Politics And Rhetoric Of Scientific Method:

The Politics and Rhetoric of Scientific Method J. Schuster, R.R. Yeo, 2012-12-06 The institutionalization of History and Philosophy of Science as a distinct field of scholarly endeavour began comparatively early though not always under that name in the Australasian region An initial lecturing appointment was made at the University of Melbourne immediately after the Second World War in 1946 and other appointments followed as the subject underwent an expansion during the 1950s and 1960s similar to that which took place in other parts of the world Today there are major Departments at the University of Melbourne the University of New South Wales and the University of Wollongong and smaller groups active in many other parts of Australia and in New Zealand Australasian Studies in History and Philosophy of Science aims to provide a distinctive publication outlet for Australian and New Zealand scholars working in the general area of history philosophy and social studies of science Each volume comprises a group of essays on a connected theme edited by an Australian or a New Zealander with special expertise in that particular area Papers address general issues however rather than local ones parochial topics are avoided Further more though in each volume a majority of the contributors is from Australia or New Zealand contributions from elsewhere are by no means ruled out Quite the reverse in fact they are actively encouraged wherever appropriate to the balance of the volume in question

The Scientific Method Henry M. Cowles, 2020-04-14 The scientific method is just over a hundred years old From debates about the evolution of the human mind to the rise of instrumental reasoning Henry M Cowles shows how the idea of a single scientific method emerged from a turn inward by psychologists that produced powerful epistemological and historical effects that are still with us today

Descartes-Agonistes John Schuster, 2012-10-23 This book reconstructs key aspects of the early career of Descartes from 1618 to 1633 that is up through the point of his composing his first system of natural philosophy *Le Monde* in 1629-33 It focuses upon the overlapping and intertwined development of Descartes projects in physico mathematics analytical mathematics universal method and finally systematic corpuscular mechanical natural philosophy The concern is not simply with the conceptual and technical aspects of these projects but with Descartes agendas within them and his construction and presentation of his intellectual identity in relation to them Descartes technical projects agendas and senses of identity shifted over time entangled and displayed great successes and deep failures as he morphed from a mathematically competent Jesuit trained graduate in neo Scholastic Aristotelianism to aspiring prophet of a systematised corpuscular mechanism passing through stages of being a committed physico mathematicus advocate of a putative universal mathematics and projector of a grand methodological dream In all three dimensions projects agendas and identity concerns the young Descartes struggled and contended with himself and with real or virtual peers and competitors hence the title *Descartes Agonistes*

Politics and Rhetoric James Martin, 2013-10-08 Rhetoric is the art of speech and persuasion the study of argument and in Classical times an essential component in the education of the citizen For rhetoricians politics is a skill to be performed and not merely

observed Yet in modern democracies we often suspect political speech of malign intent and remain uncertain how properly to interpret and evaluate it Public arguments are easily dismissed as mere rhetoric rather than engaged critically with citizens encouraged to be passive consumers of a media spectacle rather than active participants in a political dialogue This volume provides a clear and instructive introduction to the skills of the rhetorical arts It surveys critically the place of rhetoric in contemporary public life and assesses its virtues as a tool of political theory Questions about power and identity in the practices of political communication remain central to the rhetorical tradition how do we know that we are not being manipulated by those who seek to persuade us Only a grasp of the techniques of rhetoric and an understanding of how they manifest themselves in contemporary politics argues the author can guide us in answering these perennial questions Politics and Rhetoric draws together in a comprehensive and highly accessible way relevant ideas from discourse analysis classical rhetoric updated to a modern setting relevant issues in contemporary political theory and numerous carefully chosen examples and issues from current politics It will be essential reading for all students of politics and political communications

The Journal of Philosophy, Psychology and Scientific Methods ,1915 Scientific Method Frederic William Westaway,1924 **The Morality of Spin** Nathaniel J. Klemp,2012-03-01 The Morality of Spin explores the ethics of political rhetoric crafted to persuade and possibly manipulate potential voters Based on extensive insider interviews with leaders of Focus on the Family one of the most powerful Christian right organizations in America Nathaniel Klemp asks whether the tactic of tailoring a message to a particular audience is politically legitimate or amounts to democratic malpractice Klemp s nuanced assessment highlighting both democratic vices and virtues of the political rhetoric provides a welcome contribution to recent scholarship on deliberative democracy rhetoric and the growing empirical literature on the American Christian right *Disruption of Habits During the Pandemic* AA: VV:,2022-09-23T00:00:00+02:00 In the year 2020 what we used to think that our habits have been profoundly disrupted Lockdown still represents an unprecedented experience for all of those who went through it since it radically affected our freedom of movement and social interaction that used to make up our everyday lives Some people believe that once the pandemic ends nothing will be the same Others think that once the virus becomes weaker or a vaccine is at our disposal and the fear is diminished everything will go back to normal because the mechanism of habit is in many ways similar to the mechanisms of nature reiterating the uniformity of its functioning Who is right then Both positions perhaps When philosophers addressed the issue of customs namely collective habits generally emphasized the caution required when it comes to changing them and if we look back on history Could pandemics affect shared habits in specific territories as ultimately generated in reaction to other natural risks and or to their threats **Business as Usual** Caroline Jack,2024-10-22 How corporations used mass media to teach Americans that capitalism was natural and patriotic exposing the porous line between propaganda and public service Business as Usual reveals how American capitalism has been promoted in the most ephemeral of materials public service announcements

pamphlets educational films and games what Caroline Jack calls sponsored economic education media These items which were funded by corporations and trade groups who aimed to sell America to Americans found their way into communities classrooms and workplaces and onto the airwaves where they promoted ideals of free enterprise under the cloaks of public service and civic education They offered an idealized vision of US industrial development as a source of patriotic optimism framed business management imperatives as economic principles and conflated the privileges granted to corporations by the law with foundational political rights held by individuals This rhetoric remains dominant a harbinger of the power of disinformation that so besets us today Jack reveals the funding production and distribution that together entrenched a particular vision of corporate responsibility and in the process shut out other hierarchies of value and common care

Teaching Writing, Rhetoric, and Reason at the Globalizing University Robert Samuels, 2020-11-25 This timely intervention into composition studies presents a case for the need to teach all students a shared system of communication and logic based on the modern globalizing ideals of universality neutrality and empiricism Based on a series of close readings of contemporary writing by Stanley Fish Asao Inoue Doug Downs and Elizabeth Wardle Richard Rorty Slavoj Žižek and Steven Pinker this book critiques recent arguments that traditional approaches to teaching writing grammar and argumentation foster marginalization oppression and the restriction of student agency Instead it argues that the best way to educate and empower a diverse global student body is to promote a mode of academic discourse dedicated to the impartial judgment of empirical facts communicated in an open and clear manner It provides a critical analysis of core topics in composition studies including the teaching of grammar notions of objectivity and neutrality empiricism and pragmatism identity politics and postmodernism Aimed at graduate students and junior instructors in rhetoric and composition as well as more seasoned scholars and program administrators this polemical book provides an accessible staging of key debates that all writing instructors must grapple with

The Consequences of Economic Rhetoric Arjo Klammer, Deirdre N. McCloskey, Robert M. Solow, 1988 The papers in this volume are drawn from a recent conference at Wellesley College for both theoretical and applied economists which explored the consequences of rhetoric and conversation within the field of economics

Evaluating New Labour's Welfare Reforms Martin Powell, 2002-07-17 This title provides a detailed study of the welfare reforms of New Labour's first term It compares achievements with stated aims examines success in the wider context and contributes to the debate on the problems of evaluating social policy

Philosophy, Rhetoric, and Thomas Hobbes Timothy Raylor, 2018-11-08 Thomas Hobbes claimed to have founded the discipline of civil philosophy political science The claim did not go uncontested and in recent years the relationship of philosophical reasoning to rhetorical persuasion in Hobbes's work has become a significant area of discussion as scholars attempt to align his disparaging remarks about rhetoric with his dazzling practice of it in works like *Leviathan* The dominant view is that having rejected an early commitment to humanism and with it rhetoric when he adopted the scientific approach to philosophy in the late 1630s Hobbes later came to re-embrace

it as an essential aid to or part of philosophy Philosophy Rhetoric and Thomas Hobbes proposes that Hobbes was from first to last dubious about the place of rhetoric in civil society and came to see it as a pernicious presence within philosophy a position from which he did not retreat It offers a fresh and expanded picture of Hobbes s humanism by examining his years as a country house tutor his teaching and his translation of Thucydides the influence on him of Bacon and the range of his early natural historical and philosophical interests In demonstrating the distinctively Aristotelian character of his understanding of rhetoric the book also revisits the new approach to philosophy Hobbes adopted at the end of the 1630s clarifying the nature and scope of his concern about the contamination of philosophy and political life by the procedures of rhetorical argumentation

Ancient Rhetoric and Poetic Charles Sears Baldwin,1924

Leadership Performance and Rhetoric Adam B. Masters,John Uhr,2017-08-16 This book examines both the rhetorical content of contemporary public leadership and the leadership methods pioneered by early English statesman Sir Francis Bacon In particular it considers the use of public rhetoric to defend leadership legitimacy in six case studies drawing on leadership contests in recent Australian political history The authors map out the complex language of leadership in contemporary politics through chapter length portraits of the inter related political rhetoric of prime ministers Rudd Gillard Abbott and Turnbull plus former foreign minister Bob Carr and indigenous leader Noel Pearson The process is a novel application of leadership analysis derived from the political philosophy of Francis Bacon who emerges as a founder of the study and indeed practice of political and public leadership The book will appeal to students and scholars across the fields of political science communication and rhetorical studies and political history

Science and Politics Brent S. Steel,2014-04-21 Recent partisan squabbles over science in the news are indicative of a larger tendency for scientific research and practice to get entangled in major ideological divisions in the public arena This politicization of science is deepened by the key role government funding plays in scientific research and development the market leading position of U S based science and technology firms and controversial U S exports such as genetically modified foods or hormone injected livestock This groundbreaking one volume A to Z reference features 120 150 entries that explore the nexus of politics and science both in the United States and in U S interactions with other nations The essays each by experts in their fields examine Health environmental and social cultural issues relating to science and politics Concerns relating to government regulation and its impact on the practice of science Key historical and contemporary events that have shaped our contemporary view of how science and politics intersect Science and Politics An A to Z Guide to Issues and Controversies is a must have resource for researchers and students who seek to deepen their understanding of the connection between science and politics

Romanticism,

Rhetoric and the Search for the Sublime, 2nd Edition Craig R. Smith, 2023-01-23 Relying on the author's established expertise in rhetoric and political communication this book re contextualizes Romantic rhetorical theory from the late 18th and early 19th centuries to provide a foundation for a Neo Romantic rhetorical theory for our own time In the process it uses a unique methodology to correct misconceptions about the rhetorical theories of many writers Using a dialectical approach the early chapters trace Romanticism through its opposition to the industrial revolution and the Enlightenment back through Humanism and its opposition to Scholasticism to its roots in St Augustine's writing These chapters include a revisionist analysis of the church's treatment of Galileo in the course of showing how difficult it was for scientific study to be accepted in Scholastic circles The study goes on to argue that Jean Jacques Rousseau David Hume and Edmund Burke were bridge figures to the Romantic Era This move throws new light on exemplary painters composers writers and orators of the Romantic Era who are examined in chapters eight and nine Chapter ten focuses on Percy Bysshe Shelley and his development of the rhetorical poem and thereby provides a new genre in the Romantic catalogue Chapter Eleven turns to the Romantic rhetorical theories of Hugh Blair and Thomas De Quincey to empower those seeking to save the environment The concluding chapter then synthesizes their theories with relevant contemporary rhetorical theories thereby constructing a Neo Romantic theory for our own time In the process the book links the Romantics' love of nature to the current environmental crisis

Exploring the Scientific Method Steven Gimbel, 2011-04-15 From their grade school classrooms forward students of science are encouraged to memorize and adhere to the scientific method a model of inquiry consisting of five to seven neatly laid out steps often in the form of a flowchart But walk into the office of a theoretical physicist or the laboratory of a biochemist and ask Which step are you on and you will likely receive a blank stare This is not how science works But science does work and here award winning teacher and scholar Steven Gimbel provides students the tools to answer for themselves this question What actually is the scientific method Exploring the Scientific Method pairs classic and contemporary readings in the philosophy of science with milestones in scientific discovery to illustrate the foundational issues underlying scientific methodology Students are asked to select one of nine possible fields astronomy physics chemistry genetics evolutionary biology psychology sociology economics or geology and through carefully crafted case studies trace its historical progression all while evaluating whether scientific practice in each case reflects the methodological claims of the philosophers This approach allows students to see the philosophy of science in action and to determine for themselves what scientists do and how they ought to do it Exploring the Scientific Method will be a welcome resource to introductory science courses and all courses in the history and philosophy of science
