**Elizabeth N. Saunders**

## **Natural Allies:**

*Natural Allies* Anne Firor Scott, 1992 America's female benevolent societies took root in the 1790s. Initially founded on notions of Christian duty and hope of heavenly reward, these groups produced volunteers dedicated to providing aid to unfortunates in general and women and children in particular. Anne Firor Scott explores the history of these aid societies and how they allowed women to influence America's social agenda and make inroads into politics long before they could vote. Scott reveals how women from all corners of society took part, examines their changing role in the midst of tumultuous times, and during the rise of the welfare state assesses the overlooked accomplishment of black women's organizations from the early days of the republic and looks at the kinds of enduring community institutions women's organizations founded and maintained.

**The Insiders' Game** Elizabeth N. Saunders, 2024-03-26 One of the most important virtues of a democracy is that its leaders are accountable to the public, which presumably makes democracies more cautious about using military force and ultimately more peaceful. Yet how then are some leaders able to continue or even escalate wars in the face of strong or rising popular opposition as Lyndon Johnson and Richard Nixon did in the later stages of the Vietnam War and Barack Obama did in Afghanistan? In this book, Saunders argues that constraints on democratic leaders' decisions about war come not from the public but from elites, making war an insiders' game. Saunders sees elites as a disparate group that can shape not only the decision about whether to enter a war but also how wars unfold. The insiders' game can sometimes result in elites effectively colluding with leaders in escalating a war with dim prospects; it can also occasionally lead to de-escalation or the end of a conflict. Saunders focuses first on the importance of elite influence rather than public accountability and on how the preferences of elites differ from those of the public. She homes in on three main groups of elites that shape almost every war-related decision democratic leaders make: legislators, military leaders, and high-level bureaucrats and advisers. She then goes on to look at how these dynamics have played out historically, looking at the cases of Lebanon, Afghanistan, Korea, and Vietnam, showing that leaders' political bargaining with elites is key to understanding the use of force in American foreign policy.

*Hospitality* Conrad Lashley, Paul Lynch, Alison J. Morrison, 2007 The contributing authors provide tangible evidence of continuing advancement and development of knowledge pertaining to the phenomenon of hospitality. They draw on the richness of social sciences, taking host and guest relations as a means of studying in-group and out-group relations with and between societies.

Revolutionary States, Leaders, and Foreign Relations Houman A. Sadri, 1997-04-16 This book compares and contrasts the foreign relations strategies of China, Cuba, and Iran in the first decade of their post-revolutionary periods. Among a variety of explanatory variables, leadership, particularly the type of revolutionary leaders, played a significant role in explaining the outcome of the policymaking process in each case. Three distinct patterns of foreign relations strategies are evident among all three revolutionary regimes in the ten-year period: Two-Track, Conflictual, and Conciliatory. This book is a valuable source for both experts and non-experts alike in providing insight into the foreign relations of revolutionary regimes.

in developing countries and in helping U S policymakers anticipate behaviors of future revolutionary leaders A focal point of this book is the examination of the nonalignment strategies of these prominent developing countries during the infancy of their regimes Each state s particular strategy is described and explained in detail and then contrasted and compared Although there are differences among their foreign policies considering their geographic locations size wealth military capabilities leadership characteristics and political institutions there are significant similarities regarding their foreign policy goals and trends in their foreign relations with the Great Powers Among explanatory factors leadership played a significant role in the policy making process although the foreign relations strategies of these revolutionary regimes were fed by a combination of national and international variables In all three states the tone of foreign policy was set by revolutionary leaders who were either idealists or realists Idealists tended to take a more active and conflictual approach toward one or both of the superpowers while Realists were more cautious and less willing to resort to a conflictual posture This book also investigates the gap between the theoretical and practical nonalignment stance of each state This cross regional study provides policy analysts with clues about the foreign policies of other revolutionary developing countries in similar situations Finally it makes suggestions about how a Great Power may relate to a developing country during its first post revolution decade
