**Postformal Education** Jennifer M. Gidley, 2016-08-05 This book explains why the current education model which was developed in the 19th century to meet the needs of industrial expansion is obsolete It points to the need for a new approach to education designed to prepare young people for global uncertainty accelerating change and unprecedented complexity The book offers a new educational philosophy to awaken the creative big picture and long term thinking that will help equip students to face tomorrow's challenges Inside readers will find a dialogue between adult developmental psychology research on higher stages of reasoning and today's most evolved education research and practice This dialogue reveals surprising links between play and wisdom imagination and ecology holism and love The overwhelming issues of global climate crisis growing economic disparity and the youth mental health epidemic reveal how dramatically the current education model has failed students and educators This book raises a planet wide call to deeply question how we actually think and how we must educate It articulates a postformal education philosophy as a foundation for educational futures The book will appeal to educators educational philosophers pre service teacher educators educational and developmental psychologists and educational researchers including postgraduates with an interest in transformational educational theories designed for the complexity of the 21st century This is the most compelling book on education I have read for many years It has major implications for all who are in a position to influence developments in teacher education and educational policy Gidley is one of the very rare scholars who can write intelligently and accessibly about the past present and future in education I was challenged and ultimately convinced by her contention that what masquerades as education today must be seen for what it is an anachronistic relic of the industrial past Gidley's challenge is to co evolve a radically new education All who seek to play a part must read this book Brian J Caldwell PhD Educational Transformations former Dean of Education at the University of Melbourne and Deputy Chair Australian Curriculum Assessment and Reporting Authority ACARA

*Educational Philosophy and New French Thought* David R. Cole, Joff P. N. Bradley, 2019-02-14 Contemporary French philosophy perhaps reached a high point during the 1970s with the likes of Gilles Deleuze Michel Foucault and Jacques Derrida Since that time thinkers such as Francois Laruelle Bernard Stiegler Quentin Meillassoux and Catherine Malabou have continued on in this strong tradition while deepening and rethinking many of the parameters that have made contemporary French philosophy so powerful and useful for understanding the contemporary condition For example new French thought has reengaged with the relationships between thought science and universal commercial interests and has investigated purposefully the possibilities of post capitalist theorising This book while not exhaustive takes the most pertinent aspects of new French thought and applies them to the philosophy of education In contemporary philosophies of education the repetitions of evidence based and neoliberal theories abound This book serves as

an antidote to the levelling off and exhaustion in thought that a capitalist takeover implies while keeping sight of the crucial relationships between science the arts and metaphysical speculation Furthermore this book represents a thoroughgoing thinking through of philosophy of education s relationships with neuroscience new scientific paradigms feminist materialisms anti correlationism technology and the socius and as such constitutes a new philosophy of education This book was originally published as a special issue of Educational Philosophy and Theory f and exhaustion in thought that a capitalist takeover implies while keeping sight of the crucial relationships between science the arts and metaphysical speculation Furthermore this book represents a thoroughgoing thinking through of philosophy of education s relationships with neuroscience new scientific paradigms feminist materialisms anti correlationism technology and the socius and as such constitutes a new philosophy of education This book was originally published as a special issue of Educational Philosophy and Theory

**Educational Philosophy** Edward J. Power, 2021-12-12 The first step in education s long road to respectability lay in the ability of its proponents to demonstrate that it was worthy of collaborating with traditional disciplines in the syllabus of higher learning The universities where the infant discipline of education was promoted benefited from scholars who engaged in teaching and research with enthusiasm and preached the gospel of scientific education These schools Teachers College Columbia University the University of Chicago and Stanford University gained a reputation as oases of pedagogical knowledge Soon public and private colleges alike introduced professional academic programs for the preparation of teachers Foremost among the subjects for these programs was education philosophy with its long history and the impeccable credentials of its ancient and modern expositors Although the principal focus of this study is the history of educational philosophy in colleges and universities it also recognizes educational philosophy s antecedents Chapters cover ancient roots Christian educational theory educational theory and the modern world philosophy and education in early America development of philosophies of education disciplinary maturity for educational philosophy and prospects There is a bibliography and an index

**The New Education in Europe** Frederick William Roman, 2019-05-28 Originally published in 1924 as outlined in the preface this book is based on the belief that the only substantial hope of rescue in the present world crisis and the saving of even civilization itself depend upon the degree to which the creative thought that the coming generations may bring is applied to a continued and purposeful reconstruction of the modes of living The world is in need as never before of stronger and more clearly conceived ideals of conscious effort in the service of humanity The salvation of society must be mined out of its own depths Much of this work must be done by those now at school and therefore we are at once led to inquire to what extent the present systems of education provide for conditions that are provocative of free and spontaneous thought In each of the several countries with which the present study is concerned there is a considerable body of men and women who have undertaken a serious and thoughtful campaign of education The pages that follow attempt to give a summary account of the origin and the likelihood of success of these several undertakings

*Educational Philosophy in the French Enlightenment* Natasha Gill,2016-04-29 Though Emile is still considered the central pedagogical text of the French Enlightenment a myriad of lesser known thinkers paved the way for Rousseau s masterpiece Natasha Gill traces the arc of these thinkers as they sought to reveal the correlation between early childhood experiences and the success or failure of social and political relations and set the terms for the modern debate about the influence of nature and nurture in individual growth and collective life Gill offers a comprehensive analysis of the rich cross fertilization between educational and philosophical thought in the French Enlightenment She begins by showing how in *Some Thoughts Concerning Education* John Locke set the stage for the French debate by transposing key themes from his philosophy into an educational context Her treatment of the abb Claude Fleury the rector of the University of Paris Charles Rollin and Swiss educator Jean Pierre de Crousaz illustrates the extent to which early Enlightenment theorists reevaluated childhood and learning methods on the basis of sensationist psychology Etienne Gabriel Morelly usually studied as a marginal thinker in the history of utopian thought is here revealed as the most important precursor to Rousseau and the first theorist to claim education as the vehicle through which individual liberation social harmony and political unity could be achieved Gill concludes with an analysis of the educational philosophical dispute between Helvetius and Rousseau and traces the influence of pedagogical theory on the political debate surrounding the expulsion of the Jesuits in 1762
