The New International Labour Studies Ronaldo Munck,1988-01-01

Renewing International Labour Studies

Marcus Taylor,2013-09-13 This volume seeks to re energise the paradigm of the New International Labour Studies by detailing how struggles over the construction reproduction utilisation and restructuring of labour forces are the contested social foundations upon which the global economy stands Through a combination of theoretical works and a series of case studies the volume highlights the cutting edge of international labour studies Its expands on three pivotal areas of study within the discipline 1 the social construction of new labour forces across an expanding international division of labour 2 the self organising potential of workers particularly within non traditional sectors and 3 the possibilities for transborder labour movements to help address the asymmetrical power relationships between globalised capital and localised labour In addressing these themes the volume helps explain not only how the contemporary international division of labour is produced and reproduced but also the strengths and limits to current attempts to overcome its unequal and divisive nature This book was published as a special issue of Third World Quarterly

The "new" International Labour Studies Robin Cohen,1980

International Labour and the Third World Rosalind E. Boyd,Robin Cohen,Peter C. W. Gutkind,2023-08-11 Originally published in 1987 this book focusses on the debate around the international role of the working class and other dominated classes such as the rural and urban poor The contributions discuss whether Marx s original version of the revolutionary role of workers can still be sustained They examine the response of workers to the globalisation of production to structural unemployment in the industrialized world and to the changing composition of the workforce in the industrialising periphery The volume questions the historic starting points in the theorization of international labour

The Newest International Labour Studies Peter

Waterman,1996 Labour and Globalisation Ronaldo Munck,2004-01-01 It is often assumed that social movements such as that of labour will simply be overwhelmed by the changes brought about by globalisation This volume points to this

conclusion as at best premature and possibly also misguided **Africa in an Era of Crisis** Kofi Buenor Hadjor,1990

Labour Relations in Development Alex Fernández Jilberto, Marieke Riethof, 2002-08-22 This timely and well written collection explores the impact of economic reforms in developing and transitional economies across the world In a first of its kind this book examines such issues as in depth cross regional analysis of the pressures for global integration labour costs and their determinants crucial factors in the success of econo *Global Commodity Chains and Labor Relations* ,2021-01-18 Due to the increasing linkage of global production sites the concept of commodity chains has become indispensable for the investigation of production at a global scale Although work is the basis of production in every involved location it is often being neglected as a research subject without taking interest in the workers the work processes and the working conditions This edited volume provides a collection of historical and contemporary commodity chain studies by placing labor at the centre of analysis A global historical perspective demonstrates that splitting production processes to different hierarchically connected locations are by no means new phenomena The book is thus an important and valuable contribution to commodity chain research but also to the fields of social economic and global labour history Contributors are Andr s Pinkasz Andrea Komlosy Christin Bernhold Ernst Langthaler Franziska Ollendorf Goran Musi Jan Grumiller Johanna Sittel J rg Nowak Karin Fischer Klemens Kaps Miroslav Lacko Santosh Hasnu Stefan Schmalz Tam s Ger cs Tibor T Meszmann and Uwe Spiekermann **From Coldwar Communism to the Global Emancipatory Movement** Peter Waterman,2014-12-12 Boaventura de Sousa Santos says This is an admirable memoir of an intellectual activist who has lived most intensely the progressive struggles of the last sixty years of world history because despite being born in Europe Peter in the best tradition of communist internationalism participated in struggles and movements not only in Central and Eastern Europe but also in Africa and most recently in Latin America But this is much more than a memoir It is so well documented that in this personal experience there are reflected some of the most decisive events of contemporary history It is a living history book But even more than this this book is so clearly and vividly written that at times it reads like the script for an imaginary documentary of our times This book should be read by all concerned with our recent history in order to get a much more complex inside view of what happened while it was happening In particular it should be read by the youth in order to get a close up of the difficulties and possibilities in building another possible world at a time where there existed a vibrant international communist movement It is up to such youth to evaluate whether difficulties are now or more daunting the possibilities less of more luminous *Workers of the World Undermined* Beth Sims,1992 This book blows the lid off the AFL CIO s international efforts to forestall the formation of independent worker s organizations in Latin America Asia Africa and Europe an effort that harms workers both in this country and overseas *Free Trade and Transnational Labour* Andreas Bieler, Bruno Ciccagligione, John Hilary, Ingemar Lindberg, 2016-04-14 Resistance against free trade agreements based on an expanded trade agenda including issues related to intellectual property rights trade in services and trade related investment measures has

increased since the demonstrations at the WTO ministerial conference in Seattle in 1999 While the WTO Doha negotiations have broken down the EU and USA are increasingly engaged in bilateral free trade agreements building on this expanded trade agenda Free trade strategies have increasingly become a problem for the international labour movement While trade unions in the North especially in manufacturing have supported free trade agreements to secure export markets for their companies trade unions in the Global South oppose these agreements since they often imply deindustrialisation The purpose of this volume is to understand better these dynamics underlying free trade policy making Academics trade union researchers and social movement activists analyse these issues in detail in order to explore possibilities for transnational labour solidarity This book was published as a special issue of *Globalizations*

Social Transformation and the Global Economy Ronaldo Munck, 2024-06-28 The overall context of this book is set by the decline of the globalization paradigm s ability to grasp the complexity and uncertainty of the current era It takes a new approach based on the frame of transformation viewed as a catalyst to understand the complex interconnected nature of the world around us from a concrete grounded perspective Labour or work is still what makes the world go round and Latin America offers a unique laboratory of social transformation since the pink tide of the 2000s The left it refers to is a new non dogmatic version that does not just recycle old debates but rather opens up new perspectives The book is at once global in its ambition while grounded in labour and Latin American realities Theoretically based and empirically robust it will enthuse the reader to pursue their own research on matters covered here Part I deals with several key debates around labour including the emergence of a precariat from a standpoint that foregrounds labour agency but also the view from the South that is the majority world Part II takes up various debates around contemporary Latin America from a cultural political economy perspective with an emphasis on the dynamics of social transformation Part III explores the contributions from the broadly defined left towards an understanding of the current challenges faced by those seeking an alternative to the status quo in Latin America and beyond Providing a theoretically sophisticated yet readable text on key contemporary issues this fully interdisciplinary book will find a broad audience among researchers scholars and advanced students of labour Latin American and development studies economics sociology and politics

Mykonos, 2005-09-06 Mykonos explores the ways in which organized labour has globalized since 1945 Using two touchstone indicators the extent of cross border integration and the autonomy vis vis the state the book reveals a counterintuitive process network globalization involves a continuing orientation towards the state The book not only seeks to identify organized labour's trajectory on the macro plane but also to provide a more precise meaning of the term globalization as it relates to agency

Globalization, Social Movements, and the New Internationalism Peter Waterman, 2010-06-15 In a political climate where loose talk of a third way passes for political idealism Waterman's passionate book examines the possibilities for a new style global solidarity suited to complex capitalist modernity The author examines the past internationalism of Labour and socialists and the present one of radical democratic social movements discussing how the Left might build on this experience to recover a humanist and emancipatory tradition of internationalism which would address our multiple global social problems
