passenger travel was once the dominant player as were overnight steamships both slipped away in importance The overnight steamships disappeared completely and the rail companies almost did as well Walsh then details how rail travel surged back to the point where faster and more frequent electrified trains are once again in vogue and enjoying a major renaissance He examines the environmental fiscal and technology factors that caused this and looks at today's titans of transportation Including a host of illustrations The Battle for Transportation Supremacy shows how history is in part a prologue to the future Will a major success on the corridor's northern half be the model to further higher speed rail in the United States

Platt, 2019-04-23 As China reclaims its position as a world power Imperial Twilight looks back to tell the story of the country's last age of ascendancy and how it came to an end in the nineteenth century Opium War As one of the most potent turning points in the country's modern history the Opium War has since come to stand for everything that today's China seeks to put behind it In this dramatic epic story award winning historian Stephen Platt sheds new light on the early attempts by Western traders and missionaries to open China even as China's imperial rulers were struggling to manage their country's decline and Confucian scholars grappled with how to use foreign trade to China's advantage The book paints an enduring portrait of an immensely profitable and mostly peaceful meeting of civilizations that was destined to be shattered by one of the most shockingly unjust wars in the annals of imperial history Brimming with a fascinating cast of British Chinese and American characters this riveting narrative of relations between China and the West has important implications for today's uncertain and ever changing political climate Bibliographic Guide to Technology New York Public Library.
