Moyer provides a perspective beyond the standard DSM 5 diagnoses and even the very concept of mental illness The stove piped diagnoses dominating current medical practices are obsolete While the medical establishment resists the need for major reformation the public is beginning to demand science based diagnoses and treatments Here Moyer outlines deficiencies in current diagnostic systems that consign many to a lifetime of chronic illness Their illnesses are not being properly diagnosed and treated Since the publication of Beyond Mental Illness in 2014 a plethora of academic research in some of the best journals has validated some of his hypotheses The key for more effective treatments is not to be found in drugs that mitigate downstream biological processes The key is to identify and treat the diagnosable and treatable upstream biological processes
