insights Beckett and Nature takes its cue from contemporary developments in Beckett scholarship focused on ecocriticism posthumanism and the Anthropocene going beyond them into a questioning of the very concepts of Nature and the natural It examines one of the most unthought ontological dimensions of literature and life that symbolic space deemed natural or part of Nature appears necessary and undeniable and therefore impossible to be deconstructed In doing so the authors show that in fact this space takes on many shapes recognizing three natural dimensions criticized by Beckett bodies worlds and literatures Featuring a wide range of both Beckett s work and Beckett scholars including Jean Michel Rabat and Stanley E Gontarski Beckett and Nature offers contextualized readings of the understandings of nature and the natural throughout his decade spanning uvre The volume shows that part of the radicality of Beckett s writing is that through a variety of evolving techniques and strategies it questions what appears in our cultures as the most unquestionable and opens up possibilities for thinking not only what is human literature and philosophy but also gender identity and any attempt at definitions of ourselves or the world at large

Chinese Environmental Aesthetics Gerald Cipriani,2015-05-15 China is currently afflicted by enormous environmental problems This book drawing on ancient and modern Chinese environmental thinking considers what it is that makes an environment a desirable place for living The book emphasises ideas of beauty and discusses how these ideas can be applied in natural agricultural and urban environments in order to produce desirable environments The book argues that environment is both a product of nature and of human beings and as such is potentially alterable by culture The book explores the three aspects of environmental beauty whereby such alteration might be beneficially made integrated and holistic ecological and man made and authentic and everyday This book addresses environmental issues by distinctively suggesting that an aesthetic approach inspired from ancient Chinese tradition could help us overcome the many problems that human beings have created at local and global levels Although its main focus is the traditional and current contexts of the People's Republic of China the book transcends national borders A typical example is the ancient Chinese thought system and cultural practice of Feng Shui that sought to negotiate how the natural environment and human constructions can cohabit without destructing each other The author evokes that sought after harmony through the powerful image of gardens of life whose environmental beauty can be found in traditional Chinese gardens and palaces as well as historically and culturally preserved cities

Seeing and Being Seen Joshua Coleman,2017-12-16 Contemporary environmental Philosophy has overwhelmingly continued certain materialist assumptions toward nature In its pursuit to better use nature's material offering for future generations there remains little discussion about these materialist assumptions much less their contribution to the current crisis In fact outside the Modern West the vast majority of societies saw nature as bringing more than just material that it brought something more than meets the eye Thus our conceptions of what is actually seen impacts our response to it and before even thinking about that response Along these lines our conceptions of beauty play a large role in how we approach and determine nature's value Such aesthetic assumptions directly impact our desires with regard to nature whether or not we see it as a place of sacred dwelling or merely for surface pleasure and use And again aside from the Modern West nature has been seen as the former naturally causing a sort of reverence which in turns alters our interactions with the natural world as well as with non human animals and other human beings The ability then to see nature as a primary relationship tied to our aesthetic conceptions and presuppositions rather than only a place of use for our own continued biological existence has the potential to impact communal desire with regard to the environment and it is only such a change

in communal desire that will make an effective and lasting impact on the current crisis
