 quantitative analyses of war at the analytic level of the state dyad region and international system Because wars follow from political decisions two basic decision making models the rational and the non rational are examined in relation to the explanatory framework of the volume In addition case analyses of two wars the Iran Iraq War 1980 and World War I 1914 are provided as demonstrations of scientifically based explanations of historical events The primary structural factors responsible for the onset and seriousness of war are identified and the explanations are developed according to the scientific model of covering laws The conclusion presents a discussion of the potential for probabilistic conditional predictions of conflict within the context of war and peace studies

**Nations at War** Daniel S. Geller,J. David Singer,1998-02-19 Nations at War provides a scientifically derived explanation of war It develops this explanation by reviewing data based studies of international conflict analyzing war from the fifteenth to the twentieth centuries and identifying factors such as geography regimes military capabilities alliances and trade associated with both the onset and destructiveness of these conflicts Two wars the Iran Iraq war of 1980 and World War I are examined in detail in an effort to show how wars begin and sometimes expand to include other states This unique book collates and synthesizes the findings of over five hundred scientific studies of war

**Guide to the Scientific Study of International Processes** Sara McLaughlin Mitchell,Paul F. Diehl,James D. Morrow,2012-07-17 Dedicated to the empirical analysis of data from the world of international relations SSIP scholars tend to focus on interstate conflicts civil wars and conflict management The range of perspectives in this edited volume provide a comprehensive introduction to SSIP theory and methodology Fresh approach traces intellectual development of research approaches rather than merely summarizing results Features original SSIP material not found in other books Includes a number of essays with a broader assessment of SSIP methods ideal for younger scholars interested in the approach Includes recent SSIP analyses exploring issues such as civil wars

*National and International Conflicts, 1945-1995* Frank R. Pfetsch,Christoph Rohloff,2013-10-11 The information flow about crises and conflicts is highly selective the media only focus on a few major conflicts at a time Many conflicts are neglected others soon forgotten after the fighting ends This book fills the gaps and offers a systematic

overview of all crises and conflicts in and among states since 1945 and traces the global trends of conflict development Based on the broad empirical basis of the Conflict Simulation Model KOSIMO Pfetsch and Rohloff use an integrated approach to cover many forms and types of political conflicts both peaceful and violent International Relations and Scientific Progress Patrick James, 2002 International Relations and Scientific Progress contends that a theory focusing on the structure of the international system explains a wider and more interesting range of events in world politics than other theories Such theorizing appears to be out of favor as the result of the apparent failure by structural realism the most prominent system level theory over the last two decades on any number of fronts most notably an inability to anticipate the ending of the Cold War and its aftermath This new book is put forward as the most comprehensive and innovative theoretical work on paradigms in international relations since the publication of Theory of International Politics which created structural realism more than two decades ago With appropriate revisions however structural realist theory can compete effectively and reclaim its primacy The first part of International Relations and Scientific Progress assesses the meaning of progress in the discipline of international relations a process that culminates in the creation of a new concept the scientific research enterprise The second part reviews structural realism within that context and identifies a lack of connection between theory and research that links power based indicators to international conflict crisis and war This part of the book makes the case for an elaboration of structural realism by showing that a system level theory based on structure has great unrealized explanatory potential By comparison the current overwhelmingly research oriented agenda on state dyads imposes severe limitations on understanding that are not currently appreciated Part Three sums up the work and explores new directions most notably as related to empirical testing of an elaborated version of structural realism that focuses on both continuity and change in the international system **International and Regional Security** Benjamin Miller, 2016-11-10 This volume is a collection of the best essays of Professor Benjamin Miller on the subjects of international and regional security The book analyses the interrelationships between international politics and regional and national security with a special focus on the sources of international conflict and collaboration and the causes of war and peace More specifically it explains the sources of intended and unintended great power conflict and collaboration The book also accounts for the sources of regional war and peace by developing the concept of the state to nation balance Thus the volume is able to explain the variations in the outcomes of great power interventions and the differences in the level and type of war and peace in different eras and various parts of the world For example the book's model can account for recent outcomes such as the effects of the 2003 American intervention in Iraq the post 2011 Arab Spring and the conflicts between Russia and Ukraine The book also provides a model for explaining the changes in American grand strategy with a special focus on accounting for the causes of the invasion of Iraq in 2003 Finally the book addresses the debate on the future of war and peace in the 21st century This book will be essential reading for students of international security regional security Middle Eastern politics foreign policy and IR *The Scourge*

of War Paul Diehl, 2010-03-25 J David Singer's legendary Correlates of War project represented the first comprehensive effort by political scientists to gather and analyze empirical data about the causes of war. In doing so, Singer and his colleagues transformed the face of twentieth century political science. Their work provoked some of the most important debates in modern international relations about the rules governing territory, international intervention, and the so-called democratic peace. Editor Paul F. Diehl has now convened some of the world's foremost international conflict analysis specialists to reassess COW's contribution to our understanding of global conflict. Each chapter takes one of COW's pathbreaking ideas and reevaluates it in light of subsequent world events and developments in the field. The result is a critical retrospective that will reintroduce Singer's important and still provocative findings to a new generation of students and specialists. Paul F. Diehl is Professor of Political Science and University Distinguished Scholar at the University of Illinois Urbana-Champaign.

**Handbook of War Studies II** Manus I. Midlarsky, 2000 Essays reflecting the most recent theoretically and empirically oriented research on international warfare *Radical Islam and International Security* Efraim Inbar, Hillel Frisch, 2007-12-12 Radical Islam poses a political challenge in the modern world which is like that of no other radical religious movement. Ideologically, it is perceived by Western policy makers as threatening the liberal democratic ideology by which most states in the West abide, and which most other states rhetorically espouse. This book serves as a welcome addition to the intellectual and policy debate on the nature of the radical Islam phenomenon and how to respond to it. The collection is divided into three parts: the first part seeks to understand the Islamic challenge in broad comparative and historical terms, while the second part deals with specific regional case studies which seek to identify patterns of uniformity and variation in radical Islam across a wide swath of terrain. The third part is policy oriented, suggesting possible responses to the Islamic challenge. The contributors include distinguished researchers from Europe, North America, and the Middle East. This book will be of much interest to students of Islamism, political violence, international security, and Middle Eastern politics. Escalation and Negotiation in International Conflicts I. William Zartman, Guy Faure, Guy Olivier Faure, 2005-12-08 This volume examines the point where the concepts and practices of escalation and negotiation meet. **International Relations - Volume I**

Jarrold Wiener, Robert A. Schrire, 2009-10-30 International Relations is a component of Encyclopedia of Institutional and Infrastructural Resources in the global Encyclopedia of Life Support Systems (EOLSS), which is an integrated compendium of twenty-one Encyclopedias. states monopolized the right to wage war      **Handbook on the Economics of Conflict** Derek L. Braddon, Keith Hartley, 2011-01-01 The Handbook on the Economics of Conflict conveys how economics can contribute to the understanding of conflict in its various dimensions embracing world wars regional conflicts terrorism and the role of peacekeeping in conflict prevention The economics of conflict is a relatively new branch of the discipline of economics Conflict provides opportunities for applying game theory involving strategic behaviour interactions and interdependence between adversaries The Handbook demonstrates that conflict and its prevention is costly it considers new dimensions such as ethnic cleansing destructive power terrorism corruption the impact of new technology peacekeeping the role of economists in defence ministries and the use of private contractors in conflict      **Routledge Handbook of Historical International Relations** Benjamin de Carvalho, Julia Costa Lopez, Halvard Leira, 2021-06-28 This handbook presents a comprehensive concise and accessible overview of the field of Historical International Relations HIR It summarizes and synthesizes existing contributions to the field while presenting central themes approaches and methodologies that have driven the development of HIR providing the reader with a sense of the diversity and research dynamics that are at the heart of this field of study The wide range of topics covered are grouped under the following headings Traditions Demonstrates the wide variety of approaches to HIR Thinking International Relations Historically Different ways of thinking IR historically share some common concerns and areas for further investigation Actors Processes and Institutions Explores the processes actors practices and institutions that constitute the core objects of study of many HIR scholars Situating Historical International Relations Critically reflects about the situatedness of our objects of study Approaches Examines how HIR scholars conduct and reflect about their research often in dialogue with a variety of perspectives from cognate disciplines Summarizing key contributions and trends while also sketching out challenges for future inquiry this is an invaluable resource for students academics and researchers from a range of disciplines particularly International Relations global history political science history sociology anthropology peace studies diplomatic studies security studies international political thought political geography international law      War, the State and International Law in Seventeenth-Century Europe Olaf Asbach, Peter Schröder, 2016-02-17 One of the great paradoxes of post medieval Europe is why instead of bringing peace to a disorganised and violent world modernity instead produced a seemingly endless string of conflicts and social upheavals Why was it that the foundation and institutionalisation of secured peace and the rule of law seemed to go hand in hand with the proliferation of war and the violation of individual and collective rights In order to try to better understand such profound questions this volume explores the history and theories of political thought of international relations in the seventeenth century a period in which many of the defining features and boundaries of modern Europe were fixed and codified With the discovery of the New World and the fundamental impact of the Reformation the complexity of international relations increased considerably Reactions to these upheavals resulted in a range of responses intended to address the contradictions and conflicts of the anarchical society of

states Alongside the emergence of modern international law the equation of international relations with the state of nature and the development of the balance of power diplomatic procedures and commercial customs arose which shaped the emerging and current international system of states Employing a multidisciplinary approach to address these issues this volume brings together political scientists philosophers historians of political thought jurists and scholars of international relations What emerges is a certain tension between the different strands of research which allows for a fruitful new synthesis In this respect the assembled essays in this volume offer a sophisticated and fresh account of the interactions of law conflict and the nation state in an early modern European context
