New College, Oxford, 1379-1979 John Buxton, Penry Williams, 1979 **The History of the University of Oxford: Volume VIII: The Twentieth Century** Brian Harrison, Trevor Henry Aston, 1994-04-07 This volume the eighth in The History of the University of Oxford shows how one of the world's major universities has responded to the formidable challenges offered by the twentieth century. Because Oxford's response has not taken a revolutionary or dramatic form outside observers have not always appreciated the scale of its transformation. Here full attention is given to the forces for change: the rapid growth in provision for the natural and social sciences; the advance of professionalism in scholarship; sport and cultural achievement; the diffusion of international influences through Rhodes scholars; two world wars; and the University's mounting research priorities; the growing impact of government and of public funding; the steady advance of women; and the impact made by Oxford's broadened criteria for undergraduate admission. The volume also provides valuable background material for the discussion of educational policy. In short it presents the reader with a rich cornucopia of insight into many aspects of British life. *English University Life in the Middle Ages* Alan B Cobban, 2022-02-22 First Published in 1999 This work presents a composite view of medieval English university life. The author offers detailed insights into the social and economic conditions of the lives of students, their teaching masters and fellows. The experiences of college benefactors, women and university servants are also examined, demonstrating the vibrancy they brought to university life. The second half of the book is concerned with the complex methods of teaching and learning, the regime of studies, taught the relationship between the universities in Oxford and Cambridge as well as the relationship between town and gown.

William Waynflete, Bishop and Educationalist Virginia Davis, 1993 Study of the life of bishop of Winchester 1447-86 one of the great educationalists and patrons of learning of late medieval England. This is the first modern study of William Waynflete, powerful and influential bishop of Winchester from 1447 to 1486. Waynflete was one of the great educationalists and patrons of learning of late medieval England and his career was dominated by an interest in education. He played a leading role in some of the changes which transformed education in 15th century England: the emergence in Oxford and Cambridge of new and larger colleges; the influence of continental humanist ideas which reshaped English thought; the introduction of the teaching of Greek; the composition of new grammars; and the introduction of printing as a means of disseminating the new learning. Through her examination of Waynflete's career Davis challenges the received view of the gangrenous corruption of the medieval church and instead supports recent research which suggests the truth to have been far more complex. As this biography records, Waynflete himself was politically linked to Henry VI and the Lancastrian administration and most of his time was spent in southern England. However he retained close links with his native Lincolnshire and his commitments there are also fully considered. VIRGINIA DAVIS is lecturer in history at Queen Mary and Westfield College, University of London. The Years of Anger Andy Croft, 2020-05-01 Randall Swingler 1909-67 was

Smith,Gemma L. Watson,2017-05-15 Historical biography has a mixed reputation at its best it can reveal much not only about an individual but the wider context of their life and society at worst it can result in a narrowly focused work of hagiography or condemnation Yet in spite of its sometimes inferior status amongst academics biography has remained a popular genre and in recent years has developed into new and intriguing areas As the essays in this volume reveal scholars from an array of different disciplines have embraced what biography can offer them expanding the remit of biography from people to things tracing the life of their chosen object from creation to use to disposal to rediscovery The increasing concern with the physicality of manuscripts and books has also meant an awareness of and interest in the lives of these forms of material culture Historians have also become increasingly interested in groups of individuals resulting in prosopographical studies A book on the diversity of biography is therefore very timely exploring the multi disciplinary application of historical biography in the period 500 1700 It presents fourteen case studies offering new approaches to historical biography written by early career researchers from backgrounds in archaeology English art architectural history and history demonstrating different approaches and techniques Overall the collection is a strong and united statement by a group of early career researchers

who insist on the vitality of biography as a central concern of historians across the disciplines of the humanities Contributors believe that the life is a fundamental medium of study for the medieval and early modern periods and thus bolsters the move back towards biography as a primary tool of medieval and early modern scholars as well as a tool for future research for humanities scholars interested in biography

Pages from the Past M.B. Parkes, edited by P.R. Robinson, 2018-02-06. In the present collection of articles by Malcolm Parkes, two overarching concerns emerge: the palaeography of manuscript books in relation to what Parkes has previously called the grammar of legibility and the importance of considering the circumstances in which medieval books were produced, copied, and read. The individual studies discuss the handwriting of individual scribes and the evidence script can provide of the circumstances of a book's production, the effect of punctuation and layout of text on the reader's interpretation of a work, and the provision and production of books for communities of readers, both clerical and academic. From a discussion of the scribe of the Hereford Mappa Mundi to a comprehensive study of book provision in the medieval University of Oxford, a wealth of information is conveyed in these articles, now conveniently accessible in one volume about books and their histories by one of the most knowledgeable of manuscript scholars today. Raymond Carr María Jesús González Hernández, 2013. Published in collaboration with the Canadiana Blanch Centre for Contemporary Spanish Studies.

Our Friend "The Enemy" Thomas Weber, 2008. At once a book about Oxford and Heidelberg University and about the character of European society on the eve of the World War I, *Our Friend The Enemy* challenges the idea that pre-1914 Europe was bound to collapse.

Medieval Manuscripts in Post-Medieval England Andrew G. Watson, 2023-07-07. Two themes uniting the essays in this collection are the provenance and history of medieval manuscripts during the Middle Ages and the fates that befell them in England in the period after the invention of printing and the 16th-century dissolution of the religious houses and visitations of the universities. The section *Libraries and collectors* includes papers on seven major English collectors of the 16th and 17th centuries and the section *Manuscripts* concerns the fates of five manuscripts or groups of manuscripts from England, Belgium, and Italy. Of the other chapters, one is concerned with the post-medieval history of the library of All Souls College, Oxford, and another with the provenance of hundreds of manuscripts in the Harleian collection in the British Library. For this volume, Andrew Watson has provided extensive additional notes and indexes.
