New Forms The Last 10 Years In Architecture:

Old Buildings, New Forms Francoise Bollack, 2013-11-12 It is clear that working with historic structures is both more environmentally sustainable and cost effective than new architecture and construction and many believe that the best design occurs at the intersection of old and new Fran oise Astorg Bollack presents 28 examples gathered in the United States and throughout Europe and the Middle East Some are well known Mass MOCA Market Santa Caterina in Barcelona Neues Museum in Berlin and others are almost anonymous But all demonstrate a unique and appropriate solution to the problem of adapting historic structures to contemporary uses This survey of contemporary additions to older buildings is an essential addition to the architectural literature I have always loved old buildings An old building is not an obstacle but instead a foundation for continued action Designing with them is an exhilarating enterprise adding to them grafting inserting knitting new pieces into the existing built fabric is endlessly stimulating Fran oise Astorg Bollack **Unified Architectural Theory:**

Homegrown Andong Lu, Pingping Dou, 2019-02-07 Today architecture in China is at a watershed Over the last decade rapid urbanisation and the burgeoning economy turned the country into a playground for the world s signature architects making it possible to realise extravagant forms and structures at a vast scale The Chinese government has now drawn a line under this phenomenon by issuing a directive calling an end to the oversized xenocentric weird buildings devoid of character or cultural heritage that have sprung up across the country requiring that urban architecture be suitable economic green and pleasing to the eye This government directive comes at a time when homegrown architecture has become increasingly self assured and reflective in its approach A new generation of architects in China in their 30s and 40s are emerging and in a wholly contemporary way they are exploring local responses to often bewildering urban and rural conditions and serious social and environmental challenges This is often expressed through a revival of interest in traditional street patterns courtyards and gardens At the same time architects are also recognising the opportunities to harness the potential of China s established manufacturing base to develop prefabricated building systems Innovative practices are employing new modes of working such as research based studio teaching and exhibitions field workshops cross disciplinary collaboration laboratory based practice design think tanks and collective projects generating a vibrant culture of design research Contributors Lu Feng Murray Fraser Xiao Fu and Wei You Xiahong Hua and Shen Zhuang Xinggang Li Yichun Liu James Shen Yehao Song Hui Wang Shuo Wang Xin Wang and Qiuye Jin Philip F Yuan and Xiang Wang Li Zhang Xin Zhang and Jingxiang Zhu Featured architects Archi Union Architects Atelier Archmixing Atelier Deshaus Atelier Li Xinggang Integrated Architecture Studio LanD Studio META Project People s Architecture Office SUP Atelier URBANUS and Zaoyuan Gardening Studio Earthen Architecture: Past, Present and Future C. Avant-Gardes Danilo Udovicki-Selb, 2020-05-14 Conventional readings of the history of Soviet art and architecture show modernist utopian aspirations as all but prohibited by 1932 under Stalin's totalitarianism Soviet Architectural Avant Gardes challenges that view Radically redefining the historiography of the period it reveals how the relationship between the Party and practicing architects was much more complex and contradictory than previously believed and shows in contrast to the conventional scholarly narrative how the architectural avant garde was able to persist at a time when it is widely considered to have been driven underground In doing so this book provides an essential perspective on how to analyse evaluate and re imagine the history of modernist expression in its cultural context It offers a new understanding of ways in which 20th century social revolutions and their totalitarian sequels inflected the discourse of both modernity and modernism The book relies on close analyses of archival documents and architectural works Many of the documents have been rarely if ever discussed in English before while the architectural projects include iconic works such as the Palace of Soviets and the Soviet Pavilion at the Paris 1937 World Exposition as well as remarkable works that until now have been neglected by architectural historians inside and outside Russia In a fascinating final chapter it also reveals for the first time the details of Frank Lloyd Wright's triumphant welcome at the First Congress of Soviet Architects in Moscow in 1937 at the height of Stalin's Terror
