Beasley, Juliet Kaarbo, Jeffrey S. Lantis, Michael T. Snarr, 2012-04-25 Widely regarded as the most comprehensive comparative foreign policy text *Foreign Policy in Comparative Perspective* has been completely updated in this much anticipated second edition Exploring the foreign policies of thirteen nations both major and emerging players and representing all regions of the world chapter authors link the study of international relations to domestic politics while treating each nation according to individual histories and contemporary dilemmas The book's accessible theoretical framework is designed to enable comparative analysis helping students discern patterns to understand why a state acts as it does in foreign affairs *Foreign policy in Comparative Perspective: Domestic and International Influences on State Behavior* Ryan K. Beasley, 2013 In this much anticipated revision of their unique text the editors bring together fifteen top scholars to highlight the importance of both internal and external forces in foreign policymaking **The Political Economy of Transitions to Peace** Galia Press-Barnathan, 2009-07-05 Much attention has focused on the ongoing role of economics in the prevention of armed conflict and the deterioration of relations In *The Political Economy of Transitions to Peace* Galia Press Barnathan focuses on the importance of economics in initiating and sustaining peaceful relations after conflict Press Barnathan provides in depth case studies of several key relationships in the post World War II era Israel and Egypt Israel and Jordan Japan the Philippines and Indonesia Japan and South Korea Germany and France and Germany and Poland She creates an analytical framework through which to view each of these cases based on three factors the domestic balance between winners and losers from transition to peace the economic disparity between former enemies and the impact of third parties on stimulating new cooperative economic initiatives Her approach provides both a regional and cross regional comparative analysis of the degree of success in maintaining and advancing peace of the challenges faced by many nations in negotiating peace after conflict and of the unique role of economic factors in this highly political process Press Barnathan employs both liberal and realist theory to examine the motivations of these states and the societies they represent She also

weighs their power relations to see how these factor into economic interdependence and the peace process She reveals the predominant role of the state and big business in the initial transition phase cold peace but also identifies an equally vital need for a subsequent broader societal coalition in the second normalizing phase warm peace Both levels of engagement Press Barnathan argues are essential to a durable peace Finally she points to the complex role that third parties can play in these transitions and the limited long term impact of direct economic side payments to the parties Political Transitions and Foreign Affairs in Britain and France Don Krasher Price, Robert H. Frederick Starr, Karen Dawisha, 2024-11-01 This ambitious ten volume series develops a comprehensive analysis of the evolving world role of the post Soviet successor states Each volume considers a different factor influencing the relationship between internal politics and international relations in Russia and in the western and southern tiers of newly independent states The collapse of the Soviet Union and the discrediting of Marxism Leninism as a source of political legitimacy have prompted a search for fresh principles of political organization that will shape the nature of political culture in all the post Soviet countries This volume focuses on the International dimension of Post communist transitions The Miller Center Papers Pat Dunn, 1998 **"The Transformation of European Politics, 1763-1848"** Peter Krüger, Paul W. Schroeder (Eds.), in cooperation with Katja Wüstenbecker, This book takes up a question raised about the nature of the European international system in the late eighteenth early nineteenth centuries by Paul W Schroeder s pathbreaking and controversial work *The Transformation of European Politics 1763 1848* 1994 Schroeder s central claim was that the European states system underwent a fundamental transformation in the revolutionary Napoleonic and Vienna eras from a system of competitive conflictual power politics based purely on a shifting balance of power to a more consensual stable and peaceful set of relations based on legality acknowledged rights and obligations and shared norms The contributors to this volume while examining this claim primarily extend the debate to the entire history of European and world international politics from the early seventeenth century to the present If this transformation was real they ask was it only a temporary episode or does it represent an example of other transformations or structural changes in international politics over the centuries down to the present day and a possible model for change in the future **The Political Review**, 1919 **Global Transformations** David Held, 1999 In this book the authors set forth a new model of globalization that lays claims to supersede existing models and then use this model to assess the way the processes of globalization have operated in different historic periods in respect to political organization military globalization trade finance corporate productivity migration culture and the environment Each of these topics is covered in a chapter which contrasts the contemporary nature of globalization with that of earlier epochs In mapping the shape and political consequences of globalization the authors concentrate on six states in advanced capitalist societies SIACS

the United States the United Kingdom Sweden France Germany and Japan For comparative purposes other states particularly those with developing economics are referred to and discussed where relevant The book concludes by systematically describing and assessing contemporary globalization and appraising the implications of globalization for the sovereignty and autonomy of SIACS It also confronts directly the political fatalism that surrounds much discussion of globalization with a normative agenda that elaborates the possibilities for democratizing and civilizing the unfolding global transformation

Legitimacy and Power Politics Mlada Bukovansky, 2010-01-10 This book examines the causes and consequences of a major transformation in both domestic and international politics the shift from dynastically legitimated monarchical sovereignty to popularly legitimated national sovereignty It analyzes the impact of Enlightenment discourse on politics in eighteenth century Europe and the United States showing how that discourse facilitated new authority struggles in Old Regime Europe shaped the American and French Revolutions and influenced the relationships between the revolutionary regimes and the international system The interaction between traditional and democratic ideas of legitimacy transformed the international system by the early nineteenth century when people began to take for granted the desirability of equality individual rights and restraint of power Using an interpretive historically sensitive approach to international relations the author considers the complex interplay between elite discourses about political legitimacy and strategic power struggles within and among states She shows how culture power and interests interacted to produce a crucial yet poorly understood case of international change The book not only shows the limits of liberal and realist theories of international relations but also demonstrates how aspects of these theories can be integrated with insights derived from a constructivist perspective that takes culture and legitimacy seriously The author finds that cultural contests over the terms of political legitimacy constitute one of the central mechanisms by which the character of sovereignty is transformed in the international system a conclusion as true today as it was in the eighteenth century

Transition of Power Brian J. C. McKercher, 1999-02-15 This book addresses one of the least understood issues in modern international history how between 1930 and 1945 Britain lost its global pre eminence to the United States The crucial years are 1930 to 1940 for which until now no comprehensive examination of Anglo American relations exists Transition of Power analyses these relations in the pivotal decade with an epilogue dealing with the Second World War after 1941 Britain and the United States and their intertwined fates were fundamental to the course of international history in these years Professor McKercher's book dissects the various strands of the two powers relationship in the fifteen years after 1930 from a British perspective economic diplomatic naval and strategic

From Pariah to Phoenix Matthew Q. Clary, 2020-01-20 Since the end of the Cold War one of the most commonly cited threats to international has been the existence of rogue states so called because they actively defy many of the rules and norms of international politics that have been established to bring order to the international system While it is well known how such states become designated as pariahs it is less clear how such states might be re socialized into the international

community short of a forced military intervention and regime change How can a state designated as a rogue rehabilitate their national reputation among members of the international community How are members of the international community to know when such states undertake meaningful attempts at improving their reputational status This book develops a theory of reputational improvement that combines elements of existing theories on reputation in international relations with aspects of a growing literature on nation branding and public diplomacy that will show how pariah states might go about improving their reputations and more importantly convincing others that they are no longer deserving of the designation of being treated as a deviant state *Democracy and International Trade* Daniel Verdier,2021-04-13 In this ambitious exploration of how foreign trade policy is made in democratic regimes Daniel Verdier shows that special interests party ideologues and state officials and diplomats act as agents of the voters Constructing a general theory in which existing theories rent seeking median voting state autonomy function as partial explanations he shows that trade institutions are not fixed entities but products of political competition **Modern Diplomacy** R. P. Barston,2014-06-03 Modern Diplomacy provides a comprehensive exploration of the evolution and concepts of the institution of diplomacy This book equips students with a detailed analysis of important international issues that impact upon diplomacy and its relationship with international politics The subject is brought to life through the use of case studies and examples which highlight the working of contemporary diplomacy within the international political arena Organised around five broad topic areas including the nature of diplomacy diplomatic methods and negotiation the operation of diplomacy in specific areas and natural disasters and international conflict the book covers all major topic areas of contemporary diplomacy
