New Horizons in Educational Computing Masoud Yazdani, 2001-01-01 **New Horizons in Educational Computing** Masoud Yazdani, 1987-01-01 *Scandinavian Conference on Artificial Intelligence 89* Hannu Jaakkola, S. Linnainmaa, 1989 **Artificial Intelligence and Human Institutions** Richard Ennals, 2012-12-06 Artificial Intelligence and Human Institutions argues that successful applications of artificial intelligence are possible only within an understanding of human institutions and the limitations of technology Products of artificial intelligence research are becoming widely available to non specialists using low cost computer systems but there has been a lack of communication between researchers and community groups Taking the weak AI position the book explores the way insights and tools from artificial intelligence can be valuable in coming to terms with real world problems Drawing on the author's extensive practical experience in AI research and research management the book brings together case studies from the fields of education training business engineering defence health and community work and suggests future directions This book deals with advanced concepts of artificial intelligence for non specialist readers while providing an introduction to state of the art developments It seeks to use AI concepts to illuminate the practical and theoretical concerns of institutions and organisations opening up possibilities for new areas of collaborative work and revealing new sources of references and ideas This is the latest title in the Artificial Intelligence and Society series and will be of interest to lecturers and students in AI education social and political sciences and business studies **Artificial Intelligence for Society** Karamjit S. Gill, 1986-07-08 Based on papers presented at the Artificial Intelligence for Society conference held in July 1985 this volume forms the basis for discussing social educational economic cultural and moral issues resulting from AI developments *Knowledge, Skill and Artificial Intelligence* Bo Göransson, Ingela Josefson, 2012-12-06 Issues raised by the Theory of Knowledge a central theme in the development of Artificial Intelligence are the main topic of this book The major questions are How is the expert's knowledge to be elicited what are the limits and possibilities How can skill be developed and maintained in a more and more computerized and abstract working life This last question is also closely related to the discussion on programs for education and training in society and working life Long term effects on skill formation in working life in relation to new technology are a very important area of research Case studies form the basis for philosophical reflections with the main concept of tacit knowledge as the central issue of skill and new technology To a great extent the discussion is based on current case studies of professional groups with experience in advanced computer technology The contributions of this book demonstrate the complicated nature of human knowledge They introduce different theoretical perspectives on the issue of knowledge acquisition and elicitation **Artificial Intelligence and Expert Systems** Stuart E. Savory, 1988 *Taking Development Seriously A Festschrift for Annette Karmiloff-Smith* Michael S. C. Thomas, Denis Mareschal, Victoria Knowland, 2021-05-16 This influential festschrift honours the legacy of Annette Karmiloff-Smith a seminal thinker in the field of child development

and a pioneer in developmental cognitive neuroscience The current volume brings together many of the researchers collaborators and students who worked with Professor Karmiloff Smith to show how her ideas have influenced and continue to influence their own research Over four parts each covering a different phase or domain of Karmiloff Smith s research career leading developmental psychologists in cognition neuroscience and computer science reflect on her extensive contribution from her early work with Piaget in Geneva to her innovative research project investigating children with Down syndrome to understand the mechanisms of Alzheimer s disease The chapters provide a mix of cutting edge science and reminiscence providing a fascinating insight into the historical contexts in which many of Annette s theoretical insights arose including such ideas as the microgenetic approach representational redescription and neuroconstructivism The chapters also provide updates about how earlier theoretical ideas have stood the test of time and present unpublished data from the early years of Annette s career Taking Development Seriously is essential reading for students and scholars in child development and developmental neuroscience

Learning With Artificial Worlds Harvey Mellar,Joan Bliss,Richard Boohan,Jon Ogborn,Chris Tompsett,2014-06-03 First Published in 1994 This book is about modelling in education It is about providing children with computer tools to enable them to create their own worlds to express their own representations of their world and also to explore other people s representations learning with artificial worlds This title is best suited for the classroom teacher who has used some modelling and now wishes to seriously consider the role of modelling within their curriculum
