The Natural Contract Michel Serres, 1995 Meditations on environmental change and the necessity of a pact between Earth and its inhabitants French 'Ecocritique' Stephanie Posthumus, 2017-01-01 *Federal Register*, 1990-02

Ecocritics and Ecoskeptics Jonathan F. Krell, 2020 Ecocritics and Ecoskeptics examines environmental themes and questions about the evolving relationship between humans and animals in nine modern and contemporary French novels Considering arguments from both environmentalists and ecoskeptics it concludes that far from distancing itself from humanism as it often has environmentalism must embrace an inclusive and ecological humanism EcoLaw Margaret Davies, 2022-05-01 This book re imagines law as ecolaw The key insight of ecological thinking that everything is connected to everything else at least on the earth and possibly in the cosmos has become a truism of contemporary theory Taking this insight as a starting point for understanding law involves suspending theoretical certainties and boundaries It involves suspending theory itself as a conceptual project and practicing it as an embodied and material project Although an ecological imagining of law can be metaphorical and can be highly imaginative and suggestive this book shows that it is also literal Law is part of the material everything that is connected to everything else This means that once the previous certainties of legal thinking have been dismantled it is after all possible to think of law as natural as embedded in and emergent from a normative biophysical nature The book proposes that there exists a natural nomos animals plants and Earth systems that produce their own values and norms from which human norms and laws emerge This book then proposes a new way to understand law and pursues specific arguments to demonstrate the feasibility of law as ecolaw Drawing inspiration from current trends in the post humanities socioecological thought and developments across the natural sciences in their specific intersections with humanities and social science disciplines this book will appeal both to legal theorists and to others with interests in these areas **Federal Energy Regulatory Commission Reports** United States. Federal Energy Regulatory Commission, **The Future of Values** Binde, 2004 This volume brings together about 50 scientists and researchers from the four corners of the world to redefine and anticipate tomorrow's values and reflect on the direction these values may lead humanity Publisher's description *Porous Becomings* Andreas Bandak, Daniel M. Knight, 2024-02-23 The contributors to *Porous Becomings* draw on the work of French philosopher of science Michel Serres 1930 2019 to show how it opens new pathways for anthropological knowledge *Access to International Justice* Patrick Keyzer, Vesselin Popovski, Charles Sampford, 2014-11-20 There is much debate about the scope of international law its compatibility with individual state practice its enforceability and the recent and limited degree to which it is institutionalized This collection of essays seeks to address the issue of access to justice the related element of domestic rule of law which does not yet figure significantly in debates about international rule of law Even in cases in which laws are passed institutions are present and key players are ethically committed to the rule of law those whom the laws are intended to protect may be unable to secure protection This is

an issue in most domestic jurisdictions but also one which poses severe problems for international justice worldwide The book will be of interest to academics and practitioners of international law environmental law transitional justice international development human rights ethics international relations and political theory **A Multidisciplinary Actology** Malcolm Torry, 2025-07-15 An actology introduced by the first book in this series Actology Action Change and Diversity in the Western Philosophical Tradition understands reality as action in changing patterns Actological Readings in Continental Philosophy read a number of continental philosophers through this lens An Actology of the Given explored the concepts of the gift givenness and giving in the light of reality understood as action in changing patterns An Actological Metaphysic treated a variety of metaphysical and cosmological concepts in the light of reality understood as action in changing patterns An Actological Theology asked what Christian theology looks like when understood actologically Mark's Gospel An Actological Reading was what it says it is This seventh book in the series A Multidisciplinary Actology fills some important gaps by understanding language the humanities ethics mathematics the natural sciences the social sciences psychology politics and organizational behavior actologically that is with reality understood as action in changing patterns *Frontier Fictions* Firoozeh Kashani-Sabet, 1999 In *Frontier Fictions* Firoozeh Kashani Sabet looks at the efforts of Iranians to defend if not expand their borders in the nineteenth and early twentieth centuries and explores how their conceptions of national geography influenced cultural and political change The frontier fictions or the ways in which the Iranians viewed their often fluctuating borders and the conflicts surrounding them played a dominant role in defining the nation On these borderlands new ideas of citizenship and nationality were unleashed refining older ideas of ethnicity Kashani Sabet maintains that land based conceptions of countries existed before the advent of the modern nation state Her focus on geography enables her to explore and document fully a wide range of aspects of modern citizenship in Iran including love of homeland the hegemony of the Persian language and widespread interest in archaeology travel and map making While many historians have focused on the concept of the imagined community in their explanations of the rise of nationalism Kashani Sabet is able to complement this perspective with a very tangible explanation of what connects people to a specific place Her approach is intended to enrich our understanding not only of Iranian nationalism but also of nationalism everywhere *Earth Summit Ethics* J. Baird Callicott, Fernando J. R. da Rocha, 1996-08-23 On the eve of the 1992 Earth Summit in Rio de Janeiro Fernando J R da Rocha challenged environmental philosophers to suggest and develop effective ways in which universities might engender ecological literacy and environmental ethics The result was a preconference held in Porto Alegre Brazil whose aim was to put the summit in philosophical perspective influence its outcome and chart a new course linking environment and ethics through university education This book is an outgrowth of the Porto Alegre conference and the international environmental philosophers and educators represented here inaugurate a constructive dialogue that will continue well into the twenty first century Among the contributors to the volume are environmental philosophers Andrew Brennan J Baird Callicott Fernando J

R da Rocha and Holmes Rolston III and education theorists Peter Madsen and John Lemons In addition the book introduces English language readers to the work of French philosopher Catherine Larrere Spanish philosopher Nicholas Sosa and Brazil's radical former Secretary for the Environment and deep ecologist Jose Lutzenberger

The Ninth Amendment: Key to Understanding the Bill of Rights Duane L Ostler,2014-10-08 This book explains how the Ninth Amendment is the key to understanding rights in the United States The founders created the Ninth Amendment to protect unlisted natural law rights as they were understood in their day This amendment was never intended to allow future generations to create new rights Rather it was to safeguard the morality and natural rights of the founding generation

Divided Natures Kerry H Whiteside,2002-02-01 In this book Kerry Whiteside introduces the work of a range of French ecological theorists to an English speaking audience He shows how thinkers in France and in English speaking countries have produced different strains of ecological thought and suggests that the work of French ecological theorists could lessen pervasive tensions in Anglophone ecology Much of the theory written in English is shaped by the debate between anthropocentric ecologists who contend that the value of our nonhuman surroundings derives from their role in fulfilling human interests and ecocentric ecologists who contend that the nonhuman world holds ultimate value in and of itself This debate is almost nonexistent among French theorists who tend to focus on the processes linking nature and human identity Whiteside suggests that the insights of French theorists could help English language theorists to extricate themselves from endless debates over the real center of nature's value Among the French theorists discussed are Denis de Rougemont Denis Duclos Ren Dumont Luc Ferry Andr Gorz Felix Guattari Bruno Latour Alain Lipietz Edgar Morin Serge Moscovici and Michel Serres The English language theorists discussed include John Barry Robyn Eckersley Robert Goodin Tim Hayward Holmes Rolston III and Paul Taylor
