What every woman and girl should know about herself Rod Quentin,1997 The book gives women and girls an abundance of knowledge and understanding about their bodies and sex The monthly menstrual cycle and how a woman can recognise her natural signs that tell her the few days when conception can happen and the numerous days in the month when conception is not possible are explained The book fills the need for better and fuller sex education *Reproductive*

Endocrinology and Infertility Douglas T. Carrell, C. Matthew Peterson, 2010-03-23 Management of the modern reproductive endocrinology and infertility clinic has become very complex. In addition to the medical and scientific aspects, it is crucial that the modern director be aware of incongruent fields such as marketing, accounting, management, and regulatory issues. Reproductive Endocrinology and Infertility: Integrating Modern Clinical and Laboratory Practice was developed to assist the practicing reproductive endocrinologist and/or laboratory director by providing an overview of relevant scientific, medical, and management issues in a single volume. Experts in all pertinent areas present concise, practical, evidence-based summaries of relevant topics, producing a key resource for physicians and scientists engaged in this exciting field of medicine. As novel technologies continue to amplify reproductive endocrinology and infertility, Integrating Modern Clinical and Laboratory Practice offers insight into development and imparts extra confidence to practitioners in handling the many demands presented by their work.

Advances in the Treatment of Sexual Precocity and Infertility Dimitrios T. Papadimitriou, Djuro Macut, George Mastorakos, Constantine A. Stratakis, Nikos Vlahos, 2024-12-02 Pediatric adolescent endocrinology and gynecology are entering a new era. Whole exome sequencing approaches with targeted gene panels have become widely available, even for prenatal screening, leading to the elucidation of genetic etiologies in endocrine and gynecological diseases and opening the road for genetic precision medicine and the development of specific therapies. The transition from the end of puberty to the attainment of an adult phenotype may be a very long way, up to 10 years or even longer. Meanwhile, conventional approaches to hormone deficiencies are rapidly changing, as are the options for treatment of sexual precocity and infertility. Commercially available rLH/rFSH preparations in the form of pens, used mainly for fertility induction in women, are now being investigated in hypogonadotropic hypogonadism, aiming to a physiological replacement therapy, not only at puberty but also to the replacement of the missing mini-puberty, crucially important for fertility and the very essence of the male sex identity itself. Furthermore, they provide an alternative to surgery, especially for bilateral cryptorchidism, preserving future fertility.

Complete Revision Guide for MRCOG Part 2 Justin C. Konje, 2019-11-27 The examination for Membership of the Royal College of Obstetricians and Gynaecologists (MRCOG) remains one of the most internationally recognised postgraduate examinations in the specialty. Over the years, the examination has evolved in keeping with changes in medical education. The Part 2 examination now consists of two papers made up of Single Best Answer (SBA) questions and Extended Matching Questions (EMQ). This invaluable resource consists of 400 SBA questions (200 in Obstetrics and 200 in Gynaecology) followed by 400 EMQs (200 in Obstetrics and 200 in Gynaecology), grouped into papers to provide enough material to guide preparations and to give some practice experience of the examination formats. All the questions have answers with explanations and sources of evidence. In preparing for the examination, candidates should make repeated references to these sources of evidence. There is also general advice on how to prepare for the examination and discussion of the reasons why trainees fail the examination.
