Embedding sustainable development across Government, after the Secretary of State's announcement on the future of the Sustainable Development Commission Great Britain: Parliament: House of Commons: Environmental Audit Committee, 2011-01-10

Funding of the Sustainable Development Commission SDC will cease at the end of March 2011 and Defra's capability and presence to improve the sustainability of Government will be increased. Whilst regretting the Government's decision to stop funding the SDC, the Committee sees an opportunity to reassess and revitalise the architecture for delivering sustainable development. The experience of SDC's work within Government departments to improve their sustainability skills and performance is at risk of being lost, so the Government must ensure that this knowledge and expertise is absorbed by departments. Sustainable development needs to be driven from the centre of Government by a Minister and department with Whitehall-wide influence. They must be capable of holding all departments to account for their sustainable development performance. The Committee does not think Defra is best placed to lead this drive and recommends that the Cabinet Office assume this role. And the Treasury could use its position to continue to develop sustainability reporting by departments, strengthen the system of impact assessments and the Green Book investment appraisal methodology for policy making and embed the results of the Government Economic Service review of the economics of sustainability and environmental valuation into those impact assessments and appraisals. Greater political leadership from the top should be brought to bear. The Government must introduce a full set of indicators to measure sustainable development that can be used to develop policy and must provide a new strategic underpinning for its commitment to sustainable development as an overarching goal of Government policy making.

Strategic Management in the Public Sector Paul Joyce, 2015-02-11 Strategic management is widely seen as essential to the public services leading to better performance and better outcomes for the public. In fact, the private sector idea of strategic management has become so powerful in the public sector that politicians and policy makers have begun to talk about the importance of the modern state being strategic and we may be witnessing the emergence of the Strategic State. Strategic Management for the Public Sector draws on experience and research from a range of countries and provides a theoretical understanding of strategic management that is grounded in the public sector. Drawing on the latest theory and research, this text provides a fresh look at foresight analysis, strategic choice, implementation and evaluation. This book also offers original and detailed case studies based on up-to-date evidence from different public sector settings, helping the reader to build on their understanding of theories and concepts presented earlier in the book. Strategic Management for the Public Sector has been written specially for managers and students taking postgraduate courses such as MBAs and MPAs. It will also appeal to individual managers and civil servants in the public sector looking for an accessible book to read as part of their own independent personal development.
