New Directions In Geographical Education:

New Directions in Geographical Education David Boardman, 1985-01-01 Geography in British Schools, 1850-2000 Rex Walford, 2001 This history of geography as a major subject in the British school curriculum in the past 150 years deconstructs some of the myths which have grown up around school geography s Victorian image considers geography s struggle for examination recognition in the early years of the 20th century and describes periods of different emphases in the field It analyzes the revolution in teaching geography in the 1960s and 1970s and examines the effect of the National Curriculum Includes bandw historical photos Walford taught postgraduate courses for geography teachers at the University of Cambridge from 1973 to 1999 Distributed by ISBS c Book News Inc Developments and Directions in Geographical Education Rodney Gerber, John Lidstone, 1996 Fieldwork in Geography: Reflections, Perspectives and Actions Rod Gerber, Goh Kim Chuan, 2013-03-14 Geographers regard fieldwork as a vital instrument for understanding our world through direct experience for gathering basic data about this world and as a fundamental method for enacting geographical education The range of international geography and educational experts who contributed to this volume has demonstrated that the concept of fieldwork has a considerable history in the field of geography They have demonstrated that the theoretical aspects of fieldwork have been interpreted differently in regions around the world but the importance of fieldwork remains strong globally A fresh look at the pedagogic implications for fieldwork in formal education offers ideas both for promoting it in geographical education and for maintaining its place in the geography curriculum Audience Forward looking geographers and educators now recognise that alternative strategies especially those involving the use of information technology should be developed to reaffirm the centrality of fieldwork in geographical and wider education International Handbook on Geographical Education Rod Gerber, 2013-03-09 I am very pleased to have been asked by Rod Gerber to provide a preface to such a book Not least because of the twenty four chapters eight are written by former students or colleagues with whom I have worked in the past and whom I still meet at conferences on geographical education It is with a certain pride and joy that I note the progress which has been made in geographical education both in its day to day teaching and in research in the twenty years following the end of my term of office as Chair of the Commission on Geographical Education of the International Geographical Union CGEIUG My successors Joe Stoltman Hartwig Haubrich Rod Gerber and now Lea Houtsonen have done much and are continuing to work hard to foster the development of geographical education This book is proof if proof were needed that the international collaboration in this field is alive and well with contributions coming from all the continents except Antarctica It would be a moribund subject that remained unaffected in one way or another by developments on the great world stage as Fairgrieve 1926 would have put it And as Rod Gerber shows the issues of globalisation of cultural encounters of differing value systems of new technologies of variable economic development and of environmental quality all feature as topics which influence and are influenced by geographical education **Continuum**

Guide to Geography Education Graham Butt,2000-12-26 A reference guide to geography education Entries arranged alphabetically cover government legislation and reports famous geography educators resources research findings movements trends debates and issues organizations and key concepts An analytical index helps the reader to choose paths through the book connecting entries Environmental and Geographical Education for Sustainability Zijian Li,Michael Williams,2006 Geography environment sustainability culture and education standing alone or in any combination provide the ingredients for a variety of stews They are all difficult to define and they generate endless debates for theoreticians and practitioners about their meaning and significance The editors have divided the chapters that follow into two parts in an effort to unit these diverse disciplines Part 1 is concerned with cultural foundations and curriculum issues related to geographical and environmental education for sustainability Part 2 comprises a series of chapters presenting education for sustainability in the contexts of national cultures

Debates in Geography Education Mark Jones, David Lambert, 2017-09-07 Debates in Geography Education encourages early career teachers experienced teachers and teacher educators to engage with and reflect on key issues concepts and debates It aims to enable readers to reach their own informed judgements with deeper theoretical knowledge and understanding The second edition is fully updated in light of the latest research policy and practice in the field as well as key changes to the curriculum and examination specifications Expert contributors provide a range of perspectives on international historical and policy contexts in order to deepen our understanding of significant debates in geography education Key debates include geography s identity as an academic discipline what constitutes knowledge in geography places and regional geography what it means to think geographically constructing the curriculum how we link assessment to making progress in geography the contribution of fieldwork and outdoor experiences technology and the use of Geographical Information school geography and employability understanding the gap between school and university geography evidence based practice and research in geography education The comprehensive rigorous coverage of these key issues together with carefully annotated selected further reading will help support and shape further research and writing Debates in Geography Education is a key resource that is essential reading for all teachers and researches who wish to extend their grasp of the place of geography in education Mark Jones is Senior Lecturer in Education at the University of the West of England Bristol UK David Lambert is Professor of Geography Education at UCL Institute of Education London UK The School Textbook William E. Marsden, 2013-01-11 A study of the school textbook grounded in historical and comparative perspectives The approach is broadly chronological revealing changes in the theory and practice of textbook production and use The book focuses largely on three associated subjects geography history and social studies Gender Literacy & Curriculum Alison Lee, 2014-03-18 First Published in 1996 Gender Literacy Curriculum is a major contribution to research and theory in literacy and curriculum studies Alison Lee looks at how the texts and discourses of schooling construct geography as a curriculum field and how this construction is tied closely with students gendered identities and practices in the classroom She brings together discourse analyses of research texts textbooks classroom talk students and teachers accounts with a detailed linguistic analysis of students written work This title is of particular interest to those working in literacy education and curriculum discourse analysis and applied linguistics feminisms and critical pedagogies **Understanding Geographical and Environmental Education** Michael C. Williams,1995-12-07 These papers aim to provide a substantial review of the literature pertaining to a comprehensive range of traditional and contemporary research paradigms and research methods The book is designed as a reference work for novice researchers in the fields of geographical and environmental education

Geography, Education and the Future Graham Butt,2011-03-17 **Issues in Geography Teaching Chris Fisher, Tony** Binns, 2016-01-28 Issues in Geography Teaching examines a wide range of issues which are of interest to those teaching geography from the early years through to higher education including the role of research and the use of ICT in teacher training the significance of developing critical thinking skills broader educational issues such as citizenship and development the importance of environmental education the position and role of assessment the present state and status of geographical education and issues that are likely to be of concern in the future Issues in Geography Teaching details the contexts presents the facts and raises thought provoking questions which should stimulate further interest and discussion Geography 11-18: a Conceptual Approach David Lambert, John Morgan, 2010-01-16 This is a must read for all 11 18 geography educators It argues for a new geography curriculum founded on a set of major concepts that are profoundly relevant to 21st century life For years books on 11 18 geography education have focussed on classroom techniques new pedagogic technologies and alternative modes of student assessment Not this one Teaching Geography 11 18 digs deep It asks not only what geography is for but bases its answer on a set of key concepts able to sustain an exciting and relevant curriculum It also grounds its many arguments in the latest geographical research thus re establishing the broken connection between geography teaching in schools and that in higher education Professor Noel Castree University of Manchester UK This engaging and stimulating book aims to radically re shape and sharpen debates in geography education by taking an entirely fresh approach to both the subject and its place in secondary education Key questions addressed in this book include What is the place of geography within the secondary school curriculum To what extent does school geography reflect and engage with contemporary issues and theories from the wider subject What are the issues challenges and opportunities of a concept led approach to teaching geography What are the implications of ICT media and technology for the future of geography teaching in schools Influenced by the revised national curriculum for geography which has reduced the prescribed content to be covered this book offers an objective view of the concept led approach The new focus on concepts represents a significant shift in how geography is to be taught in schools yet there has been little extended discussion of what a concept

led approach to teaching and learning would entail This book fills that void by examining geography s key concepts and providing teachers with a theoretically robust and practical approach to curriculum planning using a concept led approach This is essential reading for all secondary geography teachers trainee teachers and anyone involved with education and curriculum planning Key Issues in Secondary Education John Beck, Mary C. Earl, 2003-09-11 Praise for First Edition Key Issues in Secondary Education addresses crucial cross curricular issues which are central to secondary schooling in the new millennium We are confident that this book will make a major contribution to the understanding of new teachers as they grapple with issues that go beyond subject boundaries and as they explore the fundamental issues which affect schools and young people today Donald McIntyre and Mike YoungerThis eagerly awaited second edition has been fully up dated and revised with new chapters on the nature and measurement of intelligence and issues of race and racism in school and society Other chapters addressing the rapidly changing world of educational policy and innovation have been substantially rewritten to take account of recent developments and current debates All contributors write clearly and accessibly without over simplifying the complexity of the issues or the value they pose Subject Knowledge Christopher J. Anstead, Ivor F Goodson, J. Marshall Mangan, 2002-11 This text attempts to account for the growth of increased interest by sociologists and others in school subjects since the 1960s Goodson's analysis of his own work examines the range of insights afforded of the nature of schooling and teaching through the study of school subjects Geography in the Primary School (Routledge Revivals) John Bale, 2013-12-19 First published in 1987 this title provides primary school teachers with ideas by which geographical skills and ideas can be introduced in the primary school John Bale shows how teachers can build on children s private geographies with practical learning strategies examining approaches to the teaching of map skills the ways in which the locality can be used and how information about distant places can best be relayed An interesting useful and relevant guide this title will be of particular value for teachers and teachers in training as well as those studying primary Education more generally Geography Education Research in the UK: Retrospect and Prospect Graham Butt, 2019-08-22 This book provides a unique assessment of the development of research in geography education and its future prospects offering a challenging critique of subject based education research with particular reference to geography education across a range of different jurisdictions It covers a range of topics including the changing role of research in geography education the relationship between education research and professional practice with special reference to geography education research the place of academic subject knowledge in geography education research critiques of the functions of research in geography education and the key issues for education policy and policymakers concerning educational research at national and international levels Importantly in a period marked by radical change for education research and researchers the book offers a timely appraisal of possible ways forward for geography education research Addressing the needs of academics research students policymakers and education practitioners who undertake use or shape the future of research in geography

education it comprehensively explores the forces that have driven the development of geography education research and pedagogy Further by positioning its analysis in the context of education policy debates in the UK and further afield it assesses the role and function of research in education and offers an outlook on its future This book is essential reading for all those who wish to understand the sporadic and increasingly uncertain development of subject based research in education

Geography of Education Colin Brock,2016-09-22 Geography of Education sets out the scope of this emergent interdisciplinary field It illustrates the essential affinity of geographical and educational studies by emphasising the geographical factors influencing formal education systems and other forms of knowledge transfer Colin Brock begins by arguing the theoretical synergy that exists between the nature of both geography and educational studies as disciplines This is then exemplified by an analysis of the emergence of systems of schooling under the influence of religious political and economic forces The author also considers informal and non formal modes of education and argues that the huge diversity of such provision creates a rich resource for research into geographies of education In the final chapters the author turns his attention to the role of cyberspace which has its own geography in learning and considers education as a form of humanitarian response to issues of environmental sustainability By bringing together a wide range of themes and topics relating to both education and geography Colin Brock argues that the geographical approach should inform the evolution of all types of educational provision around the world
