Ralph Waldo Emerson: Essays and Lectures (LOA #15) Ralph Waldo Emerson, 1803-11-15 Our most eloquent champion of individualism Emerson acknowledges at the same time the countervailing pressures of society in American life Even as he extols what he called the great and creative self he dramatizes and records its vicissitudes Here are all the indispensable and most renowned works including The American Scholar our intellectual Declaration of Independence as Oliver Wendell Holmes called it The Divinity School Address considered atheistic by many of his listeners the summons to Self Reliance along with the more embattled realizations of Circles and especially Experience Here too are his wide ranging portraits of Montaigne Shakespeare and other representative men and his astute observations on the habits lives and prospects of the English and American people This volume includes Emerson's well known Nature Addresses and Lectures 1849 his Essays First Series 1841 and Essays Second Series 1844 plus Representative Men 1850 English Traits 1856 and his later book of essays The Conduct of Life 1860 These are the works that established Emerson's colossal reputation in America and found him admirers abroad as diverse as Carlyle Nietzsche and Proust The reasons for Emerson's influence and durability will be obvious to any reader who follows the exhilarating exploratory movements of his mind in this uniquely full gathering of his work Not merely another selection of his essays this volume includes all his major books in their rich entirety No other volume conveys so comprehensively the exhilaration and exploratory energy of perhaps America's greatest writer LIBRARY OF AMERICA is an independent nonprofit cultural organization founded in 1979 to preserve our nation's literary heritage by publishing and keeping permanently in print America's best and most significant writing The Library of America series includes more than 300 volumes to date authoritative editions that average 1 000 pages in length feature cloth covers sewn bindings and ribbon markers and are printed on premium acid free paper that will last for centuries Nature and Command J. Caleb Clanton, Craig Martin, 2023-08-18 Since at least the time of Plato religious explanations of the metaphysical foundations of morality have typically fallen into one of two camps natural law theory according to which morality is fundamentally explained by facts about human nature facts that God is responsible for and divine command theory which holds that moral obligations arise directly from God's commands or some other prescriptive act of the divine will J Caleb Clanton and Craig Martin offer an accessible analysis of these traditional views reconstruct the various arguments for and against them and offer an extended consideration of the historical emergence of the divide between these positions within the Christian tradition Nature and Command goes on to develop and defend a theory that combines these two views a metaethical approach that has not yet received the scholarly attention it deserves Along the way the authors make use of underexplored theological resources drawn from the Stone Campbell movement a nineteenth century restoration movement that culminated in one of the largest Protestant groups in America by the dawn of the twentieth century Nature and Command summons the resources of this particular Christian heritage its first principles call for unity and ecumenism to

solve one of the great dilemmas of moral philosophy and theology dating back to Plato's Euthyphro. This historically aware, argumentatively rigorous and highly readable volume will serve as a valuable resource for moral philosophy and ethics as well as for mining the Stone-Campbell Restoration tradition for historical and theological insights.

The Intrinsic Value of Nature Leena Vilkkä, 1997. What is intrinsic value? What is the origin of value? Are people always superior to nature? This book is a philosophical analysis of the human relationship to the non-human world. It is a pioneering study of the philosophy of nature conservation in relation to the discussion of intrinsic value. Vilkkä develops a naturalistic or naturocentric theory of value that is based on ethical extensionism and pluralism. Vilkkä analyzes natural values and environmental attitudes: zoocentrism, biocentrism, and ecocentrism. This book forms a taxonomy for nature having intrinsic value. The theory of intrinsic value is based on naturocentric and naturogenic values. The book questions the thesis of weak anthropocentrism that denies the existence of naturogenic values. In Vilkkä's theory, animals and nature are the origin of value. She defends the existence of zoogenic and biogenic values in the non-human world and discusses the possibility of ecogenic value: nature as a whole having value independent of human or animal minds. Vilkkä analyzes the goodness and rights of nature, the problem of priorities, and ecological humanism. A naturocentric recommendation is that the well-being of animals and nature should have priority over human values at least in some real decision contexts. Ecological humanism recommends an attitude of respect for people, animals, and nature. The book includes an extensive glossary, index, and bibliography.

Answering Moral Skepticism Shelly Kagan, 2023. Most thoughtful people worry at one time or another about whether there can actually be such a thing as objective moral truth. They might wonder, for example, whether the prevalence of moral disagreement makes it reasonable to conclude that there aren't really any moral facts at all. Or they might be bothered by questions like these: What could objective moral facts possibly be like? Isn't it obvious that morality is simply relative to particular societies and particular times? If there were moral facts, how could we ever come to know anything about them? Can morality really have the motivating and rational force we normally take it to have? How can one possibly find a place for objective moral values in a scientific worldview? Some people are driven by questions like these to the conclusion that we should embrace skepticism about morality, denying the very existence of anything worthy of the name. In *Answering Moral Skepticism*, Shelly Kagan shows how those who accept the existence of objective moral truth can provide plausible answers to these questions. Focusing throughout on issues that trouble reflective individuals, Kagan provides an accessible defense of the belief in objective morality. This will be of interest to both students of metaethics as well as anyone worried about the objectivity of their own moral judgements.

Cognition and Fact Robert S. Cohen, Thomas Schnelle, 2012-12-06. Within the last ten years, the interest of historians and philosophers of science in the epistemological writings of the Polish medical microbiologist Ludwik Fleck (1896-1961), who had up to then been almost completely unknown, has advanced with great strides. His main writings on epistemological questions were published in the mid-1930s but they remained almost unnoticed. Today, however, one may

rightly call Fleck a classical figure both of epistemology and of the historical sociology of science one whose works are comparable with Popper's *Logic of Scientific Discovery* or Merton's pioneering study of the relations among economics, Puritanism and natural science both also originally published in the mid 1930s. The story of this book of materials on Ludwik Fleck is also the story of the reception of Ludwik Fleck. In this volume some essential materials which have been produced by that reception have been gathered together. We will sketch both the reception and the materials.

Does Anything Really Matter? Peter Singer, 2017. In the first two volumes of *On What Matters* Derek Parfit argues that there are objective moral truths and other normative truths about what we have reasons to believe and to want and to do. He thus challenges a view of the role of reason in action that can be traced back to David Hume and is widely assumed to be correct not only by philosophers but also by economists. In defending his view Parfit argues that if there are no objective normative truths nihilism follows and nothing matters. He criticizes often forcefully many leading contemporary philosophers working on the nature of ethics including Simon Blackburn, Stephen Darwall, Allen Gibbard, Frank Jackson, Peter Railton, Mark Schroeder, Michael Smith and Sharon Street. *Does Anything Really Matter* gives these philosophers an opportunity to respond to Parfit's criticisms and includes essays on Parfit's views by Richard Chappell, Andrew Huddleston, Katarzyna de Lazari Radek and Peter Singer, Bruce Russell and Larry Temkin. A third volume of *On What Matters* in which Parfit engages with his critics and breaks new ground in finding significant agreement between his own views and theirs is appearing as a separate companion volume.

The Oxford Handbook of Ethical Theory David Copp, 2006-01-26. The Handbook is a comprehensive reference work in ethical theory consisting of commissioned articles by leading scholars. The first part treats meta-ethics and the second part normative ethical theory. The Normative Force of the Factual Nicoletta Bersier Ladavac, Christoph Bezemek, Frederick Schauer, 2019-06-26 This book explores the interrelation of facts and norms How does law originate in the first place What lies at the roots of this phenomenon How is it preserved And how does it come to an end Questions like these led Georg Jellinek to speak of the normative force of the factual in the early 20th century emphasizing the human tendency to infer rules from recurring events and to perceive a certain practice not only as a fact but as a norm a norm which not only allows us to distinguish regularity from irregularity but at the same time to treat deviances as transgressions Today Jellinek's concept still provides astonishing insights on the dichotomy of is and ought to be the emergence of the normative the efficacy and the defeasibility of legal norms and the distinct character of what legal theorists refer to as normativity It leads us back to early legal history it connects anthropology and legal theory and it demonstrates the interdependence of law and the social sciences In short it invites us to fundamentally reassess the interrelation of facts and norms from various perspectives The contributing authors to this volume have accepted that invitation

What is this Thing Called Metaethics? The Relative Native Eduardo Viveiros de Castro, 2016-02-15 This volume is the first to collect the most influential essays and lectures of Eduardo Viveiros de Castro Published in a wide variety of venues and often difficult to find the pieces are brought together here for the first time in a one major volume which includes his momentous 1998 Cambridge University

Lectures Cosmological Perspectivism in Amazonia and Elsewhere Rounded out with new English translations of a number of previously unpublished works the resulting book is a wide ranging portrait of one of the towering figures of contemporary thought philosopher anthropologist ethnographer ethnologist and more With a new afterword by Roy Wagner elucidating Viveiros de Castro s work influence and legacy The Relative Native will be required reading further cementing Viveiros de Castro s position at the center of contemporary anthropological inquiry Catharine Trotter Cockburn Ruth Boeker,2023-07-13 This Element offers the first detailed study of Catharine Trotter Cockburn s philosophy and covers her contributions to philosophical debates in epistemology metaphysics moral philosophy and philosophy of religion It not only examines Cockburn s view that sensation and reflection are the sources of knowledge but also how she draws attention to the limitations of human understanding and how she approaches metaphysical debates through this lens In the area of moral philosophy this Element argues that it is helpful to take seriously Cockburn s distinction between questions concerning the metaphysical foundation of morality and questions concerning the practice of morality Moreover this Element examines Cockburn s religious views and considers her understanding of the relation between morality and religion and her religious views concerning the resurrection and the afterlife **Cognition, Content, and the A Priori** Robert Hanna,2015-10-08 In Cognition Content and the A Priori Robert Hanna works out a unified contemporary Kantian theory of rational human cognition and knowledge Along the way he provides accounts of i intentionality and its contents including non conceptual content and conceptual content ii sense perception and perceptual knowledge including perceptual self knowledge iii the analytic synthetic distinction iv the nature of logic and v a priori truth and knowledge in mathematics logic and philosophy This book is specifically intended to reach out to two very different audiences contemporary analytic philosophers of mind and knowledge on the one hand and contemporary Kantian philosophers or Kant scholars on the other At the same time it is also riding the crest of a wave of exciting and even revolutionary emerging new trends and new work in the philosophy of mind and epistemology with a special concentration on the philosophy of perception What is revolutionary in this new wave are its strong emphases on action on cognitive phenomenology on disjunctivist direct realism on embodiment and on sense perception as a primitive and proto rational capacity for cognizing the world Cognition Content and the A Priori makes a fundamental contribution to this philosophical revolution by giving it a specifically contemporary Kantian twist and by pushing these new lines of investigation radically further *Christian Ethics and Commonsense Morality* Kevin Jung,2014-11-27 Christian Ethics and Commonsense Morality goes against the grain of various postmodern approaches to morality in contemporary religious ethics In this book Jung seeks to provide a new framework in which the nature of common Christian moral beliefs and practices can be given a new meaning He suggests that once major philosophical assumptions behind postmodern theories of morality are called into question we may look at Christian morality in quite a different light On his account Christian morality is a historical morality insofar as it is rooted in the rich historical traditions of the Christian

church Yet this kind of historical dependence does not entail the evidential dependence of all moral beliefs on historical traditions It is possible to argue for the epistemic autonomy of moral beliefs according to which Christian and other moral beliefs can be justified independently of their historical sources The particularity of Christian morality lies not in its particular historical sources that also function as the grounds of justification but rather in its explanatory and motivational capacity to further articulate the kind of moral knowledge that is readily available to most human beings and to enable people to act upon their moral knowledge The Oxford Handbook of Philosophy of Education Harvey Siegel, 2009-10-30

Philosophy of education has an honored place in the history of Western philosophical thought Its questions are as vital now both philosophically and practically as they have ever been In recent decades however philosophical thinking about education has largely fallen off the philosophical radar screen Philosophy of education has lost intimate contact with the parent discipline to a regrettably large extent to the detriment of both The Oxford Handbook of Philosophy of Education is intended to serve as a general introduction to key issues in the field to further the philosophical pursuit of those issues and to bring philosophy of education back into closer contact with general philosophy Distinguished philosophers and philosophers of education most of whom have made important contributions to core areas of philosophy turn their attention in these 28 essays to a broad range of philosophical questions concerning education The chapters are accessible to readers with no prior exposure to philosophy of education and provide both surveys of the general domain they address and advance the discussion in those domains in original and fruitful ways Together their authors constitute a new wave of general philosophers taking up fundamental philosophical questions about education the first such cohort of outstanding general philosophers to do so in English in a generation Anthropological Perspectives On Kinship Ladislav Holy, 1996-10-20 This authoritative introductory text takes into account the changes in the conceptualisation of kinship brought about by new reproductive technologies and the growing interest in culturally specific notions of personhood and gender Holy considers the extent to which Western assumptions have guided anthropological study of kinship in the past In the process he reveals a growing sensitivity on the part of anthropologists to individual ideas of personhood and gender and encourages further critical reflection on cultural bias in approaches to the subject
