New Deals The Chrysler Revival And The American System:

New Deals Robert B. Reich, John D. Donahue, 1985 *Landscapes of Power* Sharon Zukin, 1993-03-12 The momentous changes which are transforming American life call for a new exploration of the economic and cultural landscape In this book Sharon Zukin links our ever expanding need to consume with two fundamental shifts places of production have given way to spaces for services and paperwork and the competitive edge has moved from industrial to cultural capital From the steel mills of the Rust Belt to the sterile malls of suburbia to the gentrified urban centers of our largest cities the creative destruction of our economy a process by which a way of life is both lost and gained results in a dramatically different landscape of economic power Sharon Zukin probes the depth and diversity of this restructuring in a series of portraits of changed or changing American places Beginning at River Rouge Henry Ford's industrial complex in Dearborn Michigan and ending at Disney World Zukin demonstrates how powerful interests shape the spaces we inhabit Among the landscapes she examines are steeltowns in West Virginia and Michigan affluent corporate suburbs in Westchester County gentrified areas of lower Manhattan and theme parks in Florida and California In each of these case studies new strategies of investment and employment are filtered through existing institutions experience in both production and consumption and represented in material products aesthetic forms and new perceptions of space and time The current transformation differs from those of the past in that individuals and institutions now have far greater power to alter the course of change making the creative destruction of landscape the most important cultural product of our time Zukin's eclectic inquiry into the parameters of social action and the emergence of new cultural forms defines the interdisciplinary frontier where sociology geography economics and urban and cultural studies meet **The Role of Science and Technology in Competitiveness** United States. Congress. House. Committee on Science, Space, and Technology. Subcommittee on Science, Research, and Technology, 1987 *Dream Car* Dimitry Anastakis, 2024-03-26 *Dream Car* tells the story of entrepreneur Malcolm Bricklin's fantastical 1970s era Safety Vehicle 1 SV1 audaciously launched during a tumultuous breakpoint in postwar history The tale of the sexy yet safe SV1 reveals the influence of automobiles on ideas about the future technology entrepreneurship risk safety showmanship politics sex gender business and the state as well as the history of the auto industry's birth decline and rebirth Written as an open road the book invites readers to travel a narrative arc that unfolds chronologically and thematically *Dream Car*'s seven chapters have been structured so that they can be read in any order determined by whichever theme each reader finds most interesting The book also includes a musical playlist of car songs from the era and songs about the SV1 itself *A Democracy That Works* Stephen Amberg, 2022-11-25 *A Democracy That Works* argues that rather than corporate donations Republican gerrymandering and media manipulation the conservative ascendancy reflects the reconstruction of the rules that govern work that has disempowered workers Using six historical case studies from the emergence of the New Deal and its later overtaking by the conservative neoliberal agenda to today's intersectional social

justice movements Stephen Amberg deploys situated institutional analysis to show how real actors created the rules that empowered liberal democracy for 50 years and then how Democrats and Republicans undermined democracy by changing those rules thereby organizing working class people out of American politics He draws on multidisciplinary studies to argue that when employees are organized to participate at work they are also organized to participate in politics to press for accountable government In doing so the book opens up analytical space to understand the unprecedented threat to liberal democracy in the U S A Democracy That Works is a fresh account of the crisis of democracy that illuminates how historical choices about the role of workers in the polity shaped America s liberal democracy during the 20th century It will appeal to scholars of American politics and American political development labor and social movements democracy and comparative politics

Losing Time Otis Graham,1994-01-04 Industrial policy reform Otis Graham argues is an important part of a public private set of remedies but it hinges upon an improved use of policy history and of historical perspective generally He proposes an explicit if minimalist approach by the federal government that would unify and reform our de facto industrial policies in order to equip the United States with the institutional capacity to formulate industrial interventions guided by strategic vision and bipartisan participation by labor and management

The Last Great Senate Ira Shapiro,2017-12-28 The Last Great Senate tells the story of the final four years of the progressive Senate of the 1960s and 1970s which compiled a record of accomplishment unmatched in our country s history It is a narrative history of the statesman who working with an outsider president Jimmy Carter helped steer America through the crisis years of the late 1970s transcending partisanship and overcoming procedural roadblocks that have all but crippled the Senate over the past quarter century The Last Great Senate recalls a critical juncture in American politics offering a new view of the kind of leadership that will be required to restore the nation s upper house to greatness The book brings to life the renowned senators of the time Ted Kennedy Howard Baker Henry Scoop Jackson Ed Muskie Jacob Javits Robert Byrd and others while capturing the Senate as an ensemble cast in a way that no previous book has Mr Shapiro recounts a series of legislative battles including the historic fight over the Panama Canal treaty and the rescues of New York City and Chrysler that are remarkable case studies of the legislative process in action His preface to this second edition provides a compelling summary of the Senate s struggles since 1980 including the first six months of the Trump presidency The author s love of the Senate and his deep belief in its special role in our political system make the book an antidote to cynicism leaving readers with some hope that the Senate can reverse its long decline to become again what Walter F Mondale called the nation s mediator

Ivy and Industry Christopher Newfield,2004-01-21 Engages with business management theories their attraction to university administrators and their usefulness in the university if they can be reconceptualized more democratically

Storied Independent Automakers Charles K. Hyde,2009 Explores the business history of three major independent American automakers Nash Motor Company the Hudson Motor Car Company and the American Motors Company that faced fierce competition from the Big Three With

roots extending back to the first decade of the twentieth century Nash Motor Company and the Hudson Motor Car Company managed to compete and even prosper as independent producers until they merged in 1954 to form the American Motors Company which itself remained independent until it was bought in 1987 by the Chrysler Corporation In *Storied Independent Automakers* renowned automotive scholar Charles K Hyde argues that these companies while so far neglected by auto history scholars made notable contributions to automotive engineering and styling and were an important part of the American automobile industry Hyde investigates how the relatively small corporations struggled in a postwar marketplace increasingly dominated by the giant firms of Ford General Motors and Chrysler which benefited from economies of scale in styling engineering tooling marketing and sales He examines the innovations that kept the independents products distinctive from those of the Big Three and allowed them to survive and sometimes prosper against their larger competitors Hyde also focuses on the visionary leaders who managed the companies including Charles Nash Roy D Chapin Howard Coffin George Mason George Romney and Roy D Chapin Jr who have been largely unexamined by other scholars Finally Hyde analyzes the ultimate failure of the American Motors Company and the legacy it left for carmakers and consumers today *Storied Independent Automakers* is based on extensive research in archival collections generated by the three companies Residing in large part in the DaimlerChrysler Corporate Collection these sources have been seldom tapped by other scholars before this volume Auto historians and readers interested in business history will enjoy *Storied Independent Automakers*

Reconceiving Liberalism Oren M. Levin-Waldman, 2010-11-23 Levin Waldman argues that if American public policy were to be evaluated against a different set of principles ones more closely aligned with core liberal values especially the common good liberalism would be in greater harmony with contemporary public opinion and thought Liberalism rests on a moral vision of what constitutes the good life and a set of principles that can measure whether public policy accords with society's underlying philosophical principles Levin Waldman faults modern liberalism for obscuring these principles through a misplaced reliance on neutrality Liberalism he contends appears to have diverged from mainstream perceptions of traditional American values because policy is debated and formulated within the confines of this neutrality standard Levin Waldman develops a new methodology intended to take us away from the usual cost benefit analysis and move us closer to assessing public policies in terms of what best serves the common good *Robust Unionism* Arthur B. Shostak, 2019-05-15 In *Robust Unionism* Arthur B Shostak provides an informed survey of organized labor's innovations and adaptations in recent years If labor is to realize its full potential in the coming decade he contends new strategies modern technologies and novel alliances are imperative Shostak provides a wealth of case studies and anecdotes and analyses of labor's specific triumphs in a time of adversity He argues for the necessity of learning from every success as well as every failure if organized labor is to become a politically powerful and socially dynamic agent for change Manufacturing David O.
