Clowes, 2014-07-14 In the three decades following Stalin's death major underground Russian writers have subverted Soviet ideology by using parody to draw attention to its basis in utopian thought Referring to utopian writing as diverse as Defoe's Robinson Crusoe Dostoevsky's Notes from Underground and Orwell's Animal Farm they have tested notions of truth reality and representation They have gone beyond their precursors by experimenting with the tensions between ludic and didactic art Edith Clowes explores these meta utopian narratives which address a wide range of attitudes toward utopia to expose the challenge that literary play poses to dogmatism and to elucidate the sense of renewal it can bring to social imagination Using both structural analysis and reception theory she introduces readers outside Russia to a fascinating body of literature that includes Aleksandr Zinoviev's The Yawning Heights Abram Terts's Liubimov Vladimir Voinovich's Moscow 2042 and Liudmila Petrushevskaya's The New Robinsons Not advocating its own utopian alternative to current social realities meta utopian fiction investigates the function of a deep human impulse to imagine project and enforce alternative social orders Clowes examines the technical innovations meta utopian writers have made in style image and narrative structure that inform fresh modes of social imagination Her analysis leads to an inquiry into the intended and real audiences of this fiction and into the ways its authors try to move them toward more sophisticated social discourse Originally published in 1993 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich

Book Presence in a Digital Age Kiene Brillenburg Wurth, Kári Driscoll, Jessica Pressman, 2018-06-28 Contrary to the apocalyptic pronouncements of paper media's imminent demise in the digital age there has been a veritable surge of creative reimaginings of books as bearers of the literary. From typographic experiments Mark Z Danielewski's *House of Leaves* Steven Hall's *The Raw Shark Texts* to accordion books Anne Carson's *Nox* from cut ups Jonathan Safran Foer's *Tree of Codes* to collages Graham Rawle's *Woman's World* from erasures Mary Ruefle's *A Little White Shadow* to mixups Simon Morris's *The Interpretations of Dreams* print literature has gone through anything but a slow inevitable death. In fact it has re-invented itself materially. Starting from this idea of media plurality *Book Presence in a Digital Age* explores the resilience of print literatures, book art and zines in the late age of print from a contemporary perspective while incorporating longer term views on media archeology and media change. Even as it focuses on the materiality of books and literary writing in the present *Book Presence* also takes into consideration earlier 20th century moments of media transition developing the concepts of presence and materiality as analytical tools to perform literary criticism in a digital age. Bringing together leading scholars, artists and publishers *Book Presence in a Digital Age* offers a variety of perspectives on the past, present and future of the book as medium, the complex relationship of materiality to virtuality and of the analog to the digital. *Encyclopedia of Social Movement Media* John D. H. Downing, 2010-10-28 This one volume encyclopedia features around 250 essays on the varied experiences of social movement media over the planet in the 20th and 21st centuries. Examining the tip of a gigantic iceberg this reference resource examines a sample of the dizzying variety of formats and experiences that comprise social movement media. Thematic essays address selected issues such as human rights media indigenous peoples media and environmentalist media and on key concepts widely used in the field such as alternative media citizens media and community media. The encyclopedia engages with all communication media broadcasting print cinema the Internet popular song street theatre graffiti and dance. Books, Bricks and Bytes Stephen R. Graubard, Paul LeClerc, 2017-07-05 Libraries are experiencing a technological revolution that goes well beyond anything that has existed since the invention of printing Not surprisingly the digital library with all that it portends for the future of the book and the periodical but also with all that it implies for the kinds of information that will be collected and disseminated will necessarily preoccupy those responsible for libraries in the new century Everything from copyright access and cost to the nature of the reading public itself is now up for re examination Books Bricks and Bytes brings together an extraordinary array of authors at the cutting edge of these concerns not only within the United States but experts drawn from Germany France Russia the United Kingdom Brazil and India James H Billington discusses the Library of Congress in the information age Ann S Okerson outlines two models for securing scholarly information Donald S Lamm discusses the shaky partnership of publishers and librarians in this new environment Klaus Dieter Lehmann provides a framework for maintaining the intellectual heritage of the past in a digitized future Each contributor shows in concrete detail and vivid illustration that the library as a world of holdings is increasingly valued as an incomparable place to access information In his preface to the book Stephen Graubard reminds us that whether or not one believes in the reality of the information revolution that is said to be overtaking the world it is obvious that the libraries being built today do not resemble those marble sanctuaries constructed in the Victorian age or in the early twentieth century This is a work that shows how libraries have been transformed from refuges from the external world to places that reflect the social and intellectual values of specific societies The idea that the library is a public trust and public resource is at the center of this unusually fine collection at the cutting edge of professional and public life
