New Directions in Parapsychology John Beloff, 1975 New directions in parapsychology John Beloff, 1975 **New Directions in Consciousness Studies** Chris Nunn, 2015-10-16 New Directions in Consciousness Studies describes a range of fresh ideas which promise to significantly advance scientific understanding of human nature Written in non specialized language the book draws upon concepts and research from history philosophy neuroscience and physics to delineate new approaches to the study of consciousness Early chapters deal with a range of ideas about our nature and suggest that mind can usefully be viewed as a type of dynamic landscape The account shows how our minds relate to their societies brains and bodies and how they differ from computers Later chapters develop a theory of the basis of consciousness SoS theory Using the physical concept of broken symmetry the author shows how conscious mind may be rooted in temporality a view that is supported by the occurrence of a wide range of anomalous phenomena Potentially valuable future lines of research are identified This is a unique and engaging book that will appeal to students and academics in the field of consciousness studies and other readers with an interest in consciousness Parapsychology, Philosophy and the Mind Fiona Steinkamp, 2015-10-02 John Beloff is one of our foremost authorities in parapsychology He is credited with an instrumental role in the acceptance of parapsychology into academia On April 21 and 22 2000 a two day international conference was held by the Koestler Parapsychology Unit of the Psychology Department at the University of Edinburgh to celebrate Beloff s eightieth birthday Most of the essays in this work were presented at this conference honoring John Beloff All of the contributors have published a number of articles in mainstream philosophy and their essays promote Beloff s greatest interest a philosophical interaction with parapsychology The book is divided into three sections and each section has three papers The papers in the first section Parapsychology Philosophy and the Mind explore the mind brain problem parapsychology and the principle of closure and a cross cultural perspective on dualism and the self The second section Parapsychology Self and Survival looks at parapsychological phenomena and the sense of self chrysalid therapy and the problem of super psi The third section Parapsychology Religion and Spirituality features papers that discuss parapsychology and how it relates to Hume s view of miracles to religion and to the origin of the Copernican hypothesis The Archetypal Process David Griffin, 1989 Archetypal Process is a pioneering study linking the ideas of process philosophy as developed by Alfred North Whitehead and Charles Hartshorne with the archetypal psychology of C G Jung and James Hillman This is the first work to examine the interconnections of these two modes of thought Archetypal Process examines the importance of cosmological thinking and the need to ground archetypal psychology in a metaphysical philosophical framework It treats the necessity for symbol and myth the nature of the spirit and language as a metaphorical vehicle of thought and finally it adds a much needed feminist perspective to the debate Handbook of Parapsychology Benjamin B. Wolman, 1986 New Directions in Parapsychological Research Joseph Harold Rush, 1964-01-01 An Introduction to Parapsychology, 5th ed.

Advances in Parapsychological Research Stanley Krippner, 2013-03-08 Montague Ullman The second volume of this series includes essays on methods and issues in ESP research Morris research findings in ESP Palmer and theories of psi Rao It thus complements the areas covered in Volume 1 the two volumes taken together providing the reader with a sound grounding in the progress and achievements of parapsychological research from its inception to the present day What is immediately striking is the rapid increase in the amount and variety of experimental reports appearing in the last decade and the increasing number of centers in which research is being carried out Work in parapsychology is moving toward a broader disciplinary base the use of more imaginative technology greater academic support and more activity on an international scale These are promising signs of a rapprochement between parapsychological research and the mainstream of science

Robert O Becker in his preface to Volume 1 holds out the hope that parapsychology will lead the way to a new view of the biological organism one going beyond mechanism to a new vision of the human being and his place in the universe Becker 1977 Heavy as this responsibility may be a careful reading of the present volume should persuade the reader that a new view is very much in order

Metaphors of Consciousness Ronald S. Valle, Rolf von Eckartsberg, 2012-12-06 As we move into the 1980s there is an increasing awareness that our civilization is going through a profound cultural transformation At the heart of this transformation lies what is often called a paradigm shift a dramatic change in the thoughts perceptions and values which form a particular vision of reality The paradigm that is now shifting comprises a large number of ideas and values that have dominated our society for several hundred years values that have been associated with various streams of Western culture among them the Scientific Revolution of the seventeenth century The Enlightenment and the Industrial Revolution They include the belief in the scientific method as the only valid approach to knowledge the split between mind and matter the view of nature as a mechanical system the view of life in society as a competitive struggle for survival and the belief in unlimited material progress to be achieved through economic and technological growth All these ideas and values are now found to be severely limited and in need of radical revision

Kunzendorf, Anees Ahmad Sheikh, 2022-10-15 Serving to bridge the gap between differing approaches to psychology this new text provides some of the most compelling evidence yet for the subjective presence and objective efficacy of the mental image In this day and age of dissociation between physiological psychologists and other psychologists between cognitive scientist and mentalist between researchers and practitioners mental imagery and its psychophysiology pose some intellectually sticky problems and some promising resolutions that should bind together differing disciplines within psychology

Mortal Minds Gerald M.

Woerlee,2010-06-03 With its easy to read and personal style this book provides some intriguing new explanations of the physiology of death and the dying experience Susan Blackmore PhD Author of Dying to Live Dying is the last conscious experience undergone by each person But what do the dying experience In the last few decades a good deal of publicity has surrounded people who have been close to death and then reported intense experiences that seem to suggest a supernatural existence beyond death Does the conscious mind somehow continue to exist after the body has passed away Mortal Minds answers these questions Dr G M Woerlee explains how the normal functioning of the human body near death can generate beliefs in the reality of the supernatural and life after death An anesthesiologist with more than twenty years of hospital experience Dr Woerlee has been struck over the years by the similarities between the body's symptoms under anesthesia and its reactions near death Among the issues he addresses are the sensations of being disembodied that those near death often describe the perception that mind and body are separate components of existence whether there is such a thing as a soul the physical effects of decreased oxygen to the brain and the visions that the dying sometimes report from rapturous experiences of eternal peace to diabolical dreams While not dismissing near death experiences as mere hallucinations Dr Woerlee is also careful to point out that even powerful psychological impressions by themselves do not constitute scientific proof of life after death Taking this balanced objective stance he succeeds in conveying a better understanding of the dying process and helping us all to realize the nature of these final experiences G M Woerlee Leiden The Netherlands is an anesthesiologist affiliated with the Rijnland Hospital in Leiderdorp The Netherlands and the author of two books on anesthesiology
