*Chemical Process Equipment - Selection and Design (Revised 2nd Edition)* James R. Couper,W Roy Penney,James R. Fair PhD,2009-08-11 A facility is only as efficient and profitable as the equipment that is in it this highly influential book is a powerful resource for chemical process or plant engineers who need to select design or configures plant successfully and profitably It includes updated information on design methods for all standard equipment with an emphasis on real world process design and performance The comprehensive and influential guide to the selection and design of a wide range of chemical process equipment used by engineers globally Copious examples of successful applications with supporting schematics and data to illustrate the functioning and performance of equipment Revised edition new material includes updated equipment cost data liquid solid and solid systems and the latest information on membrane separation technology Provides equipment rating forms and manufacturers data worked examples valuable shortcut methods rules of thumb and equipment rating forms to demonstrate and support the design process Heavily illustrated with many line drawings and schematics to aid understanding graphs and tables to illustrate performance data     **Tunnelling for a Better Life** Jinxiu

Yan, Tarcisio Celestino, Markus Thewes, Erik Eberhardt, 2024-05-29 Tunnelling for a Better Life contain the contributions presented at the ITA AITES World Tunnel Congress 2024 which was held from 19-25 April 2024 in Shenzhen China. As urbanization accelerates, the pivotal role of tunnels and underground spaces in fostering environmental sustainability and improving quality of life becomes ever more pronounced. These underground structures serve as sustainable solutions to the challenges posed by rapid urban growth. By seamlessly integrating into urban landscapes, they alleviate congestion, reduce pollution, and enhance overall mobility, thus contributing to a greener and more sustainable urban environment. Moreover, tunnels and underground works provide vital support for various urban functions, such as accommodating economic activities, providing safe shelters during emergencies or disasters, and facilitating efficient utility management. They address immediate urban needs and lay the foundation for a better and more resilient future. By focusing on the latest trends in tunnelling and underground engineering and looking ahead to the era of low carbon and intelligent technology, the papers in this book illustrate the transformative potential of tunnels and underground works in shaping a better life for present and future generations. The contributions cover a comprehensive range of topics on tunnel engineering, showcasing the latest advancements, insights, and innovations across the following areas: 1. Planning and General Aspects, 2. Design and Methodology, 3. Geotechnics, Geology, and Geophysical Prospecting, 4. Ground Stability and Consolidation, 5. Support and Lining, 6. Conventional Tunnelling, 7. Mechanized Tunneling, TBM shield, 8. Immersed Tunnels, 9. Waterproofing and Drainage, 10. Instrumentation and Monitoring, Testing and Inspection, 11. Digital and Information Technology, 12. Machine Learning, 13. Underground Caverns, Underground Space Use, 14. Operational Safety, Maintenance and Repair, 15. Contractual Practices and Risk Management. *Tunnelling for a Better Life* is a must-read for professionals, engineers, owners, and other stakeholders worldwide in tunnelling and underground engineering.

*Profile of the International Filtration and Separation Industry*  
Kenneth S. Sutherland, 2004-12-17. The total world sales of filtration and separation equipment and spares are estimated at US \$29.5 billion in 2003. Good growth is forecast to continue through to 2009 on the back of the expansion in China and the fresh and wastewater segment growth rates with a CAGR of more than 6%. *Profile of the International Filtration and Separation Industry: Market Prospects to 2009*, 5th Edition. This revised and updated 5th edition includes increased coverage on the strategic direction of the industry, plus it offers forecasts, analysis, and comment on the filtration and separation industry to 2009. The study also outlines the structure of the global industry, assesses market and technological trends, offers market figures and forecasts to 2009, and identifies the major players.

**Advances in Life Cycle Engineering for Sustainable Manufacturing Businesses**  
Shozo Takata, Yasushi Umeda, 2007-07-26. Life cycle engineering deals with technologies for shifting the industry from mass production and mass consumption paradigm to closed loop manufacturing paradigm in which required functions are provided for customers with the minimum amount of production. This subject is discussed from the various aspects such as life cycle design, design for environment, reduce, reuse, recycle, life cycle assessment, and sustainable

business models Advances in Life Cycle Engineering for Sustainable Manufacturing Businesses gathers together papers from the 14th International CIRP Life Cycle Engineering Conference This conference is the longest running annual meeting in the field in which papers are presented regarding developments of leading edge technologies proposals of new concepts and prominent industry case studies
