The Natural History of Sexuality in Early America Greta LaFleur, 2018-11-15 How natural history made sex scientific in the eighteenth century If sexology the science of sex came into being sometime in the nineteenth century then how did statesmen scientists and everyday people make meaning out of sex before that point In *The Natural History of Sexuality in Early America* Greta LaFleur demonstrates that eighteenth century natural history the study of organic life in its environment actually provided the intellectual foundations for the later development of the scientific study of sex Natural historians understood the human body to be a porous envelope eminently vulnerable to its environment Yet historians of sexuality have tended to rely on archival evidence of genital based or otherwise bodily sex acts for source material Through careful readings of both elite natural history texts and popular print forms that circulated widely in the British North American colonies among them Barbary captivity execution cross dressing and anti vice narratives LaFleur traces the development of a broad knowledge of sexuality defined in terms of the dynamic relationship between the human and the natural social physical and climatic milieu At the heart of this book is the question of how to produce a history of sexuality for an era in which modern vocabularies for

sex and desire were unavailable LaFleur demonstrates how environmental logic was used to explain sexual behavior on a broad scale not just among the educated elite who wrote and read natural historical texts LaFleur reunites the history of sexuality with the history of race demonstrating how they were bound to one another by the emergence of the human sciences Ultimately *The Natural History of Sexuality in Early America* not only rewrites all dominant scholarly narratives of eighteenth century sexual behavior but also poses a major intervention into queer theoretical understandings of the relationship between sex and the subject *Biopower, Racism, State Racism and The Modern/Post Modern North Atlantic State: Michel Foucault's Genealogy of the Historico-Political Discourse of Race War Deconstructed* Daurius Figueira, 2018-09-02 The wave of white supremacist discourse impacting North Atlantic politics in the 21st century is yet to be effectively explained by linking this political reality to the power relations of these North Atlantic States This book presents this analysis by deconstructing a genealogy of the historico political discourse of race war Michel Foucault presented in his 1976 public lecture at the College de France where the key discursive concepts of Biopower Racism and State Racism formulated by Michel Foucault expose the nexus between racism and the nature of the North Atlantic State This book insists that in the 21st century North Atlantic hegemonic austere neo liberal financial market capitalism is now utilising a discourse of paranoid extremist militarist white supremacist discourse with a siege mentality to maintain its hegemony over its world empire potently reflected in the politics of the North Atlantic **21st Century Sociology: A Reference Handbook** Clifton D. Bryant, Dennis L. Peck, 2006-11-17 21st Century Sociology A Reference Handbook provides a concise forum through which the vast array of knowledge accumulated particularly during the past three decades can be organized into a single definitive resource The two volumes of this Reference Handbook focus on the corpus of knowledge garnered in traditional areas of sociological inquiry as well as document the general orientation of the newer and currently emerging areas of sociological inquiry **Political Bodies** Paula Landerreche Cardillo, Rachel Silverbloom, 2024-03-01 Adriana Cavarero has been and continues to be one of the most innovative and influential voices in Italian political and feminist thought of the last forty years Known widely for her challenges to the male dominated canon of political philosophy and philosophy more broadly construed Cavarero has offered provocative accounts of what constitutes the political with an emphasis on embodiment singularity and relationality *Political Bodies* gathers some of today's most prominent and well established theorists along with emerging scholars to contribute their insights questions and concerns about Cavarero's political philosophy and to put her work in conversation with other feminist thinkers political theorists queer theorists and thinkers of race and coloniality A new essay by Adriana Cavarero herself closes out the volume *Political Bodies* ventures beyond the familiar boundaries of Cavarero's own writing and is a testament to the generative encounters that her philosophy makes possible *The Rhetoric of Hindutva* Manisha Basu, 2017 Examines the rise of the urban right wing Hindu nationalist ideology in India called Hindutva between 1984 and 2004 *The New Blackwell Companion to Social Theory* Bryan S. Turner, 2016-09-26 A comprehensive

Oriental Bodies James A. Tyner, 2006-01-01 *Oriental Bodies* charts the discursive transformations of U S immigration policy between 1875 and 1942 Author James Tyner concentrates on the confluence of eugenics geopolitics and Orientalism as these intersect in the debates surrounding the exclusion of immigrants from China Japan and the Philippines This unique work argues that United States immigration policy was founded on a particular discourse of eugenics and geopolitics and that this concentration was informed by a greater Orientalist discourse Drawing from American foreign policy identity politics post structuralism post colonialism and feminist theory this fascinating study seeks to examine the construction of Oriental bodies within the emergence of U S immigration policy and explores how these constructions served political social and economic interests

Fireman,Ted E. McVay,Owen J. Flanagan,2003-06-12 We define our conscious experience by constructing narratives about ourselves and the people with whom we interact Narrative pervades our lives conscious experience is not merely linked to the number and variety of personal stories we construct with each other within a cultural frame but is subsumed by them The claim however that narrative constructions are essential to conscious experience is not useful or informative unless we can also begin to provide a distinct organized and empirically consistent explanation for narrative in relation to consciousness Understanding the role of narrative in determining individual and collective consciousness has been elusive from within traditional academic frameworks This volume argues that addressing so broad and complex a problem requires an examination from outside our insular disciplinary framework Such an open examination would be informed by the inquiries and approaches of multiple disciplines Recognition of the different approaches to examining personal stories will allow for the coordination of how narrative seems its phenomenology with what mental labor it does its psychology and how it is realized its neurobiology Only by overcoming the boundaries erected by multiple theoretical and discursive traditions can we begin to comprehend the nature and function of narrative in consciousness Narrative and Consciousness brings together essays by exceptional scholars and scientists in the disciplines of literary theory psychology and neuroscience to examine how stories are constructed how stories structure lived experience and how stories are rooted in material reality the human body The specific topics addressed include narrative in the development of conscious awareness autobiographical narrative fiction and the construction of self trauma and narrative disruptions narrative memory and identity and the physiological and neural substrate of narrative It is the editors hope that the multidisciplinary nature of this collection will challenge the reader to

move beyond disciplinary confines and toward a coherent interdisciplinary dialogue

The Routledge Handbook of Archaeology and Plastics Genevieve Godin, Þóra Pétursdóttir, Estelle Praet, John Schofield, 2024-09-17 The Routledge Handbook of Archaeology and Plastics investigates the archaeology of the contemporary world through the lens of its most distinguishing and problematic material Plastics are ubiquitous and have been so for nearly three generations since they became widely used in the early 1950s Plastics will persist for millennia their legacies as toxic heritage being felt deep into the future In this book comprising 32 original at times disturbing and critically engaged contributions scholars from archaeology and other cognate disciplines explore plastics from a number of different angles and perspectives Together these contributions highlight the dilemma that plastics present their usefulness on the one hand and the threats they present to environmental health on the other The volume also explores the lessons that archaeologists can learn from plastics about episodes of mass production consumption and toxicity in the past and also importantly about the future This important and timely collection will therefore be of interest to all archaeologists irrespective of their period of study or their geographical focus and to students of archaeology and cultural heritage It will also be relevant for researchers and students in other fields of study that focus on plastics and their environmental and social impacts Ultimately this book concerns the contemporary world and the impact of people upon it through the archaeological lens

Vital Negotiations Marion Stange, 2012 Focusing on the field of health care and disease control as a field of policy that was of pivotal importance for the existence and stability of European colonies in the south

eastern areas of the North American continent the book analyzes modes of local organization and regulation in French Louisiana and British South Carolina during the first half of the eighteenth century The work shows that in spite of completely different imperial strategies and systems of rule striking similarities existed between French and British colonies with regard to governance modes and the nature of agents involved in political organization This attests to the fact that governance practices on the local and the colonial levels were informed at least as much by local conditions as by the nature of the empire to which the colonies respectively belonged The work offers a fresh and unique perspective on the realities of colonial rule in early modern North America thus challenging traditional notions which stress the differences between the French and British colonial empires in North America with regard to administrative practices Imperium Frederic Lordon, 2022-01-25 An investigation into what makes the consistency of political groupings What should we do with the ideals of internationalism the withering away of state and horizontality Probably start by thinking seriously about them That is to say about their conditions of possibility or impossibility rather than sticking to the wishful thinking which believes that for them to happen it is enough to want them Humanity exists neither as a dust cloud of separate individuals nor as a unified world political community It exists fragmented into distinct finite wholes the forms of which have varied considerably throughout history the nation state being only one among many and certainly not the last What are the forces that produce this fragmentation engender such groupings and prevent them from being perfectly horizontal but also lead them to disappear merge or change form It is questions such as these that this book explores drawing on Spinoza's political philosophy and especially his two central concepts of *multitudo* and *imperium*
