**VC10: Icon of the Skies** Lance Cole,2017-03-30 An excellent account of the political battles and the commercial skulduggery and its outstanding service as a transport and tanker with the RAF Firetrench The VC10 was the nation s biggest jet airliner of its age and

regarded as the world's best looking airliner. It was safe, fast, and designed to take off from short runways in Africa and Asia at the request of its main operator BOAC, the airline that would later go on to become today's British Airways. The VC10 and the larger Super VC10 were beloved by pilots and passengers alike and became icons of the 1960s. They were hugely popular all over the world. Yet the VC10 was eclipsed by Boeing's 707, which sold by the hundreds despite the fact that the 707 was less capable and could not initially operate from the runways of the Commonwealth and old British Empire routes as the VC10 undoubtedly could. This book blends the story of VC10 development with a well-researched tale of corporate and political power play. It asks just what lay behind the sales failure of the VC10. Politics played an important part, of course, as did BOAC's tactics and a whodunnit cast of politico-corporate events and machinations at the highest level of society during the dying days of Empire in 1960s Britain. Key players in the story, from Tony Benn to famous test pilot Brian Trubshaw, Concorde are cited and quoted. By exploring this historical period in depth and highlighting all the various impediments that stood in the way of success for the VC10, Lance Cole adds an important layer to our understanding of twentieth-century history.

Automobile Manufacturers Worldwide Registry, 2015-11-17. This one-of-a-kind reference work provides essential data on some 10,700 manufacturers of automobiles, beginning with the earliest vehicle that might be so termed, Frenchman Nicolas Cugnot's steam carriage in 1770, and covering all nations in which automobiles have been built. 67 in all. Not an encyclopedia or collection of histories, this is instead a very complete registry providing essential facts about the manufacturers: complete name, location, years active, types of vehicles built, and other basic data. Compiled during more than 30 years of research, this reference even lists companies that produced just one car. Any builder of passenger-carrying vehicles, on at least two but no more than eight wheels, of any design, either mass-produced or built as one-off specials, experimental cars, prototypes, or kit cars, is included. Builders of internal combustion, steam, and electric-powered vehicles are all covered; companies that built only trucks, buses, racing cars, or motorcycles are not included. From A.A.A. to Zipper and Argentina to Yugoslavia, this is an astonishingly comprehensive resource.

**Pioneers in Marketing** D.G. Brian Jones, 2011-12-21. *Pioneers in Marketing: A Collection of Biographical Essays* discusses eight historically important marketing scholars whose careers collectively spanned over 100 years. An introductory chapter describes the role of biography in the study of marketing thought and introduces the eight subjects in this collection. Subsequent chapters describe the lives of Edward David Jones, Simon Litman, Henry Charles Taylor, Percival White, George Burton Hotchkiss, Theodore N. Beckman, David D. Monieson, and William R. Davidson, focusing on their intellectual and professional contributions to the marketing discipline. The biographies are based on rare archival materials, some personal interviews, and analysis of the subjects' major works. The final chapter draws lessons from the collection for marketing students and teachers. Several important discoveries are reported that suggest

opportunities for further research. These stories will inform and inspire students of marketing.

**World Trade Since 1431** Peter J. Hugill, 1993. In 1431 the Portuguese navigator Velho set sail into the Atlantic, establishing a trade route to the Azores.

and marking the beginning of commerce with the West as we know it today Equipped with reliable maps and instruments for open ocean navigation and highly sea worthy three masted cannon armed ships Portugal soon dominated the Atlantic trade routes until the diffusion of Portuguese technologies to wealthier polities made Holland the eventual successor owing to its geographic position and its immense commercial fleet

### **Automotive Carbon Fiber Composites** Jackie D

Rehkopf,2011-11-29 The development of new materials that are technically and economically viable is no small endeavor The risks costs and time involved in research are usually so high that only governments or private consortia can bear them And so it has been with the trajectory of carbon fiber reinforced composites which are capable of providing the lightweighting needed for fuel efficiency and the mechanical strength required for safety After a long development cycle this material is now being widely used by the military in commercial aircraft and in the automotive industry Automotive Carbon Fiber Composites From Evolution to Implementation written by Dr Jackie Rehkopf senior researcher at Plasan Carbon Composites gives a high level summary on carbon reinforced fiber composites specific to the automotive industry in today s market and its vision for the next 5 to 10 years It begins with a comprehensive and easy to read overview of how composites started to be investigated as a possible alternative to metals mostly driven by military demands going on to cover Fiber and resin types for automotive applications Composite constructions Manufacturing processes Machining and joining Reclaiming and recycling of these materials among other topics The title approaches the future with the realistic optimism of those who work with the challenges of creating new solutions to problems that will stay with us for some time to come the need to conserve energy and make transportation ever more affordable without the loss of safety Carbon fiber reinforced composites have demonstrated real value in positively addressing these issues Automotive Carbon Fiber Composites From Evolution to Implementation is an excellent guide for those involved in technical material strategy and research as well as those who need to understand the basics of this subject to support better business decisions
