Race Rules Baodong Liu, James M. Vanderleeuw, 2007-10-15 *Race Rules Electoral Politics in New Orleans 1965 2006* examines one of the innumerable ramifications of Hurricane Katrina a reversal in the decades long process of racial transition from white dominant to black dominant The electoral consequences of such a racial change in a city where race has historically played a pronounced social economic and political role are potentially dramatic In light of the 2006 New Orleans mayoral election the following emerges as a significant question Does a change in the population's racial composition mean a reversal in the political status of

African Americans in New Orleans To address this question Liu and Vanderleeuw investigate racial voting patterns in New Orleans municipal elections over a forty year span from 1965 to 2006 Race Rules argues that as an enduring influence in urban politics race manifests as either electoral conflict or electoral accommodation but not as acceptance of the political empowerment of other race members What Can You Say? John Hartigan Jr.,2010-06-10 We are in a transitional moment in our national conversation on race Despite optimistic predictions that Barack Obama s election would signal the end of race as an issue in America the race related news stories just keep coming Race remains a political and polarizing issue and the sprawling unwieldy and often maddening means we have developed to discuss and evaluate what counts as racial can be frustrating In What Can You Say John Hartigan Jr examines a watershed year of news stories taking these events as a way to understand American culture and challenge our existing notions of what is racial or not The book follows race stories that have made news headlines including Don Imus s remarks about the Rutgers women s basketball team protests in Jena Louisiana and Barack Obama s presidential campaign to trace the shifting contours of mainstream U S public discussions of race as they incorporate new voices words and images Focused on the underlying dynamics of American culture that shape this conversation this book aims to make us more fluent in assessing the stories we consume about race Advancing our conversation on race hinges on recognizing and challenging the cultural conventions governing the ways we speak about and recognize race In drawing attention to this curious cultural artifact our national conversation on race Hartigan ultimately offers a way to to understand race in the totality of American culture as a constantly evolving debate As this book demonstrates the conversation is far from over *Immigrants and Electoral Politics* Heath Brown,2016-08-31 In *Immigrants and Electoral Politics* Heath Brown shows why nonprofit electoral participation has emerged in relationship to new threats to immigrants on one hand and immigrant integration into U S society during a time of demographic change on the other Immigrants across the United States tend to register and vote at low rates thereby limiting the political power of many of their communities In an attempt to boost electoral participation through mobilization some nonprofits adopt multifaceted political strategies including registering new voters holding candidate forums and phone banking to increase immigrant voter turnout Other nonprofits opt to barely participate at all in electoral politics preferring to advance the immigrant community by providing exclusively social services Brown interviewed dozens of nonprofit leaders and surveyed hundreds of organizations To capture the breadth of the immigrant experience Brown selected organizations operating in traditional centers of immigration as well as new gateways for immigrants across the South Florida Illinois Michigan New Jersey New York and North Carolina The stories that emerge from his research include incredible successes in mobilizing immigrant communities including organizations that registered sixty thousand new immigrant voters in New York They also reveal efforts to suppress nonprofit voter mobilization in Florida and describe the organizational response to hate crimes directed at immigrants in Illinois Electoral Politics in Sri Lanka S. Keethaponcalan,2022-07-21 This volume examines and analyses

electoral politics in Sri Lanka through the theoretical framework of manipulation The following questions guided the study how do political actors manipulate elections and what are the salient features of electoral politics in Sri Lanka Primary and secondary data formed the basis of the analysis examining eight presidential elections The research findings indicated that Sri Lankan governments political parties and political leaders have taken advantage of six types of electoral manipulation including constitutional tinkering field fixing time fixing vote suppression process manipulation and resource manipulation Through a close examination of eight presidential elections research carried out for the volume found that elections are often associated with violence presidential elections are mainly a majoritarian affair in which minority communities play only a marginal role there is a significant gender imbalance as women s participation in the electoral process is very limited despite the presence of a large number of candidates contesting the election it always remains a two way race and amid extensive manipulation and other problems voter participation tends to be high This volume will be a valuable resource for students academics and researchers who focus on democracy good governance electoral studies and South Asian politics and history and will enhance the conceptual foundation of democracy advocates and activists

Gender, Race, and Office Holding in the United States Becki Scola, 2013-12-04 Over the past several decades the number of women elected to higher office in the United States has grown substantially However when the electoral gains of women are considered on a state by state basis there are observable variations in the rate by state at which women are elected to state legislative office Scholars have noted an additional variation in women office holders that women of color serve at higher rates than white women Becki Scola s book provides an explanation for these two interrelated puzzles on electoral gender gaps She examines the factors surrounding the uneven proportional distribution of female legislators and then explores why gender appears to be an advantage for women of color office holders Through an examination of the divergent state level institutional and environmental conditions Scola maps out the factors that contribute to more or less female legislative service and how race ethnicity intersects with these conditions She reveals that the common conceptions and theories that help us understand women s office holding in general do not equally apply to both white women and women of color s legislative service The first book length study to analyze how race informs gender in terms of patterns of office holding **Gender Race and Office Holding in the United States** provides insight into both underrepresentation in general as well as the underlying dynamics of representation within specific groups of women

British and American Electoral Politics in the Age of Neoliberalism Gerald Sussman, 2024-09-05 This book employs a political economic approach in exploring the underlying neoliberal foundations of politics and electioneering in both the United States and the United Kingdom that have widened the divide among voters and over time led to a deep distrust of state institutions including electoral politics and system of political representation Covering the period of 1980 to the present the book

provides analysis of how neoliberalism applies to the electoral sphere and draws the connections between the larger forces behind the globalising political economy and the trajectory of the corporate state and the many intersections of US and UK electoral politics with lessons for other wealthy states that follow in similar pathways As such it helps explain a phenomenal parallel pattern of major political upheavals and social dislocations within these two countries Finally it reveals through numerous social indicators that the two leading neoliberal political economic systems are producing depressing results for large sections of their citizenry and a threat to social democracy as the concentration of wealth and well being is largely captured by a minority class of empowered individuals This book will be of key interest to scholars and students of electoral politics political parties political behaviour British politics U S politics and more broadly to readers interested in political economy and comparative politics

Challenging the Growth Machine Barbara Ferman, 1996 Economic development and urban growth are the contested grounds of urban politics Business elites and politicians tend to forge pro growth coalitions centered around downtown development while progressive and neighborhood activists counter with a more balanced approach that features a strong neighborhood component Urban politics is often shaped by this conflict which has intellectual as well as practical dimensions In some cities neighborhood interests have triumphed in others the pro growth agenda has prevailed In this illuminating comparative study Barbara Ferman demonstrates why neighborhood challenges to pro growth politics were much more successful in Pittsburgh than they were in Chicago Operating largely in the civic arena Pittsburgh's neighborhood groups encountered a political culture and institutional structure conducive to empowering neighborhood progressivism in housing and economic development policymaking In contrast the pro growth agenda in Chicago was challenged in the electoral arena which was dominated by machine ward based politicians who regarded any independent neighborhood organizing as a threat Consequently neighborhood demands for policymaking input were usually thwarted Besides revealing why the development policies of two important American cities diverged Ferman's unique comparative approach to this issue significantly expands the scope of urban analysis Among other things it provides the first serious study to incorporate the civic sector neighborhood politics as an important component of urban regimes Ferman also emphasizes institutional and cultural factors often ignored or relegated to residual roles in other studies and expounds on their influence in shaping local politics and policy To add an analytical and normative dimension to urban analysis she focuses on the non elite actors not just the economic and political elites who compose governing coalitions Ultimately Ferman takes a more holistic and balanced view of large cities than is typical for urban studies as she argues that neighborhoods are an important integral part of what cities are and can be For that reason especially her work will have a profound impact upon our understanding of urban politics

Housing and Race in Industrial Society David H. McKay, 2020-07-26 This is a comparative study of the relationship between civil rights law housing and urban policy in Britain and the United States It focuses on the ways in which governments have attempted to remove racial discrimination and

disadvantage in private and public sector housing The study first published in 1977 does not simply consist of an account of administrative and judicial attempts to remove discrimination A major concern is to place civil rights laws in their total political economic and social environments The book explains and compares the nature of racial residential change in both countries and assesses the impact of civil rights law on existing patterns of discrimination and disadvantage Other public policies in particular housing and urban policies are examined and their relationship to anti discrimination measures is analysed In explaining differences between the two countries emphasis is placed on the role of government in urban society the political economies of urban areas and the social and political differences between minority groups Finally the study identifies the limits to effective civil rights law enforcement and provides some indication as to the policy alternatives open to decision makers in the two countries
