following as it did the last CIAM meeting signalled a turning point for the Modern Movement. From then on architecture was influenced by seminal texts by Aldo Rossi and Robert Venturi and gave rise to the first revisionary movement following Modernism. Bringing together leading experts in the field, this book provides a comprehensive critical overview of the developments in architecture from 1960 to 2010. It consists of two parts: the first section providing a presentation of major movements in architecture after 1960 and the second a geographic survey that covers a wide range of territories around the world. This book not only reflects the different perspectives of its various authors but also charts a middle course between the aesthetic histories that examine architecture solely in terms of its formal aspects and the more ideological histories that subject it to a critique that often skirts the discussion of its formal aspects.

Las Culturas y Civilizaciones

Latinoamericanas Floyd Merrell, María Teresa DePaoli, 2016-11-14. *Las culturas y civilizaciones latinoamericanas* has been updated. This textbook not only describes the history of Latin America but it sets a mood that allows the reader to get a genuine sense of the languages, cultures and civilizations of this complex and colorful land. It provides an account of how Columbus's voyages gave rise to utopian dreams, the ramifications of which led to a brilliant display of hybrid cultures, changed the ethnic composition of two continents, accelerated lines of commerce and refashioned the Western World's diet. The textbook takes the reader through the discovery, conquest and colonization of the New World and on to independence and the national period. In addition, each chapter offers general concepts, important terms, questions and topics for classroom debates. Comprehensive and compelling, this book chronicles the history of an important region in a way that will interest students and teachers alike.

Improved Cities

Helen Gyger, 2019-03-12. Beginning in the 1950s, an explosion in rural-urban migration dramatically increased the population of cities throughout Peru, leading to an acute housing shortage and the proliferation of self-built shelters clustered in *barriadas* or squatter settlements. *Improved Cities* examines the history of aided self-help housing or technical assistance to self-builders, which took on a variety of forms in Peru from 1954 to 1986. While the postwar period saw a number of trial projects in aided self-help housing throughout the developing world, Peru was the site of significant experiments in this field and pioneering in its efforts to enact a large-scale policy of land tenure regularization in improvised, unauthorized cities. Gyger focuses on three interrelated themes: the circumstances that made Peru a fertile site for innovation in low-cost housing; under a succession of very different political regimes; the influences on and movements within architectural culture that prompted architects to consider self-help housing as an alternative mode of practice; and the context in which international development agencies came to embrace these projects as part of their larger goals during the Cold War and beyond.

Revolution of Forms John A. Loomis, 1999. A revolution of forms is a revolution of essentials. José Martí, Cuban intellectual and independence leader. Although the current surge of interest in Cuba has extended to that country's architecture, few know that the most outstanding architectural achievement of the Cuban Revolution stands neglected just outside Havana. The

Escuelas Nacionales de Arte National Art Schools constructed from 1961 to 1965 were the result of an educational program initiated by Fidel Castro and Che Guevara soon after the Revolution of 1959 The architects they commissioned created an organic complex of brick and terra cotta Catalan vaulted structures that reflected the optimism and exuberance of the period The schools attempted to reinvent architecture just as the Revolution hoped to reinvent society However even before construction was completed the schools fell out of official favor and were subjected to an attack that resulted in their subsequent disappearance An ideological campaign branded them politically incorrect a bourgeois luxury that was not in keeping with the Revolution The buildings fell into disuse and abandoned to the jungle were literally overgrown Now almost 40 years later Cuba is beginning to recognize and reclaim these significant works of architecture Revolution of Forms investigates the history and politics surrounding the creation of these structures as well as their subsequent abandonment The text is accompanied by archival photographs plans and images of the present condition of these structures
