Pursuit of Biological Weapons United States. Congress. Senate. Committee on Foreign Relations. Subcommittee on Western Hemisphere, Peace Corps, and Narcotics Affairs, 2002 Latin American Political Yearbook Jr. Breene, 2018-01-16 In the sixth volume of this annual series Robert G Breene provides a comprehensive overview analysis and summary of the political and economic trends and events in Central America MERCOSUR the Andean and Caribbean nations and Mexico Analyzing these developments within the individual nations their respective regions and the world at large this yearbook offers a timely look at the relevant background and information necessary to understand the changing nature of politics in Latin America today A significant development has been the growing nexus of Marxist Leninist and Muslim terrorism Before the turn of the new century portents of this development were discernable in the long terrorist war conducted against the democratic West by those followers of Lenin Stalin and their successors This has now been transformed into a crusade against non Muslim societies The materials included here attest to the fact that the hemispheric left and Cuba were involved in terror long before it suddenly materialized in the United States As this volume records Castro was in Teheran in May 2001 where he pledged that the peoples and governments of Iran and Cuba can bring the U S to its knees Four months later terrorists of the Al Qaeda network destroyed the World Trade Center and struck the Pentagon In replying to this outrage the Bush administration identified an Axis of Evil which did not include either the Cuban or Chinese Communist regimes two original seats of international terror As this volume demonstrates however whether neatly includable in the axis or otherwise Castro and his political allies u Hugo Rafael Chbvez Fryas of Venezuela Lula da Silva of Brazil and others u are closely associated with at least one avowed member state of the Axis In addition to its analysis of these and other new developments the Yearbook continues its invaluable coverage of election results throughout Latin America Brimming with information not readily available through the American media this series is essential reading for political scientists journalists Latin America

Cuba Adolfo Leyva de Varona,2001 Conquering Nature Sergio Diaz-Briquets,2000-03-15 Conquering Nature provides the only book length analysis of the environmental situation in Cuba after four decades of socialist rule based on extensive examination of secondary sources informed by the study of development and environmental trends in former socialist countries as well as in the developing world It approaches the issue comprehensively and from interdisciplinary comparative and historical perspectives Based on the Cuban example Diaz Briquets and Perez Lopez challenge the concept that environmental disruption was not supposed to occur under socialism since it was alleged that guided by scientific policies socialism could only beget environmentally benign economic development In reality the socialist environmental record proved to be far different from the utopian view Between the early 1960s and the late 1980s the environmental situation worsened despite Cuba's achieving one of the lowest population growth rates in the world and having eliminated extreme living standard differentials in rural areas two of the primary reasons often blamed for environmental deterioration in developing countries The government's approach was to conquer nature and under its central planning approach it did not take local circumstances into consideration This disregard for the environmental consequences of development projects continues to this day despite official allegations to the contrary as the country pursues an economic survival strategy based on the crash development of the tourist sector and exploitation of natural resources An underlying conclusion of the book is that the environmental legacy of socialism will present serious challenges to future Cuban generations Conquering Nature provides for the first time a relevant analysis of socialist environmental policies of a developing country It will be of interest to students and scholars of Cuba and those interested in environmental issues in developing countries

Environmental Issues in Latin America and the Caribbean Romero Aldemaro,Sarah E.
