Everyday Thoughts about Nature W.W. Cobern,2012-12-06 The primary goal of Everday Thoughts about Nature is to understand how typical ninth grade students and their science teachers think about Nature or the natural world and how their thoughts are related to science In pursuing this goal the book raises a basic question about the purpose of science education for the public Should science education seek to educate scientific thinkers in the pattern of science teachers Or should science education seek to foster sound science learning within the matrices of various cultural perspectives By carefully examining the ideas about Nature held by a group of students and their science teachers Cobern argues that the purpose of science education for the public is to foster sound science learning within the matrices of various cultural perspectives Cobern s two books World View Theory and Science Education Research and now Everyday Thoughts about Nature provide complementary accounts of theoretical and empirical foundations for worldview theory in science education While many graduate students and researchers have benefited from his earlier work many more will continue to benefit from this book

Tobin,2012-11-12 This volume provides a needed elaboration of theories and potential applications of constructivism in science education Although the term constructivism is used widely there has been a dearth of materials to guide science educators concerning the potential of constructivism to influence what is done in the field In fact there has been a tendency for constructivism to be viewed as a method that can be used in a classroom This view tends to diminish the power of constructivism as a way of thinking about education and in particular about science education The chapters in this book address the need to document the theoretical roots of constructivism and to describe how practitioners have applied constructivist oriented beliefs in the practice of K 12 teaching of science and mathematics as well as teacher education Not only does this book contain different theoretical perspectives on constructivism but it also features a chapter that critiques constructivism as an epistemology Specific topics covered include cooperative learning the negotiation of meaning problem centered learning social construction of knowledge science in culturally diverse settings curriculum planning and implementation and instructional technology Issues associated with the preparation and enhancement of science teachers and the reform of science education are also explored *Budget Views and Estimates for Fiscal Year 1993* United States.
