Native Birds Of Australia:

Bird Minds Gisela Kaplan, 2015-08-03 In her comprehensive and carefully crafted book Gisela Kaplan demonstrates how intelligent and emotional Australian birds can be. She describes complex behaviours such as grieving, deception, problem solving and the use of tools. Many Australian birds cooperate and defend each other and exceptional ones go fishing by throwing breadcrumbs in the water, extract poisonous parts from prey and use tools to crack open eggshells and mussels. The author brings together evidence of many such cognitive abilities suggesting plausible reasons for their appearance in Australian birds. *Bird Minds* is the first attempt to shine a critical and scientific light on the cognitive behaviour of Australian land birds. In this fascinating volume the author also presents recent changes in our understanding of the avian brain and links these to life histories and longevity. Following on from Gisela's well received books on the Australian Magpie and the Tawny Frogmouth as well as two earlier titles on birds, *Bird Minds* contends that the unique and often difficult conditions of Australia's environment have been crucial for the evolution of unusual complexities in avian cognition and behaviour.

Pathology of Australian Native Wildlife brings together in one volume available information on the pathology of Australian native vertebrate wildlife excluding fish. It provides rapid access to documented information on diseases in Australian wildlife domiciled either in Australia or overseas. The book comprises 45 chapters each detailing pathological changes caused by specific pathogens including viruses, bacteria, fungi, protozoa, helminths and ectoparasites and other injurious agents and conditions such as toxins and neoplasia affecting terrestrial and marine mammals, birds, reptiles and amphibians. Although the aim is to describe morphological, gross and microscopic changes, the author also indicates history and clinical signs, thus providing guidance as to which lesions should be specifically searched for and what ancillary testing might be needed to confirm a diagnosis. Illustrated throughout with colour photographs, this will be the essential reference for veterinary pathologists and clinicians as well as wildlife researchers, zoos, wildlife parks, environmentalists, conservationists and students. Awarded a 2010 Whitley Certificate of Commendation for Zoological Resource Aboriginal Peoples and Birds in Australia Philip A.
