## **New Directions In Public Health Care A Prescription For The 1980s:**

**New Directions in Public Health Care** Cotton M. Lindsay, 2018-04-20 This volume is a revised edition of The Institute for Contemporary Study's report on national health insurance. It includes an analysis of legislation currently before Congress, an examination of hospital cost increases and cost containment, an investigation of the politics of the National Health Insurance which asks if any major interest group involved in health care wants increased competition, new research on both the NHS in Britain and Canada's relatively recent experiments with full NHI, an update on public health care, a consideration of the relationship between health and health care, a discussion of the subsidy of health care, and an analysis of the market for medical care and the effects of an NHI on the market for physicians.

*The Economy in the 1980s* Michael J. Boskin, 2019-01-22 In the decade of the 1970s the U.S. economy experienced its worst performance in four decades. Rising U.S. inflation and stagnant productivity growth were responsible for the worst economic performance of any Western country. The institute has published a number of studies on specific economic problems: on energy, planning, health care, tax reform, international trade, and other subjects. This is our first attempt to present an integrated view of the economy as a whole, looking back at serious problems experienced in the 1970s as part of fashioning a systematic statement of what reforms are necessary to restore to the U.S. economy the growth and stability of prior decades.

**The Politics of National Security** Marcus G. Raskin, 1979-01-01 The evolution of the national security state in the United States can be traced from the political, military, and economic dimensions of American power in the postwar world. In Raskin's view, the United States emerged from the Second World War with tremendously increased prestige and material power, and American leadership created a national security apparatus as a planning instrument to ensure national stability, to mute class conflicts, and to secure the domestic economy. This state then became the basis around the world for covert and overt imperialism. The consensus that developed served to maintain stability at home and to guide the modern empire abroad. This development required a state that was orderly and that was predicated on modern bureaucracy which operated within the values and assumptions of the ruling elites. The national security state system was successful primarily in the economic sphere with bipartisan foreign policy decision making aimed at ensuring a stable business climate at home and abroad. Military involvement in Indochina evidenced the decline of American hegemony, the genocidal nature of the arms race, and the questions raised by protestors of the sixties signaled the break up of the national security consensus. Raskin concludes the book with an examination of alternative directions, especially regarding the need and the possibilities for renewed public debate of national policy and purpose.

**New Directions in public health care** Cotton M. Lindsay, 1976 This volume is a revised edition of The Institute for Contemporary Study's report on national health insurance. NHI. The debate on the NHI program has broadened in recent years as a greatly intensified public

consciousness about costs has been faced with an enormous drain on public budgets from greatly underestimated cost estimates for Medicare and Medicaid As budget limitations reduced prospects for a full comprehensive plan the policy debate broadened The Carter administration began to emphasize its program for hospital cost containment focusing on that medical sector which had shown greatest cost increases Moreover other proposals began to make their way through congressional committees to change in a fundamental way the incentives governing medical markets These new approaches which seek fundamentally to increase competition among providers of medical care have appeared at a time when it is becoming clear that more conventional regulatory efforts at cost control have not been successful in other countries such as West Germany This edition includes an analysis of legislation currently before Congress an examination of hospital cost increases and cost containment an investigation of the politics of the NHI that asks if any major interest group involved in health care wants increased competition new research on both the NHS in Britain and Canada s relatively recent experiments with full NHI a discussion of the subsidy of health care and an analysis of the market for medical care and the effects of an NHI on the market for physicians

**NHS plc** Allyson M. Pollock,2020-05-05 Universal comprehensive health care equally available to all and disconnected from income and the ability to pay was the goal of the founders of the National Health Service This book by one of the NHS s most eloquent and passionate defenders tells the story of how that ideal has been progressively eroded and how the clock is being turned back to pre NHS days when health care was a commodity fully available only to those with money How this has come about to the point where even the shrinking core of free NHS hospital services is being handed over to private providers at the taxpayers expense is still not widely understood hidden behind slogans like care in the community diversity and local ownership Allyson Pollock demystifies these terms and in doing so presents a clear and powerful analysis of the

transition from a comprehensive and universal service to New Labour's mixed economy of health care in which hospitals with foundation status loosely supervised by an independent regulator will be run on largely market principles. The NHS remains popular. Pollock argues precisely because it created the freedom from fear that its founders promised and because its integrated non-commercial character meant low costs and good medical practice. Restoring these values in today's health service has become an urgent necessity and this book will be a key resource for everyone wishing to bring this about.
